hello,

I'm looking for voice encryption module for the
motorola mt2100 or mts2000 (voice invertion)

thanks
ron

## 2. fs: Kenwood TK880 TK780 Radio Program Adapter/Cable

Newsgroup: rec.radio.amateur.swap
Date: 2003-01-03 00:36:05 UTC
From: piper tweet <nospamatthistimethanks@yahoo.com>
Message-ID: <3E14DAF5.1FAF8754@yahoo.com>
Source record: 2338
Cross-posted to: rec.radio.amateur.homebrew,rec.radio.amateur.swap,rec.radio.swap

Hello there,

I've got a programming adapter - cable for the Kenwood TK880 & TK780
radios to sell. I use the
kpg49d software and have at... bought this one from an online dealer
less than a six months ago
for over $100 by the time the postage/shipping smoke cleared. But when
your in the field and in
a hurry, you have to get the job done asap.

This adapter might also work on similar series models, i.e. the 800 &
900 Mhz units, of which I have
none myself. This unit is in great (near new) condition, not a
home-brew perf board prototype
unit often seen on Ebay.

So this near new programming adapter/cable unit is for sale for $55 and
a few bucks postage.
Figure $60 will get it to your door USPS with delivery confirmation.

Please take the NOSPAMPLEASE out of my Email address below, after you've
cut and pasted
it into your Email program to contact me. If you reply direct to this
post, notice the whacky
header above to reduce spam.

Thanks and I'll be happy to answer any related questions you have. I
have an all positive 625
plus Ebay feedback rating, same as my Email address if you need easy
references.

cheers
skipp

## 3. WTT wide band reciever/ MARS radio

Newsgroup: rec.radio.amateur.swap
Date: 2003-01-03 11:56:59 UTC
From: Tazanator <tazanator1@hotmail.com>
Message-ID: <fUeR9.423784$GR5.138622@rwcrnsc51.ops.asp.att.net>
Source record: 2325

I want to trade for wide band recievers and a radio capable of working 6998 KHZ ....

The wide band reciever is for my brother (national guard soildier that was actived ...) I want a Broadcast band AM/FM and Shortwave radio that he can listen to for music and news (good moral booster) pocket size and rugged.

I also want a radio so that I can get into mars (I am KB9YMX) the radio needs to work on 6998(khz ?) so that my app will be approved.

I have tons of computer equipment, a ocilliscope a few mobile ANT. scanners and coax. The computers amount to several (6) cases with motherboards from 486 thru pentium III. I also have boxes of add-ons for computers ... sound cards to network cards to even a TV tuner card.... please contact me with what you got and what you would like to see if we can work something out.

## 4. FS: Old Magazines (CQ, QST, 73, HR)

Newsgroup: rec.radio.amateur.swap
Date: 2003-01-03 18:52:40 UTC

I have a collection of several years of CQ, QST, 73, and Ham Radio
that I accumulated in my early years as a ham. I've recently moved
and need to clear out my old magazines.

Will sell complete years for $8/year plus postage. For incomplete
years, will sell issues for $0.75/issue plus postage. Will sell
entire lot (534 issues) for $150 plus postage.

73's
Paul Keller, KA7EWL
e-mail: ka7ewl@yahoo.com

QST
1964: Sep
1969: Oct-Dec
1970: all
1971: all
1972: all
1973: all
1974: all
1975: all
1976: all
1977: all
1978: all except March
1979: all
1980: Jan-Mar, May-Jul, Sep, Oct, Dec
1981: all
1982: Jan, Feb
1983: Mar - Dec
1984: all
1985: all
1986: all
1987: Jan-Nov
Will sell all QST's (203 issues) for $100 plus postage.

CQ
1955: Nov
1956: Nov
1957: Jun-Dec

Most modern ham radios are easily converted for out of band operation.

What radio do you currently own?

The manufacturer will gladly provide modification instructions. It is
generally just lifting a diode off of a circuit board. Or, the mod may
be listed at one of the common mod sites.

On a temporary basis, brass aligator clips are OK up to 30 MHz provided the
connecting wire is not longer than a few inches.

Been doing it for years.

No the rare stuff sell first. Far more QST's were sold then any other
Ham Radio mag.

I am looking for my old friends when they were HL9 stations in Korea in 1969 /1970.
1. William French, W2SRQ I believe he lives in Colorado.
2. John Capo III, KN4MX, I believe he lives in Florida somewhere.
I sent a mail and e-mail to the address shown up on QRZ data base but no reply.
If you know these two hams, please have them send me an e-mail.
Thanks.

I made a trade with George a few months back, my Bearcat 895XLR for a used Sony 2010. We kept in touch for a while, then I stopped hearing from him. I have not received the 2010, and don't even know for sure if he received the scanner. If anyone knows him, please contact him and have him get in touch with me. I stop short at this point of calling him a fraud, since almost anything could have happened to the 2010 between Britain and here, but it would bolster my confidence in my fellow hams if he at least acknowleged my concerns.

I received this email today form a YahooGroups Users.
Please pass the word to your friends.

Yahoo has been spying on your computer.
I have finally figured it out and here is their admission
and how you get out of it. They are using something they
call "Web Beacons" to track Yahoo Group users around the net
and see what you're doing -similar to cookies.Take a look at
their updated privacy statement:

http://privacy.yahoo.com/privacy/us/pixels/details.html

About half-way down the page, in the section "Outside the Yahoo!
Network", you'll see a little "click here" link that will let you
opt-out of their new method of snooping.
Once you have clicked that link, you are opted out. Notice the
"Success" message at the top of the next page.

(If this URL doesn't work, then go back to
http://privacy.yahoo.com/privacy/us/pixels/details.html
and you will find Web beacons in the section on Cookies.)

BE CAREFUL because on that page there is a "Cancel Opt-out" button
that, if clicked, will *undo** the opt-out.

Junkbuster is not in development as of 1998. http://privoxy.org is a
continuation of Junkbuster, with many new features, including web bug
filtering, which are also commonly used in spam to know if the email got
delivered, and thus validates the address.

Otherwise known as web bugs. Download Proxomitron or Junkbuster
(free!) and eliminate snooping from cookies, java, and any other such
intrusive stuff. Eliminate image loading, pop-ups and pop-unders, etc.

Proxomitron http://www.proxomitron.org
Junkbuster http://www.junkbusters.com

I don't go anywhere without it!

I also bought a radio from him. Needless to say it was not as advertised.
Excellent and owned by non smoker must mean...scratched to hell with dings
and dents and every knob and dial is covered in brown nicotine residue. I
emailed him and told him about it. He wanted to know what he could do to
make me happy . For starters he could have been truthfull when he described
the item . Also i think he sent it by pack mule , it took forever to get
here and the packing job sucked. I give John and his auctions two thumbs
down!!!

Actually, it really 'For Auction', and it would have been polite (and
not misleading) to put FA: in the Subject line.

1 QRP+ Index Labs HF Transceiver for sale.

This radio was purchased for Xmas 1996. Serial number is #1029.
This radio has not been modified in any way and is still in MINT
condition. I paid $600 for it new and used it 3-4 times a couple of
years ago. Begining to do some shack cleaning and getting into
another hobby.

Will be shipped in original box with original operating manual and
xerox copy of manual.

Some of the features are:

SSB / CW full break in
All band 160m - 10m
General Coverage Rcvr from 1.8 mhz - 29.7 mhz
20 Memories
Split operation
Digital filters
Built in iambic Keyer
Requires 12v power supply of 1.5 amp or better

Asking $450.00 + shipping Or Best Reasonible Offer......

If you have any additional questions, please e-mail me...

Thanks for looking.... 73s Evert WA5OJI

## 43. 2 Meter Handi Talkie (Icom)

Icom IC-2AT Handi Talkie.

Purchased by my Dad (W5WJQ Silent Key) back in 1982
for $250.00.

This unit is in Excellent condition and has seen minimal amount of
use. To my knowledge it has never been worked on or been
modified in any way. It has a rubber duckie antenna with the
rubber tip missing. It comes with the standard battery pack
and 110v ac charger.

It is capable of 800 channels with Touch Tone Encoder dial pad
on front of unit. Can be switched from 1.5w High power out to
0.15w Low output. Possible 2.3w output could be obtained
if used with optional power pack purchased from Ham Radio
Vendors.

Worked well last time I used it a couple of years ago and still works
with present battery pack.

Also have instructiona manual and schematics.

Please e-mail me if you have any questions or need any additional info.

Asking $150 + shipping Or Best Reasonable Offer....

Thanks for reading.....

Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,rec.antiques.radio+phono

```
FOR SALE:
Triplett Model 3256 Frequency Meter.
This appears to be an absorption wave meter.
Shaped very much like a grid dip meter.
Has two ranges. One band covers 80 and 40m and has
the calibration markings for these two bands.
Other band covers 14 through 30 Mc with markings for
20m, 15m and 10m bands.
Has a switch to select between the two ranges.
Neat little gadget measures 5-1/4" long X 2-1/4" X 2-1/4"
plus a coil extends 2-1/2" out the top.

Has a very nice Triplett 0-1 mA meter built in.
There is a headphone jack on the front for monitoring detected
signals. Signals are coupled into the unit by inductive coupling to
the coil. Can be used for identifying, monitoring and tracing RF
signals along transmission lines, in tank circuits etc.

Condition of the unit is very good. Gray hammertone finish over copper
plated steel chassis-cabinet.

Will sell for $18.00 plus shipping

Reply via e-mail to arrange purchase

(Name is only obscured to evade spammers)

Message-ID: <gcnX9.25206$f6.451331@twister.maine.rr.com>
Source record: 2269

Hello,

Looking for a Icom W21AT HT that is good to excellent condition at a fair price for the YL.

I am in the W21AT only, not other models.

Ideal unit will be in good to excellent cosmetic condition, may have electronic defect -will repair. Ideally will have acessores, manual and original box, but will consider all.

Please email to w1ujr@arrl.net

Thanks much!

73 Bruce W1UJR

## 47. FS: GAP Titan DX amateur-radio antenna

Newsgroup: rec.radio.amateur.swap
Date: 2003-01-22 16:16:26 UTC
From: BD <koogles1@hotmail.com>
Message-ID: <3e2ec3d0$1_1@newsfeed>
Source record: 2271
Cross-posted to: dfw.forsale,rec.radio.amateur.antenna,rec.radio.amateur.misc,rec.radio.amateur.swap

It's in the backyard of a house I'm trying to sell. The coax got chopped in half while I've been gone, but that would be easy enough to fix, and I'm only wanting $150obo for it and all the stuff below...
I've still got the original instructions, a box full of parts, about 50ft & 25ft of "RG-U/8" (I thought it was RG-58 all this time, but that's what's printed on it) with connectors on one end of each, about 50ft of aluminum grounding-wire (and an 8ft ground-rod if you can pull it up.. HAHA), lots of guy-wire, etc. that you can have with the antenna..

## 48. AEA MK-1 keyer

Newsgroup: rec.radio.amateur.swap

I just picked up an AEA MK-1 keyer. Does this keyer have character memories? Does anyone have a manual or can maybe send some programming/operating info for it? Please email me. Thanks.

Any help greatly appreciated.

Thanks.

73

Brett

put a link in your reply to any false statement, that says "see the
real story". be as verbose as you want. Devote a web page to it. Works
great every time!

You can check out the specs at
http://www.chq-inc.com/ic-r/pcr-1000.html
After that if your still interested you can check out my pics at
http://community.webtv.net/Yah_Its_Me_Go_Ahead/IcomPCR1000
On a scale of 1 - 10 I give it a 10. There are now scratches dings or
dents on this unit at all. It was bought from Ham Radio Outlet in
Anaheim Ca. for $329.65 on 10/19/02
I would like to trade it for a like new Magnum Delta Force 10 meter
ham radio or something like it. You can reach me at
chilinvilin@msn.com
Thanks,
JP

Hi all, I had the FT-530 in my pocket the other day in the unlocked position.
When I removed it I must have hit a few buttons and created a problem.
The function button has been re-routed to the lamp button.
In other words when I push the Function button the display still shows "F"
but it will only program a frequency. By using the lamp button I'm able to do
some functions.
example: to lock the keypad I have to use the lamp button.
Any easy way out of this or is a reset in order.
If so, its a long way to reprogram it :-(

THANKS, Mark

S & S Engineering ARK 40 QRP transceiver "like new"
Rugged unit that got excellent review in QST. Comes with optional
internal Curtis keyer. New cost was $270 (plus $40 more for keyer).
Will part for $125 plus shipping. Manual included.

John KM4TI (641-472-0530)

Some features:

Superhet
synthesized to 100hz
rit +/- 500HZ
iiiP > +10 dbm
Sensitivity 0.3 uv
CW crystal filter
CW audio filter
immediate recovery AGS
tunable from mw range to about 7 watts
full QSK
sinewave sidetone
12 vdc
very rugged cabinet
2 3/4" X 5 1/2" X 8"

Greetings,

I am interested in buying primarily Motorola GTX 800MHz equipment but will consider other high end Motorola 800MHz equipment.
Equipment must be operational and be decent in appearance. I am interested in Mobiles and Portables. Note: Portables MUST have full key pad unless included as part of a larger package deal.
Multiple radio packages prefered. but will consider individual pieces.
Please send: Model Number, number of units available and asking price to include shipping to zip 43068 to Radios@tabol.com

Regards,
Tim

Gee whiz Lois, some of us do care!!!!

## 71. FA: Yaesu FT-107M, Transverter, Tuner, VFO, Speaker and Speaker/Patch

Newsgroup: rec.radio.amateur.swap
Date: 2003-01-29 12:27:30 UTC
From: captcharlie@hotmail.com
Message-ID: <b34c3e27.0301290427.886a99e@posting.google.com>
Source record: 2295

I've listed my Yaesu FT-107 stuff on e-bay.

The FT-107M is Yaesu's first all solid-state transciever, so it's
something of a collector's item. With the off-white panels and
the dark tan cases, it has a unique appearance - especially in a
world of black and gray ham radios! It's a GREAT looking station.

I put each item in a separate auction, so you don't need to buy the
entire station if you only want a component.

Although I didn't mention it on e-bay, most items have users manuals.

All of the matching accessories (off-white color front panel, **matching
the FT-107M**) are in good condition, as described in the listings:

The SP-107P external speaker / phone patch is item # 3003807405
The SP-107 external speaker is item # 3003813233
The FV-107 external VFO is item # 3003810961
The FC-107 external antenna tuner is item # 3003817307
The FTV-107 transverter (2M/70CM) is item # 3003820004

The transciever itself needs repair - probably the 120 VAC power supply.
It comes with both the users manual and service manual.
It's item # 3003826005.

If you have questions, please contact me through e-bay. I only use
the Hotmail return address to keep the spambots from getting my real
address.

I get so much spam at Hotmail, I simply never check it - sorry.

Charlie

## 72. WTB: SRR-13 FRR-23 parts

## 73. HELP: Ripped Off; What can I do?

Newsgroup: rec.radio.amateur.swap
Date: 2003-01-31 03:58:10 UTC
From: Doug and Cindy Deutsch <cindyd1@enter.net>
Message-ID: <3E39F42F.AFF42973@enter.net>
Source record: 2297
Cross-posted to: rec.radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.swap

Greetings,

Approximately a month ago I purchased a radio from someone on the newsgroups. I paid for the item using PayPal but never received the radio. What I have received are a few email messages over the time with some interesting excuses. While I am a trusting individual by nature, I am afraid that I have been ripped off and will never seen the radio or my funds.

What makes matters worse is that I stumbled upon an alias that he uses on Ebay and got quite an education when I read his feedback.

I need your help. I know that there have been some "individuals" over the years that have been mentioned on the newsgroups. I also know that many of you have "gone the distance" to get your equipment or money. What can one do legally (if anything) to bring this fraud to the attention of some authority? Can a complaint be file with the PayPal folks since I use a credit card? What are the chances of getting my money back?

Any help would be greatly appreciated. Please contact me directly at "cindyd1@enter.net".

Thanks in advance for your help,

Doug

I wish I could help, I've been ripped off by people in the newsgroups, on ebay, and even on eham.net, but can't seem to find any recourse. :( One guy in here got me for about $500 worth of computer peripherals and a $100 money order. I have reported him to his local police (as have others) but nothing has happened so far. Guess I need to go the mail fraud route and report him to the Postmaster. Another one got me for $158 money order for a Yaesu HT. Yet another from this NG got me for an IC-706 that I traded him for a 1.4GHz computer... that one lives in Canada, and Canada Post doesn't seem too interested in doing anything about it..

Contact you credit card provider and do a charge back. You have 60 days under federal law to reject credit card purchases and since you have not rec. item you should have no problem.

Contact the credit card company ASAP, that is your only hope. Post Office doesn't care, FBI doesn't care, Attorney General doesn't care, your local law enforcement doesn't care, the law in general, in any jurisdiction, doesn't care. Forgery doesn't matter, neither does fraud or identity theft. I speak from experience and I challenge anyone on here to prove me wrong. Sorry to say it in so many words but your money is gone and you will never see it again.
You got took, accept it and go on because no matter what you do you are wasting your time if you think you will ever see a dime out of anyone. BTW, what is this jackmeat's Ebay name, maybe we can have some fun with that. Better yet, where does this jerk live? If he is near me I'll go over and .......let him know you are thinking of him.

Best Wishes,
John in Missouri

I doubt that the names are real, or even the addresses accurate... but..

John Rea (aka John Dillinger)
1030 Pine Rd
Alpena, MI
Paid him cash (USPS money order) for a radio he never sent, has not
contacted me since he said he received the money order, e-mail no longer
good.

Frank (Frankie) Sanborn
424 Nick St.
Newark, DE
Traded him computer peripherals plus a $100 USPS money order for a used
IC-706. Apparently he ran similar scams on others. Local authorities are
supposedly investigating.

John Stewart
(whereabouts unknown)
Surrey, BC
Canada
Traded him an IC-706 for a 1.4 GHz computer. Made other trades with him as
well. After he received the 706, he moved... most other items were returned
by Canada Post.

I think that is an overstatement. A couple of years back I was beginning to get very worried about the non-arrival of a printer I had purchased ($500) on eBay, paid for using PayPal. But I was contacted by the seller's local police department (somewhere in TX) before I ever got round to making any official complaint. It was a Dutch auction, and apparently one of the other buyers made an official complaint before I did, and the police then contacted all the other purchasers. I got all my money back.

Contact PayPal right away. They have the power to reverse the payment. If you cannot get him to answer PayPal will not either. The other method mentioned is the credit card company. Check to see what their terms are.....especially since you did not sign the paper for it.....it all depends on the sigiture.

I work in the resort/accomodation industry and you should see the number of cards that are back charged when the caller says he never called to reserve......bet 2 in 10.

So complain to the credit card company that you did not authorise the payment......

Billy

You can eventually get your money back from PayPal also -BUT it will take forever! Pay by credit card even though you use PayPal & you will not have a problem. Like an earlier person said "you can get it back with no problem if you act in 60 days". Don't let PayPal take it from your bank - pay them with plastic or PayPal will stretch it out for weeks! I know they are doing it to me even though they are the one's who messed up!

Hi,

Here's the search page from ebayersthatsuck.com, a revenge page by a New Jersey cop that was the subject of a recent nationally syndicated article: http://www.ebayersthatsuck.com/ebayersthatsuck.htm

Check it out. Listing your perp's ebay handle there might help--if it's not already there (which will tell you something, too). You just list it, and tell your story. Then you email your little friend with a link the page. Then you can do things like go to his/herother auctions, and email all the bidders the link to the site. In some cases, if the seller is not a total thief, they will do anything to make you go away.

The site has helped get a number of ripoff artists get banned from Ebay altogether.

There are other, shall we say, more vigilante-style methods of ripoff revenge, but you'll have to find them out for yourself on the net. Search on Google or any other search engine on things like "Ebay revenge" or "Ebay ripoff," etc., and you'll probably turn up a number of other interesting ideas.

Enjoy!

Cleaning out my garage, and I'm selling complete years of my remaining CQ Magazines for $8/year plus postage. For incomplete years, will sell issues for $0.75/issue plus postage. Will sell entire lot (121 issues) for $60 (or best offer) plus postage. Postage for entire lot would be approximately $30 via Media Mail in the US.

USPS MO sent by mail? Sounds like mail fraud to me. Have you talked to the PO? Maybe they'll "go postal" om him. I OTOH prefer some good practical joke - like an oz. or 2 down his crack then flik yo bic. But jump back quick - they do a real crazy dance ...

I personally have been lucky so far (100% success rate) with about 70
purchases, one for over $3000.

I understand that PayPal's complaint window is VERY short, like 30 days, so
if you don't file papers that soon, they don't want to hear about it. Seems
counter-productive to me, since we all want to give sellers and buyers the
benefit of doubt and sufficient time for goodies to arrive.

I agree with credit card - I ALWAYS use it through PayPal, even offering to
pay the seller whatever fees they would incur by letting me have the
convenience of using the credit card. That usually makes everyone happy.

Hello Doug..

If you used a credit card, file a dispute with your credit card company.
They will reverse the charge to PayPal, and then debit the user that you
purchased from's
account. I have done this numerous times and it works.

I am wondering, is there a deadbeat web site that one can check out to see if the perspective trading partner is a dud???

Does this really work? I know that if you purchase goods from a
vendor directly, and have a problem, the credit card company will
usually stand behind the consumer in a dispute, i.e. they will credit
back the card if you return the defective items.

I've heard that CC companies will not do this with Paypal-purchased
auction items. Their position, apparently, is that your dealings were
with Paypal, and Paypal committed no fraud. They acted at your
behest, and transferred money to the seller, who is the real criminal.

Now this is all heresay, I've no personal experience trying to charge
back something I purchased on ebay using Paypal.

Comments?

If goods are not received then the credit card company will usually give the funds back, Paypal included.
The post office can be of assistance if a money order was issued, I am currently going through two routes with assh*les called Jerry Gripp and Paul/Peter Lee, one in Canada and one in NY.
I have had my Paypal account credited and the post office are giving 45 days for Gripp to respond before issuing me a re imbursement of my money order and then the Attorney General is involved as mail fraud.
Now it take a very long time for the wheels to get in motion, be patent and learn by your experiences.
I buy over 50 radios a month from the net and have not had too many problems, generally Hams are honest with a few bad ones spoiling it for the rest of us
Good Luck anyway
Martyn

USPO couldn't care less. I have had some success in the past calling the local police department closest to your ripoff artist and speaking to a detective. Frequently a single visit does the trick.

## 95. FA: **LAST DAY**- Yaesu FT-107 + Transverter, Tuner, VFO, Speaker, Speaker/Patch

Newsgroup: rec.radio.amateur.swap
Date: 2003-02-01 19:39:25 UTC
From: Charlie <captcharlie@hotmail.com>
Message-ID: <NnV_9.118546$Ve4.7932@sccrnsc03>
Source record: 2219
Cross-posted to: alt.ham-radio.marketplace,rec.radio.amateur.swap

***These are 6 separate auctions, which end on Sunday
(That's TOMORROW) at about 9 PM Eastern Time***

I've listed my Yaesu FT-107 stuff on e-bay.

The FT-107M is Yaesu's first all solid-state transciever, so it's
something of a collector's item. With the off-white panels and
the dark tan cases, it's a unique appearance - especially in a
world of black and gray ham radios! It's a GREAT looking station.

I put each item in a separate auction, so you don't need to buy the
entire station if you only want a component.

Although I didn't mention it on e-bay, most items have users manuals.

Also, I'm tired of seeing e-bay links that are so long that they're
fractured. So, in an attempt to start a whole new trend, I'll just
post the item number. Let's see if that's easier to work with.

All of the matching accessories (off-white color front panel, **matching
the FT-107M**) are in good condition, as described in the listings:

The SP-107 P external speaker / phone patch is item # 3003807405
The SP-107 external speaker is item # 3003813233
The FV-107 external VFO is item # 3003810961
The FC-107 external antenna tuner is item # 3003817307
The FTV-107 transverter (2M/70CM) is item # 3003820004

The transciever itself needs repair - probably the 120 VAC power supply.
It comes with both the users manual and service manual.
It's item # 3003826005.

If you have questions, please contact me through e-bay. I only use
the Hotmail return address to keep the spambots from getting my real
address.

I get so much spam at Hotmail, I simply never check it - sorry.

Charlie

OK, here you go. This is worth reporting to as I've read good things about it. It's slow though so it doesn't hurt to go ahead and get this guy in trouble AND get your money back.

http://www.ifccfbi.gov/cf1.asp

Good luck

Well there is some good news! Any of the transactions that have taken place through the mail, you can summit amail fraud complaint which will take months but does typicaly force resolution. If you have paid an person VIA a USPS money order then it is a felony, and the Postal service will prosecute. Now don't jump the gun here they are not very quick I have 4 cases pending now one is ove a year old but it is finaly paying off 6 months I would consider a quick turnaround but even at that it is better than total loss. The number one thing to do is post there name address used and as much info about what has transpired in this way the cons are learned by all out here and then become less of a danger to all. Just remember that strange things do happen in peoples lives at time and it is important to give all a chance to resolve, in time of crisis of family ect. people priortys do tend to get shifted a little but most people I beleive are basicly honest and will get things resolved. There are those out there that are just theives and our best weapon against them is information on there methods so we can watch the patterns developing.

Hi,

Try to get confirmation that the US Postal Money order was cashed. This takes some time.

If you can find the person real address, you can search public records most of the time for free
on the web. Find out if they own real estate, if so you can file a lien on the property.
No one will buy their land/home if a lien is on the property. This will get their attention and maybe
you will get you goods or money refunded.

Most of the time you can file a lien by mail and pay a small fee and this works.

regards.

Doug....If you are reading this, did you use a postal money order? I
was under the impression that you used a credit card through PayPal.
I don't understand why so many posts are referring to a postal M.O.

Doesn't have to be cosmetically nice, but must be in perfect working condition. Lower the price, the more attractive. I wouldn't mind an appropriate magmount antenna with it, if you have one to sell.

Thanks,

-Leo

## 112. WTB or Trade...Motorola HT1250 UHF

maciver@sbcglobal.net says...
> This radio is just a couple months old, but perfect condition. Check it out
> on ebay. If you aren't satisfied with the condition you can return it.

Just out of curiosity, how come you're getting rid of your '817? I've
fallen completely in love with mine, wouldn't trade it for the world!

Talk about "Customer NO SERVICE" !
Purchase two RascalV units based on the reviews here on eham.
Received items and one of the cables would not plug into my Kenwood
870 (13 Pin).
I verified my plug with the plug that shipped with my radio, and it
plugged in correctly.
This was a puzzling problem and I didn't want to damage my rig forcing
this plug into it.
I sent BuxCom and email, and they responded that all they have is a
fax.

I was very upset that they don't want to talk to you on the phone
about problems.
So I replied back to them to call me !

Bux called me back wanting to argue about my email I sent them.
All I wanted to do is talk to someone who could help me with a cable
problem.
How can someone run a business where they take your order via Fax or
Internet.

I apologized for my email even though I didn't feel I was out of line,
but just
to get this guy to calm down to focus on the problem I was ready to do
anything.
This problem could have been resolved by them sending me a replacement
cable.
He said he tested all of his cable, but not this one?

I told him that I was a member of a club that was getting ready to buy
a number of these units.
He replied he didn't care and didn't want to deal with people like me.
Just send it all back.

I posted my review on eHam and while looking through the reviews,
I found someone else that had a similar problem with this company.
All I can say is you get what you pay for.
If you have a problem, good luck with dealing with Bux.
Just fix it yourself.

<laborkeiNOSPAM@hotmail.com> wrote:
> Talk about "Customer NO SERVICE" !

I have bought three Rascals (one ready-made and two kits) from Buck
and all of them work OK.

The ready-made came with TXD hard keying CW instead of DTR. Buck
fixed it, no questions asked.

He answers all my questions, which I keep few and short. I believe he
gets very busy, so you need to be patient.

You can't expect a 3 credit college course with a $25 kit (or $20, if
you bought during the year-end clearance sale).

These kits cost less than the cables alone run at Radio Shack.

If you were expecting the level of support you get with a K2 or CMOS4
kit, you were a little unrealistic.

One advantage of the rough-hewn approach is you will wind up knowing a
lot more about the subject than when you started -- or if you bought a
$125 Rigblaster.

Lastly, he is fast, honest and his prices are very fair.

My experience has been the EXACT OPPOSITE!

Buxcomm sold me a superior product at the BEST PRICE.

If you wanted something in a fancy metal box you should

have bought one of those $150 interface boxes.

If you were not smart enough to figure out how to use it
you bought the wrong thing. To be honest I had a couple of questions,
but K4ABT personally answered me via e-mail twice and got me up and
running easily.

I have had ZERO problems with Buxcomm! GREAT guy!

Maybe you should stick to "slop bucket" (SSB) hi hi!

Well so much for this troll, not even a real email address.

My Rascal worked perfect after I built it per the instructions.

Maybe this Tony guy needs to setup his comm port properly.

wendy

These Motorola 12w AMPLIFIED speakers have GREAT clarity and you can make them L-O-U-D !

Ever want an amplified, totally enclosed, rugged extension speaker for your radio? This is the one to buy.

These Motorola extension speakers will work with base units, handhelds and scanners! They are SUPER for use in your radio room. I
listen to AM broadcast through it.

If you are into public service these would make a great addition to equipment you bring to emergency shelters, the EOC or outdoor
events!

Ebay has a lot of unpublished policies, for example I sold an item to a guy who later turned out to be a manufacture of illegal power amplifiers.

This guy attempted to defraud me by claiming I sold him defective material. I had pictures of the item as shipped and had insured it for the amount purchased plus 10% to cover shipping costs. Once the shipment arrived he attempted to stop payment on the Postal Money Order he sent me. After the Post Office refused to refund, he made demands that I give his money back without returning the item to me, he refused to file an insurance claim with the Post Office saying, "I would look stupid".

After an extended background investigation by myself and a former law enforcement co-workers we found this guy to be a professional "flim-flam" artist. Meanwhile, Ebay kept insisting I pay him off because the buyer is always right. In the end this man threaten me with legal action which never transpired, as he was afraid of being arrested for fraud by the Postal Inspectors. I worked with the Postal Authorities to clear up the situation by having at least an impartial inspection of the item. The man refused to give it up through the entire ordeal.

In the end even though I did not nothing wrong and subsequently quit Ebay out of frustration with their policies, they marked my closed account as being shut down because I was the dishonest person. The crook with prior convictions and a string of law suits across the U.S. his account is still active and is buying up parts to keep building his high power trash generators. (By the the way this man told he was buying my item to fix a radio religious radio stations transmitter. )

Never trust Ebay, they will do what is in the best interest of lining their pockets with money.

Hey, I ran into this guy too! Said he was doing charity repair work on a religious broadcasting station so did not have much cash. Asked him for station ID and call signs and he provided some. Checked with the stations and they said "Not him again!" Needless to say, the vacuum capacitors never got shipped.

Steve

## 175. "CW" Typewriter on ebay

Newsgroup: rec.radio.amateur.swap
Date: 2003-02-23 00:00:29 UTC
From: hypermodern@hot-shot.com
Message-ID: <c6ac9fa2.0302221600.280e1b9c@posting.google.com>
Source record: 2199
Cross-posted to: rec.radio.amateur.swap,rec.radio.amateur.boatanchors

I don't know the seller and I have no connection with this auction.

There is an all-caps Underwood manual typewriter for sale on eBay.
These typewriters were used by telegraphers so they could type in all
caps and not have to unshift to type numbers. I used to lust after one
of these but I've never actually seen one. If you collect CW stuff or
have a 20s-50s vintage station, this might make a nice accessory. It's
certainly not a common item. Again, I don't know anything about this
particular unit or the seller, I just noticed it and thought someone
might be interested.

Please place FA in the header so that those of us who know how to use the
ebay search engine do not have to read your ads.

I think if it says " "CW" Typewriter on ebay" it would be safe to say
that it is an auction, so I guess you didn't read the header and you
read the post anyway and got pissed because he didn't put in "FA".

Larry, you have to allow for the occasional "computer appliance operator" who does not know how to use his/her software and set features such as filters for "auction, ebay, more days, bid, ends soon" These are the same lamers who would croak if they ever had to open a cabinet and actually work on a circuit.

Steve

Not in original boxes, but these look unused. Clean, shiny bases, no discoloration
in the envelope. I can't test them, but I'll guaranty them not to be DOA.
Have a look at them at:
http://www.angelfire.com/linux/tubesnstuff/images/4125A1.jpg
http://www.angelfire.com/linux/tubesnstuff/images/4125A2.jpg
AES gets $132.00 each for these. I'll take $100/obo for all 4.

President Lincoln for sale, on scale of 1-10 its a 9 due to some light ware around the knobs as well as some small grooves on the bottom of the heat sink from where a fan was mounted. Radio works great and have made many contacts on it in the last year since i purchased it. Im having money problems and am forced to sell this rig but hope it finds a good home. This rig replaced my 2600 after it was damaged in a car wreck. I have all that came with it, box (kinda bad shape, but thats how i received it), manual, mounting bracket and origional mic. The power cord is also included but is only about 12 inches long.

Asking $250 shipped O.B.O

Robert, KB0RYR

Dave Hall <nojunk_n3cvj@worldlynx.net> wrote:

> Why twisty, resorting to changing your nic now? No one else would defend
> you to that level.....

Dave, are you really that stupid, or are you just trying to help Douglas W. Adair N8WWM live down his own violations on the Rain Report so he can get back to crying about CB rule violations, posting gay porn binaries, pedophile fantasies, running BI>20 spew attacks on rec.radio.cb and forging Twistedhed to all groups in the rec.radio hierarchy with fellow net-abuser and outcast Leland C. Scott KC8LDO?

In any case, instead of defending Twistedhed, I merely pointed out that Douglas W. Adair N8WWM appears to enjoy writing original pieces featuring children, specifically boys, and gay sex. It's not like this is the first or even the second time Adair N8WWM has written original pedophilia songs.

Why are you, Dave Hall, so eager to defend Douglas W. Adair N8WWM from having his pedophile fantasies exposed and disseminated? Are you sympathetic to pedophile fantasy writers, assuming N8WWM hasn't -yet- raped children? Are you frightened that Adair will call you a "traitor to amateur radio", as he did the late Richard McCollum N BK, if you don't support his insane, abusive behavior? Does Twistedhed drive you crazy enough to support Doug Adair N8WWM who regularly uses the kind of "gutter language" you've spoken so vehemently against, Dave?

Your hypocrisy is positively shocking, Dave Hall N3CVJ.

The most likely explanation for your brainless follow-up is that you're just one anti-twistedhed k00k defending another. Appropriate groups added. When malicious clowns like you are involved, Dave N3CVJ, it's hard to tell, but I'm willing to explore it at length with you.

Regarding your baseless assertion that I am "twisty" under another "nic", one needs only to be able to read to realize that his posting style and mine are quite different. You obviously consider yourself quite intelligent, regardless of the fact that you're actually a blinkered, intellectually myopic hypocrite. Can't you at least read well enough to see the difference, Dave?

I've restored the post in question below my comments. Read it closely and decide whether your bitterness over being clobbered in debate after debate is worth defending a federal outlaw, homosexual stalker, racist and pedophile fantasy writer like Douglas W. Adair N8WWM just because he, too, is obsessed with "twisty".

Here are a few quotes from the ignorant, hypocritical racist pedophile fellow no-code ham radio hobbyist you're backing, Dave:

"Live like a nigger, die like a nigger."

I think its soo damn funny when twistedhed disguises himself as Fatty
Arbuckle and puts up pages about people. Do it some more
twistedhed@webtv.net.

It just shows how effective the anti-boys are! twistedhed@webtv.net is
ENRAGED, but he is too big of a sissy to do anything except from
behind an anonymous post. That's cool though. The very virulence of
the attack shows how totally ENRAGED his pink muffin boy self is.

The anti boys own rec.radio.cb

FOR SALE:

Swan 350 transceiver with 117XC power supply/speaker cabinet.
All in good operating condition with manual.

Power input 400 watts PEP on single sideband, and 320 watts input on CW.
Also will run AM, Single Sideband with Carrier, 125 watts dc input on all bands.

Has AGC, ALC, and grid block CW keying. Unwanted sideband down at least 40 db.
Carrier suppression at least 50 db. Sensitivity: Less than 0.5 uV for signal-plus-noise ratio of 10 db.

Controls for Rec-Tune-CW, AF Gain, RF Gain, Mic. Gain, Bandswitch, Carrier Balance, PA Plate Tune, PA Grid Tune, PA Load Coarse, PA Load Fine, VOX-PTT Switch.

Rear controls for Bias, Grid-Block CW Key Jack, Jones plug power connector, Vox connector, S-Meter Zero.
Uses a pair of 6HF5 finals.

When the 350 was introduced in 1965, the price was $420.00, the 117XC was $95.00

Swan 350 available for $195.00
Swan 117XC available for $85.00
Swan VX-2 is available for $35.00
Will sell the Swan 350 and 117XC for $250.00
All of it for $270.00

E-mail me for pictures or see:
http://www.gizba.com/x/sidevalve/radios.htm
(Just CLOSE the pop-up windows!)

Cross-posted to: alt.ham-radio,alt.ham-radio.marketplace,alt.ham-radio.vhr-uhf,rec.radio.swap,rec.radio.amateur.swap

I need a number of these. They can be 2/8 or 16 channel.
These are for the ROTC. I am not making a killing on the
radios as I will need to program all of them and am doing
that part for free.

Also looking for gang chargers for the same radio.

Please email direct and advise what you have and what your
price for each with shipping to 03034.

Thanks in advance, John

## 238. FA: Alinco DJ-C5T Credit Card Size Handheld

Source record: 2077

I have an Icom IC-W32A for sale. With the exception of shipping tape placed over the display lens (I do this to all of my H/T's to protect the lens, and it is easily removable) the radio is in as new condition. It will be shipped in the original box with manual, quick programming card, stock duck antenna, battery and charger. In addition, I will provide a registered original RT Systems software disk.

Asking $200.00 O.B.O. + shipping from 11786

Please e-mail off list with questions.

Thank you,
John, KB2COP

I have for sale a new Kenwood TM-V7A dual band mobile fm transceiver. I have never removed this radio from the box. I bought it from AES and thought I would be installing it in my car. I installed a 706 MK II G instead. Nothing has been removed from the box and is currently sitting on a closet shelf. I have a new comet dual band antenna and mount with coax that has never been out of the packages also which I will be selling after the radio goes.
I am asking $375.00 plus shipping for the radio from 48026.

Hi all, Do you have a Cadex C7000 Battery Analyzer/ Reconditioner?
Do you have any battery adapter cups that you can't use??
Cadex made battery cups for hundreds of battery types.
Many C7000 units are picked up used and the cups are useless to the
new owners.
If you have some of these collecting dust, I'd like to get them from you.
Please let me know what you have. We can work something out.
Please e-mail me direct at:
mrrusso@optonline.net

THANKS, Mark

I have for sale a mint Yaesu VR-500 wide band receiver with accessories. This radio was bought at Christmas and has been only used indoors for not more than 1 hour total. This is an excellent all mode wide band receiver. It covers 0.1-1299.99995 and has 1000 memories. I am including the Yaesu CS-72 soft case, never used Yaesu FNB59 rechargable battery and the Yaesu never used NC-60B charger. This radio was only used on disposable AA batteries. I am the original non smoking owner and have all of the boxes, paper work and warranty card. I am asking $225.00 plus shipping from 48026.

**12 Cassette CHANGER with speakers.**

This isn't exactly a BOATANCHOR but it's sure close to it. 27 pound,
1973 manufacture and discrete except for the audio modules in the
output.

I've never seen another one like it.

This would be a perfect addition to a 1960s or 70s shack!

I'd be interested in a swap for radio stuff. What do you have or
what will you offer me?

See this Cassette CHANGER with speakers here:

http://home.attbi.com/~h1m/casschanger/cassettechanger.html

Thanks for looking.

For Sale: A Radio Shack 25 amp switching power supply in MINT
condition. Only used a few months. Went "solar" with one of my set-ups
so I don't want/need it. I do believe these are mfg'ed by SAMLEX and
RS puts their own name/model # on them.

Nice quiet fan. No meter. Output's on back. Illuminated red switch.
Flat black color. Very nice.

$75 and I'll pay the shipping and postal insurance.

First e-mail or phone call gets it!

Source record: 2008

Some answers to questions you might have...

1- The battery is original and has very little use. I purchased the H/T more for listening than transmitting. It is a BP-173, 9.6v and 650mAh.

2- The radio has never failed and I guarentee it to NOT be DOA.

3- The radio has been babied, it has never been dropped and never in a smoking environment.

4- The radio serial # is 14684. It is in as new condition and, with the exception of clear packing tape over the display lens, there are no marks/dents or scratches on the radio.

The radio will be shipped in the original box with the original manual, quick reference card, wall charger, stock duck antenna and wrist strap.

5- I am selling the radio to help defray the cost of a Kenwood TH-D7A(G) I just purchased.

6- I don't have access to a digital camera, I cannot provide photo's.

Although I haven't sold many things, I have a good eBay rating (see NPDXO) .

$190.00 + shipping from 11786

Cross-posted to: rec.radio.swap,rec.radio.amateur.equipment,rec.radio.cb,rec.radio.amateur.swap

Hi all, I had this amp on ebay and after one day they killed the
auction. Seems they don't allow ANY amps that can tune from 24 to 35
MHz. So now it's here...
It is for the 10 meter ham band only, it is illegal to transmit with
this amp
on 11 meters but you can use the receive preamp there!!! It works off
a 12 volt power supply or it will work in your car also. It has a low
power / high power
switch with a high power LED, RF LED (lights when in transmit) and a
receive preamp switch with a receive amp LED indicator. The receive
preamp works very well pulling in those weak signals on the fringe. The
transmitter amp works
very well also. It is excellent condition. Not much more to say about it
other than it is in perfect working and looking order. Will NOT be
DOA!!
If you would like to see the pictures, just e-mail me direct and I'll
send them to you.
I'm selling this amp for $99.95. You need to pay for shipping
I will be packed very well and insured.
Please feel free to check my Ebay feedback. You will see 343 positive
feedbacks with no negatives.
Do a search on "sellers" then look up spock-
You need to put the dash in.

also, while you are there please check out my other auctions.
Thanks for taking the time.

Hello all,

I have for sale a Heathkit DX-20 CW x-tal controlled transmitter, 80-10 meter coverage. Includes (2) 80 and (1) 40-meter crystals. Transmitter operates and is in excellent, clean condition with little to no blemishes. Appearance is a 9 out of 10. Non-smoking ham, I take great care of my equipment.

Asking $75.00 for the radio and buyer to pay shipping, insurance.

Please make an offer, contact Denis, W1WV@attbi.com or work tel: 1-508-235-2012

73,
Denis

## 295. FS: Gonset 6 and 2 meter transceivers

Newsgroup: rec.radio.amateur.swap
Date: 2003-03-30 17:03:46 UTC
From: Denis <w1wv@attbi.com>
Message-ID: <SrFha.299256$sf5.277363@rwcrnsc52.ops.asp.att.net>
Source record: 2019

Hello,

I have for sale (2) Gonset radios both in working condition but have been sitting on the shelf awhile collecting dust. I have upgraded my shack to solid state and selling. Non-smoker ham who takes great care of equipment.

1) Gonset Communicator-IV 6-meter AM transceiver with assorted crystals (50.1 through 50.4 MHz). Unit is VFO receive and crystal transmit. Unit operates, includes manual but does not include a microphone. Asking $50.00 or best offer. I have used my Astatic D-104 with this radio (plug has to be a 1/4" three conductor type).

2) Gonset Communicator GC-105 2-meter AM transceiver with crystals. Includes microphone and manual. Radio is mint condition, asking $50.00 or best offer.

Contact Denis w1wv@attbi.com at 1-508-235-2012 (work tel.) if interested. Buyer will pay for shipping and insurance.

73,
Denis

14khz-29.999.99mhz in clean working order
with copy of Instruction manual
30ch.memory
LCD Digital readout
Usb,Lsb,Cw,Am,Isb(optional) don't have
300hz cw,1.0khz cw,2.8khz ssb, 3.2 am,6khz am Filters
Added 2 fans internal one on power supply and one receiver side
professionally done and it keeps the power supply cool
One minor draw back the crystal oven has to warm up first about 3-5 minutes
and fault light will come on because of oven. Turn off and on to reset fault
light and bit test pass and self test will pass if pressed. Otherwise
receiver works great.
$1000(firm)+shipping but prefered pick up and can demo it.

Message-ID: <BAB7E627.7EA5%N8NOE@Comcast.Net>
Source record: 2040

I Just read this and HAD to pass it along!..
Jeff

Yaesu will soon be selling the new FT-897, a new HF plus 6, 2 meter and 430 multimode radio.

The 897 will join the ranks of the FT-100, FT 847, FT 817 and the Icom 706, providing amateurs with yet another choice of a "all mode all band radio". Whats wrong with this picture??ï¿½

The ham community is forever so concerned that our ham bands are in danger of being taken over by commercial interests and rightly so.ï¿½

But where are the comments or outrage toward the manufacturers for constantly excluding OUR ham bands like 222, 902 and 1.2 gig??ï¿½

Why?? Because no one uses 222 or that 222 is not used in Japan or Europe? Isn't the US a big enough market that the major manufacturers can add another band or two??ï¿½

Look, its OUR bands that the FCC authorized us to use, yet we are at the mercy of Yaesu, Icom, Kenwood and the others. By the way, when was the last time you saw a brand new 222 Mhz multimode radio for sale?? Hey how about it Ranger, Ten-Tec ???ï¿½

If one remembers it wasn't all that long ago that we lost parts of the 220 band to commercial interests, in part because the band was under utilized.ï¿½

A good explanation was that there were not many radios that covered the 220 band. Radios were expensive $ 300 and we are talking handheld.

Thankfully due to Alinco and Pryme there are affordable and readily avaible 222 FM handhelds and FM mobile rigs, but where are the multimode radios?

What can we do?ï¿½

Write to the manufacturers and tell them you want the bands that YOU are licensed for. You want the 222 band included next time, you want a radio that also covers 902 Mhz AND 1.2 gig, and tell them that you should not have to mortgage the house to buy their rigs either.ï¿½ Look, its your money, but its your bands too.ï¿½

Don't you have a right to use them, before..... we lose them ?

Source record: 2042

Icom IC-746 with UT-102 voice sysnthesizer unit.
Has FL-223 narrow SSB filter. No mic. Display "dim"
feature does not work, but is lit very well. Just won't
dim. Everything else about radio works like new. The
radio looks like new. Original box and manual.
700.00 plus shipping

Drake L-4B amp. Amperex 3-500z tubes, full output.
Very good cond. With L-4PS power supply. 700.00
plus shipping. Have the Drake 2 pin plug with it. Will
ship in 3 boxes, tubes and glass chimneys, amp,
and power supply. 700.00 plus shipping

Astron VS-35M power supply. Adjustable amp &
vollts with separate meters. Very good condition.
80.00 plus shipping

Mirage B 5016 G 2 mtr mobile amp. 50 in 160 out.
I don't think the receive amp works or at least not
very well. Output fine. 150.00 plus shipping

Dentron Super Tuner plus. Works good, good cond.
100.00 plus shipping

I will try and help out with the shipping on these items.
Located S.W. Ohio 45122

Note* I am a smoker and if thats a problem, don't buy.
All items are sold "as is" with no warranty. Last used
a few years ago and everything worked very well.
Getting out of hobby and only trades I might be
interested in would be Chevy racing or Pro Street parts.
Thanks,
N8MKP

We need to go out and buy transverters for these bands and do it in significant numbers. That serves two purposes: 1) gets us on the bands to protect them and 2) shows the manufacturers that they are missing a potential profit area.

## 326. Icom PCR1000 audio question

Newsgroup: rec.radio.amateur.swap
Date: 2003-04-10 23:54:17 UTC
From: Skipp bought an icom pcr1000 receiver <Illreplybypostingback@yahoo.com>
Message-ID: <b75079$k8u$1@woodrow.ucdavis.edu>
Source record: 2050
Cross-posted to: rec.radio.scanner,rec.radio.amateur.swap,rec.radio.swap

OK Receiver and Scanner Head types.... I've got an Icom PCR1000 audio question to you owners of said beast.

Just got a new one... the Bonito supplied software loads up fine and seems to work pretty well.

My question is about the actual speaker audio which seems to be distorted, poor in quality or just plain bad. I've thumbed through various modes and frequency ranges... the audio just seems to be a garbled sounding voice. Yes the frequency selection works... I can pop in the local police with a honking loud signal, but again the audio seems to distort on peaks regardless of the selected bandwidth (set to 15Khz for typical two-way radio fm).

So I'd like to hear your opinions on the audio if you have an Icom PCR1000. So far, compared to a regular scanner.. the pcr audio is not cutting the mustard.

I couldn't get the supplied Icom software to work and I see there is now and updated version on the Icom web site. My next task is to download and try the lastest Icom supplied software.

The Bonito Software looks nice, but it also appears really "busy." Could just be me...

thanks, I'll read your follow up posts here on the news groups.

cheers
skipp

Skipp,

I owned one of these radios. It worked great except for one thing...some antennas made it overload the frontend of the radio. If I used my long wire, it was not a good match. I switched to a discone antenna with a whip for HF frequencies and that was an excellent match for the 1000. Just my experience....

## 330. Looking to swap my Computer gear for dual band mobile rigs, other

Newsgroup: rec.radio.amateur.swap
Date: 2003-04-11 04:09:08 UTC
From: John LeMay <jlemay@njmc.com>
Message-ID: <pan.2003.04.11.04.09.05.404156@njmc.com>
Source record: 1954

I'm looking for a couple of mobile rigs - preferably 2m/70cm dual banders. Relatively recent rigs with tone and the like needed. I could also use a 6m rig, maybe others. Let me know what you have! I have quite a lot of PC equipment - from hard disks right up to whole systems (Pentium 3 or better) - available for trade. Due to my trade, I could even work out a deal on new PC hardware, although there isn't much room for discounts in this industry anymore.

If you have some extra radio gear around and find it's time for a PC upgrade, please contact me directly via email to jlemay@njmc.com.

thanks!

I am having the same problem here as well as a friend also. Have not had much time to play with the PCR-1000 but I have just noticed the distortion on the local ham and law enforecement repeaters. Other modes appear fine and I have copied HF WEFAX out of New Orleans ok using just a group plane mounted two feet directly above the antenna. I will be experimenting with a outdoor mounter discone this weekend. Would anyone know if the distortion is there using Bonito 5.0? I am using 4.5. Interesting to note: the distortion is not there using the Icom supplied software or the PCtalk version. Let's keep this going. I would be most interested in anyone's success in using the PCR-1000 for satellite use. Thanks. pcox, K4AVO (All-Icom)

I'm also getting the shaft from Ebayer APCOMIC@AOL.COM. Fortunatly I used a credit card with protection...But I want to prosecute!!!!!!!
I delt with Shaun Allen before and had a good deal, but now I'm NOT. $6??.00 worth of no e-mail responses. The first transaction is the only way I got his name and address, but the sherriff is checking to see if some kind of identity theft took place before I persure.

I'm not so sure about Ebay anymore.....

## 335. And now for something completely different... AR-247 question

Newsgroup: rec.radio.amateur.swap
Date: 2003-04-12 19:58:47 UTC
From: "Mark V. Russo" <mrrusso@optonline.net>

Hi all, here is something that I have heard form a few people,
including a guy at HRO..

Might this be true??????
Anybody do this or know about this being done???

On the ADI AR-247 220 MHz radio
is it possible to mod it with a few switches to make it
do 144 MHz and 440 MHz???
I doubt it but then there are the stories I have heard.

Thanks

## 336. Re: Ripped Off; What can I do?

Tried contacting your own local Police Department? I had a problem once. I contacted the local boys per instructions from the Police in the area the person lived. I also contacted the Post Master Generals office in my own area. They told me to file a report with them and they (PMG) would take care of it. My problem was solved.

Try contacting others in that area, try the ISP of the person for info, A CORRECT NAME and so on. Some of the things may be long shots. $650 is a lot of cash to lose. Also try contacting the Attorney Generals' office in that state. You can usually find them on the web doing a search of state web sites. Lots of luck...

Try to file a lein on any personal property this bum owns.
Most of the time you can file the lein by mail.

He can't sell his house with a lein on it, no one will buy it that way.

The lein may just get his attention and get him to mail the funds back.

You can't just file a lein without a court order - usually requires a
court case with a decision in your favor.

>The lein may just get his attention and get him to mail the funds back.

I think the correct answer is to file a small claims suit.

Exactly - as the man said, you need to file a suit before a lien is placed.

I am AMAZED at the free legal advice available on a radio swap group.

DAMN, it's a wonder anyone goes to law school any more.

re: Icom PCR1000 garbled audio problem (narrow band fm mode)
-
Hello there,
-
Just a quick bit of feedback... Last week I posted a garbled audio
problem with an Icom PCR1000 receiver.
-
I traced the problem to the Bonito Software supplied with the unit. The
fix is to down load the latest Icom software from their web site and use
it. The Bonito software seems to have a bug or two... it appears to me
the bandwidth filtering doesn't appear to switch properly.
-
I'm happy with the preformance of the Icom software, it would be neat to
have the Bonito Software work, but I'm sure you'll have to purchase and
upgrade to get things on the road as expected.
-
The 200mW audio from the receiver is kind of puny, but it works and will
drive larger power amplifiers/circuits.
-
OK, that's about it...
cheers
skipp

Look at the changes at the Museum, It's going nicely and adding daily.
I have gotten comments and equipment from at lease four states.

As a member of the Pennsylvania National Fire Museum.
http://members.aol.com/JCW37/FRmuseum.html

I am setting up a communication display. I want you folks to look in your junk draws. And send me some old non functional control heads, or dash type radios. I have a corner assigned to me. I have costume built shelves and will mount all type and brands of radio heads. I will have some stored old audio coming out of these speakers.

Please take it as a gift to the museum and cover the postage. I would like to see all types and brands in this display.

Richard E. Lenker
3540 N 6 th St
Harrisburg, Pa. 17110

Or
The Pennsylvania National Fire Museum

Need to clear out some radios - so I can buy some new ones ;>)

Kenwood TS-520S Station: $275
Includes: TS-520S Trasceiver
VFO-520 Remote VFO
One spare set of balanced finals.
Yeasu Dynamic Desk Mike
Add-on Digital Display (Not DG-5)
Has User and Service Manuals.
This transceiver works very well and still transmits
a good 100 watts into a dummy load as measured by a Bird 43
watt meter.

Alinco DX-70T Transceiver: $325
Includes: 15 foot Separation Cable
Hand Mike
Has original box & User Manual
This transceiver works very well and transmits 100 watts
to a dummy load as measured by a Bird 43 watt meter. 6 meter
transmission was 9.7 watts.

Icom IC-Z1A 2M/70CM HT with Maha 45 Watt Docking
Station/Amplifier: $250
Includes: Two BP-173X, 9.6 volt/1000Mah Nickle-Metal Hydride
batteries - these are the ones that don't develop memories.
Has all User Manuals
HT transmits 5 watts with charged batteries on 2 meters
and 3.5 watts on 70CM.

All equipment is offered "As-is" to protect myself from
golden screwdrivers.

I have a Leader 315A Portable Oscilloscope to sell
(Briefcase Size). I have More Radio Testing Equipment than I need
here, But the more I'm moving stuff, the more I find I really
don't need here...
I got this scope about 2 years ago, and have never ran on the
External Battery, but It Hold a good charge, and the Scope is Fine.
It has the Case, Probe, Manuals, Everything that came with it...
Drop a line if your interested?...
Asking $250.00 for the Scope, I got it at a good deal, and I'm not
looking to Make money, just trying to get something out of it!...

re: Motorola UHF Saber / Sabre Portable for sale.

Hello there,

A Commercial Radio friend of mine just asked me to list and sell his personal Motorola Sabre / Saber UHF Portable. I'll try a listing here first, then off to Ebay if no one is interested.

As most of you know, it's one of Motorola's high end portables. This unit is clean, from memory obviously more than 10 channels when I turned it on, a right hand radio (yes, they made left hand units) and in the UHF Band. The battery is very fresh and I believe a charger is included in the deal. He is a big GMRS guy, so this unit currently has 462.725 type repeater and talk around frequencies entered.

I have no idea what this radio is worth... but he was trying to ask $300 for the entire package. If that gets your motor going or you'd like to make an offer, please drop me an Email.

Please use the Email address below for your questions related to this post only. Please no spam.

I'll try to field your questions quickly if you simply drop me a note. Thanks for reading this... both my friend and I have lots of references and all positive Ebay feedback you're welcome to look up.

cheers
skipp

Hi John!

Well, have run two different linear amplifiers with my 756pro. Presently using an Amp Supply LK-450 amp. One 3-500Z with a tuned input; about 850 watts CW. The current draw is fine for the internal relay. I also have run an old B&W L-1000A amp. Two 813s with a soft key kit and T/R relay added. It's BIG! Matches OK and about 650 watts CW.

The current crop would work OK as well... The Ameritron AL-80 series is similar to the Amp Supply, with the addition of ALC from the amp to control overdriving the amp. If money is no object, the Icom PW series is the cat's meow! Just about all modern (last 10 years or so) have low current requirements for the TR relay (756pro will not handle more than 200 milliamps). If the amp needs more, an external relay with low current draw in the circuit would take care of it. You DON'T want to run too much current through the internal relay; it will fuse shut and they are expensive to send back and have replaced.

Hope this helps!

Be careful with the older Henry and Alpha amps. I use an Alpha 76A, but it required a switching module and that works fine. Originally I just hooked the Alpha up and the first thing that happened was the relay stuck shut. I took the cheaper route than replacing it. I whacked the side of the 756Pro with my hand. The relay opened back up and that was three years ago. The thing is still working fine.

I'm looking for a Drake R4C in excellent condition. If you have one you'd
be willing to part with, please email me at jcamp2@cox.net.

I also have an Alpha 374A HF amplifier for sale. The amplifier is in
excellent condition and is currently in use and performing beautifully.
This is one of the models with bandpass tuning, which basically means you
just select your band and start talking. Asking $1300 or would consider
trade for an Ameritron ALS-600
plus cash. I've acquired an Alpha 374 and the 374A is surplus.

Thanks and 73,
Jeff

# 406. Kenwood TM-261 2m VHF Mobile Transceiver - $100

Newsgroup: rec.radio.amateur.swap
Date: 2003-05-12 04:09:02 UTC
From: RamDog <RamDog@comcast.net>
Message-ID: <yKadnX2F1MwAgyKjXTWcrg@comcast.com>
Source record: 1780

50 watt Kenwood TM-261 2m VHF Mobile Transceiver with Backlit DTMF
microphone.
$100 COD from Salem, OR
blissninny at comcast.net
503-371-3131

Details:

High RF power output
Rugged construction (MIL-STD)
61 multi-function memory channels plus 1 call channel
Memory Name (MN) function with 6-digit alphanumeric display
DTSS selective calling
Multi-scan capability
Dual menu system
Multi-function microphone with backlit keys

High RF power output
The TM-261A puts out an impressive 50 watts. Also has mid- and low-power
settings.

Meets MIL-STD requirements
Strict MIL-STD environmental standards for vibration (MIL-STD 810C) and
physical shock (MIL-STD 810D) are fully complied with.

61 multi-function memory channels plus 1 call channel
For quick access, essential data -- transmit and receive frequencies,
frequency step, tone frequency, etc. -- can be stored in the 62 memory
channels. All channels can store transmit and receive frequencies
independently for odd split repeaters.

Memory Name (MN) function
All 62 channels can be identified alphanumerically (max. 6 characters)
instead of by frequency. This is particularly convenient for repeaters and
club channels. It is also possible to switch to a channel number display.

DTSS selective calling
Built-in DTSS (Dual-Tone Squelch System) allows DTMF access: the squelch is
opened only when a specific 3-digit code has been received. Using the
wildcard asterisk, group calling is also possible.

Multi-scan capability
Choose from several scan modes: full band scan, programmable band scan, and
memory scan with programmable memory channel lock-out. There are also 2 scan
stop modes: TO (time-operated) and CO (carrier-operated).

Dual menu system
Two menu modes -- A and B -- offer full control over such settings as frequency step and the time-out timer, when required.

DTMF memory function
Up to ten 15-digit DTMF codes with ID can be stored for auto-dial and autopatch use. Redial is also provided.

Built-in CTCSS tone encoder and optional decoder
The decoder enables the setting of different tones for transmit and receive.

Backlit DTMF microphone
This multi-function microphone has backlit keys to facilitate operation in low-light situations.

Other Features:
Tone scan
Wireless cloning function
Auto repeater offset
Repeater reverse switch
Lock function
Busy channel lockout
Auto power-off
Time-out timer

Dimensions (W x H x D)
140 x 40 x 160.5 mm (5.51 x 1.57 x 6.31 in.)

I am looking for the ATAS-100 for my FT-100D.

Please let me know your asking price, or items you are
willing to trade for, I have several computer components,
hard drives/monitors/motherboards, Alinco 440 HT, etc.

Remove the nospammmm from my email address to
reply.

Thanks!

# 409. WTB: Icom IC-3AT 220 MHz handheld

Hi,

I'm looking for an Icom IC-3AT 220 MHz handheld. If you have one, please
let me know!

Remove the "nospam" in my email address to reply!

Thanks,

John

I have an Alliance HD73 Rotor for sale. Control unit is in excellent shape as well as motor unit. A bolt broke in one of the half shells that holds the mast (not one of the bolts that goes into the motor unit.) Someone with a drill press could drill it out.

Any reasonable offer will be accepted. Prefer local pick up in North New Jersey or New York since the unit is heavy.

Roland Stiner, NK2U

## 414. WTB: 50A1 tube for receiver. "reasonable" please.

Newsgroup: rec.radio.amateur.swap
Date: 2003-05-13 19:39:10 UTC

Looking (for a friend of course) for a 50A1 "ballast tube" for a multi band tube receiver.

I see net dealers with them with some crazy prices.

If you have one you'd care to part with, I'd like to try and buy it at a reasonable price. Please drop me a reply using the Email address below (cut and paste), not the one that appears in the reply header.

I'd also be willing to trade you for some type of tube you might need/want. I plan on giving the 50A1 away to someone, so even a working used one would work.

I've also read about solid state replacements for the 50A1. If you can provide me a refernce article on the web, I'll just make him one. I hate to reinvent the wheel.

thanks much for reading this

cheers

skipp

skippNOSPAMPLEASE@pilot.ucdavis.edu

Take the NOSPAMPLEASE out to reply, thanks.

## 419. FS Yaesu FT301D & FP301 Power Supply

Newsgroup: rec.radio.amateur.swap
Date: 2003-05-17 13:31:30 UTC
From: Hartley Garshowitz <hushyg@rogers.com>
Message-ID: <3EC639B6.8D9165C@rogers.com>
Source record: 1793

I would like to sell this Yaesu FT301D and FP301 power supply. I bought them from my cousin in 1978 together with his car, before he moved from Canada to the US (the car is long gone), with the intention of getting my licence. That won't happen in this lifetime.

It was briefly hooked up in 1979, and has not been used since. It was top of the line equipment then, but I'm sure new technology exceeds its capabilities.

Any interest? Any offers? It's time to clean out my basement.

Hartley Garshowitz
Toronto

## 431. FS/FT: Kenwood TS-940SAT, Alpha 374A Amplifier

Newsgroup: rec.radio.amateur.swap
Date: 2003-05-23 04:02:26 UTC
From: Jeff Camp <jcamp2@cox.net>
Message-ID: <m3hza.206356$vU3.43614@news1.central.cox.net>
Source record: 1805
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap

I have for sale or trade a Kenwood TS-940SAT HF transceiver in very nice condition. Everything works as it should and the radio gets great signal reports. Comes with a copy of the manual. Asking $795 or will consider trade for items listed below.

Also have an Alpha 374A HF amplifer in excellent condition. This unit has bandpass tuning which essentially means you just set it to the band you want and start talking. Puts out 900-1100 watts in bandpass mode and much more if you tune it manually. Asking $1200 or will consider trade for items listed below.

I'm looking for the following items and would be glad to work out a swap for the 940 and/or 374A plus or minus cash.

Drake R4C
Kenwood TS-950SDX
Ameritron AL-82 or AL-1200
Ameritron ALS-600
Icom 706 MKIIG
UHF repeater
Kenwood TS-850SAT
Swan 600 Twins
Swan 700CX
Drake L4B
Icom IC-910

I can be reached via email at jcamp2@cox.net.

Thanks and 73,
Jeff
N0WJP

## 435. FS: monobanders

Newsgroup: rec.radio.amateur.swap
Date: 2003-05-27 02:41:49 UTC
From: w9gl@yahoo.com
Message-ID: <c66578da.0305261841.61f9603c@posting.google.com>
Source record: 1809

Several monobanders available. They've been stored for about ten
years, guess that means I won't be needing them anymore.
1-HyGain 204 (4 ele 20m)
1-HyGain 155 (5 ele 15m)
1-HyGain 105 (5 ele 10m)
all these have 24 foot booms, stainless hardware. The 15 m had a bent
element, but I may have the replacement parts...it has been so long
that I have forgotten.
1-DX Engineering 5 ele 15m on 38 foot boom. Never put this one up,
though I did assemble it. (long story, we won't get into that)
1-DX Engineering side mount for Rohn 45 tower. A heavy duty
contraption allowing a beam to be side mounted to the tower and
rotated some 300 degrees or so. Angle iron construction.
Maybe more stuff...a free (to antenna buyer) 19 foot heavy pipe
mast...it held all those HyGains through wind, ice storms, typical
Wisconsin weather for a few years.
Stored partially disassembled. I don't especially want to ship them;
pickup preferred. About 50 miles from Madison.
I'll get around to figuring out the prices soon (i.e.: I still need to
see what the going rate is), and am open for offers.
Email will work the best as I seldom check this group.

it's in excellent working condition, with a few scratches
on the heat sink. also got a copy of the instructions manual.
had to replace the master power switch several years ago,
(ouch $30). $375 will get it to your door via insured, usps priority mail.

Do you think you could make your post just a little harder to read???
Good lord buddy - learn a bit about formatting. I was interested until
I almost went blind trying to read this crap. And what's with the
'compare new' ? It AIN'T new, so why would I want to compare
new?

## 478. fs/FT: Kenwood TS-940, Alpha 374A

Newsgroup: rec.radio.amateur.swap
Date: 2003-06-07 03:33:16 UTC
From: Jeff Camp <jcamp2@cox.net>
Message-ID: <02dEa.371926$vU3.62360@news1.central.cox.net>
Source record: 1902
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap

I have for sale or trade a nice Kenwood TS-940SAT HF transceiver. The 940 is a solid state HF transceiver with a built-in AC supply, automatic antenna tuner, and many, many other features. Have original box and a good copy of the manual. Asking $700 plus shipping.

I also have an Alpha 374A HF amplifier in excellent condition. The amplifier puts out 900-1100 watts in bandpass mode and much, much more if you tune it manually. In bandpass mode you just select your band and start tallking. Asking $1150 plus shipping.

I am looking for the following items and would be happy to work out a trade:
Icom 706MKIIG
Drake R4C
Drake L4B
Icom 910H
Swan 600 twins
Ameritron ALS-600
Ameritron AL-1200
MFJ 986 antenna tuner
Kenwood TS-850SAT
UHF repeater

You can contact me via email at jcamp2@cox.net

Thanks and 73,
Jeff

Source record: 1904

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3028167807

Ends Jun-08-03 15:21:47 PDT

I believe this called a FT-171 holder (?) - it looks like a regular FT-243 on steroids. 7026.5 kHz should put it in the usable c.w. portion of the 40 meter band, just high enough in frequency to by used by Generals. It would look very nice in a piece of vintage-style homebrew gear.

Thanks for looking,
Tom - "theponyengine"
N&#65533;JMY - AAR7FV

## 488. Respect For Freebanders

Newsgroup: rec.radio.amateur.swap
Date: 2003-06-10 03:25:39 UTC
From: xganon <remailer@xganon.com>
Message-ID: <7fdc15a21dd3ef5c5dea7eb0c59549ed@xganon.com>
Source record: 1912
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.swap

I am posting here because of some of the nasty things I have read in this group and in QRZ discussions regarding freebanders. We who use the frequencies from 27.405 to 28.000 have more in common with hams than you might think. We are good operators and have knowledge of propagation and skip conditions. We use Yasus, Kenwoods and Icomm radios just like you do, so we know technical issues as well or better. However, the attitude of some hams toward us is rude and condescending. We are treated like 2nd class citizens. This should not be. We have the same rights under the constitution as legal hams do. For those that do not wish to be under Uncle Sam's thumb, freebanding is a viable alternative to getting a ham radio license. What I am saying is that maybe the next time you meet a freebander it might be wise to talk with him before you condemn him.

This article ought to clarify things, as I am the author:
http://sporadic1.tripod.com/page7.html

I am QRT and standing by. (No flames answered. Please reply via email)

The fact of the matter is, regardless of the equipment you use or the
knowledge you claim to possess.... Freebanders are criminals, and are
to be treated as such.

Maybe some of the condemnation is directed at the activity (which
happens to not be legal) instead of the person doing it.

You may be a nice guy, understand radio theory, be a good operator,
etc., but you are still breaking the law.

And if you'd disregard one law, chances are you might just disregard
many. So how do you expect to gain any respect from people when
you openly admit to being a criminal ?

Those frequencies aren't just empty bandwidth. They are allocated to
various services.
Forest ranger comms and such. You might not hear them (they use low
power) but
they certainly hear freebanders screwing up their channels. Also
there's some military
channels in there as well. Can you say "homeland security"? Oh, they
don't do any
classified comms there, but they still do lots of routine unclassified
stuff.

What can you do in the "freeband" that you can't do legally on ten
meters as a properly
licensed ham? And if you get the ham license you can use other bands
like 20 or
40 or 80m when the sunspots are down. Oh, you need to pass a morse code
test,
but that's at 5 words per minute nowadays. It ain't that hard, I did it
and I'm not that
good at brain reflex tasks.

As for being under the government's thumb, the FCC doesn't really bug
most hams
at all. Only if you make a habit of doing annoying illegal things do
they do anything.
Rules about "no business traffic" are really to protect our frequencies
from getting
hijacked by companies looking for comm channels.

>We are good operators and have knowledge of propagation and skip conditions.
>
You'd then know that the "freeband" goes dead between sunspot cycles.
Other HF ham bands
have decent propagation between cycles.

You have the same rights to take the ham radio tests as hams have had.
So study up and
take the damn tests and if you pass you can be legal on the ham bands.

SNIPPED a lot of Rant

## 497. FS: Like New Icom IC-775DSP

Newsgroup: rec.radio.amateur.swap
Date: 2003-06-12 13:34:17 UTC
From: Jim Young <jyoung314@comcast.net>
Message-ID: <22ydnbzWkoTmHHWjXTWcog@comcast.com>
Source record: 1921

FS: Like New Icom IC-775DSP
This radio was a backup to my IC-781 and has had very little use. It looks like a new unit. The serial number is 01637 and it has at least one optional filter and one other optional accessory (the high stability crystal oscillator, I believe). I am asking $1895, shipped in the continental United States. Thanks and 73!

Jim K9RII

## 498. FS: Ten-Tec Model 282 250Hz CW Filter

Newsgroup: rec.radio.amateur.swap
Date: 2003-06-12 13:39:10 UTC
From: K4MT <garyh@bellsouth.net>
Message-ID: <4e%Fa.51158$NI2.24607@fe10.atl2.webusenet.com>
Source record: 1922

I have a spare Ten-Tec Model 282 - 250 Hz CW filter (6.3 Mhz IF) for sale. Works fine as I just tested it in my Delta 580 transceiver. Asking $55.00 plus shipping.

## 499. APRS Setup TM-D700A and GPS II+

Newsgroup: rec.radio.amateur.swap
Date: 2003-06-13 14:58:24 UTC
From: Ed Robbins <segviolate@hotmail.com>
Message-ID: <kEIGa.179403$M01.82993@sccrnsc02>
Source record: 1923

For sale Kenwood TM-D700A and Garmin GPS II+, both less then a month old, both come with boxes, manuals, cables etc... I'll also include a power/data/gps cable that plugs into a lighter, the gps and into the radio for the NMEA output. Pictures available upon request, asking $650 and that includes shipping in the lower 48.

>from 27.405 to 28.000 have more in common with hams than you might think.
>We are good operators and have knowledge of propagation and skip conditions.

Congratulations. Now, how about learning the finer points of operating
according to applicable regulations?

>We use Yasus, Kenwoods and Icomm radios just like you do, so we know technical
>issues as well or better.

But apparently not the proper way to spell "Yaesu" and "Icom"...not
that this is all that relevant to the point you're trying to make.

>However, the attitude of some hams toward us is
>rude and condescending. We are treated like 2nd class citizens.
>This should not be. We have the same rights under the constitution as legal hams do.

Correct. However, it isn't the Constitution that grants hams the
privileges that our licenses grant us. Nowhere in the Constitution nor
any of its Amendments does it mention anything about ham radio.

Notice if you will that I am saying "privileges" rather than "rights"
because I believe there is a difference.

Furthermore, along with rights (and privileges too, for that matter)
come responsibilities, including the responsibility to operate your
equipment in accordance with applicable regulations when you exercise
your privileges to operate that equipment.

In fact, if you are not licensed to operate from 27.405 to 28.000,
then you have NO operating "rights" to be there at all. Thus, you
relegate yourselves to the status of second class citizens by
demonstrating to all who care to observe, that you have no respect for
the law. This is why you get verbally b***h-slapped, not only by hams
but also by law-abiding 11m CB operators, every time you sound off
about operating where you have no business being. We're not trying to
be rude. We're not trying to be condescending. We simply perceive that
you, unlike the majority of us, fail to understand that if we carry
your logic to its fullest exdtent, the result is absolute anarchy. The
rest of your post - and my comments added below - more fully
illustrate my point:

>For those that do not wish to be under Uncle Sam's thumb, freebanding is
>a viable alternative to getting a ham radio license.

For those who do not wish to be under the thumb of the Internal
Revenue Service, robbing banks and liquor stores is a viable
alternative to getting a job and paying income taxes.

> What I am saying is
>that maybe the next time you meet a freebander it might be wise to talk with
>him before you condemn him.

I'm not necessarily condemning you. I am condemning your illegal
activities. I'll leave the business of condemning you to the legal
system if you're ever court - it's their job, not mine.

How do you feel about Tim McVeigh, Jeffrey Dahmer, and John Wayne
Gacy? Most decent people condemn their actions. Perhaps you do as
well...they were all mass murderers. Have you talked with any of them
first before condemning their actions?

Some of the freeband frequencies actually have licensed users to whom
the frequencies are allocated. Here's a question for you: Are you
actually licensed to operate anywhere in the RF spectrum? How would
you like it if the legitimate users of the frequencies in question
here decided to just jump in and use the frequencies you are licensed
on because they felt it to be a viable alternative to getting licenses
for the frequencies allocated to them?

And please, don't give me any of that nonsense about the frequencies
not being used anyway. When you park your car, it's not being
used...how would you like it if I came along and decided to
re-allocate it for my own use, since you aren't using it anyway?

While we're at it, while you're out grocery shopping and your house
isn't being used, I'll just re-allocate your stereo, TV, VCR,
microwave, radio equipment, and any money I find laying around for my
own use as well. After all, you're not using it right now, and it's a
viable alternative to me getting a job and paying taxes and thus being
under Uncle Sam's thumb...so by your own logic, you should have no
complaints if I help myself, right?

Sorry, dude, but you'll have a hard time convincing me you're anything
more than a freeloader who wants to exercise the benefits of living in
a free society without accepting the responsibilities that go with
them. None of us has the Constitutional right to pick and choose which
laws we will obey and which ones we will break...and so just because I
have a license granting me the privilege to drive a car (which is also
not mentioned in the Constitution or any of its Amendments) doesn't
make it okay for me to go screaming through a school zone at a hundred
miles an hour just because I choose not to be under the thumb of the
local legislators who decreed a 15 MPH speed limit there for the sake
of the safety of the kids who attend classes there.

I do agree that the technical proficiency of many freebanders is comparable to even the most competent of hams. However, that in itself will not gain you acceptance by the vast majority of radio hobbyists, any more than the marksmanship skills demonstrated by the Texas Tower Sniper will gain him acceptance from the guys and gals down at the local skeet-shooting club. Having the skills is only half the battle. Now show us that you can apply them properly.

We will be at Ham-Com in Dallas TX (www.ham-com.org) operating 6
meters FM from a PRC-77 and a RACAL TRA-967.

These are man-portable 2 watt units with whip antennas, so this is
mainly for those who will be attending ham-com next weekend (June
20,21,22).

We will be on, in order of preference (to avoid interference),
50.3
50.4
50.5
50.6
52.3
53.0
53.9

These should be accommodating for both military and commercial radios.
If someone shows up with a crystalled radio on another frequency, we
might switch to that one. 51.0 is popular, but it's on the edge of the
DX window and the band may be open.

If you have CTCSS, set it for 150 Hz or we won't be able to hear you
since we are using military radios.

Well I look at the reviews as being (for the most part) real world experiences that have been shared with the community. Sure, someone can pump sunshine re a product and conversely sling horse manure about something else. I look at the overall consensus and make my best assessment from what has been shared already. I am sure 99% of us look at the reviews this way.

Take a look at the Product Review guide lines published on the main Product Reviews page in the managers side bar.

Customer service issues/problems are not reviews of a product (QSL cards). Note however that if a review does review the actual product comments regarding the manufacturer, vendor, etc. are OK. But the review should primarily be of a product.

eHam's Forum has an area "CompanyReviews" that is used for discussing pros/cons of dealing with vendors, manufacturers, etc.

After receiving this email from Phil, my review about Octavia was again
removed.
So.. I read eham.net guidelines, and posted again.
It is very difficult to review a product, if you never received it in the
first place.
Reviews should include from the time you spend your money to the point in
time
where you actually receive the product. Most vendors charge your credit
card
when the item ships, not at the time of purchase. If this was done I would
have
had time to dispute this with my credit card company.

Eham reviews are about as fair and informative as the QST Product Reviews. ANY publication or website that receives advertising $$$ from a vendor is biased regardless of the vendor.....end of story. Plus, Eham will take reviews and post them from every dim-wit that doesnt know a damn thing about radios or electronics.

When's the last time you saw a scathing negative review about a Yaesu, Icom, or Kenwood radio in QST?.....Like, never.

# 512. Re: eham.net reviews..WHAT IS FAIR?

Newsgroup: rec.radio.amateur.swap

WHAT IS FAIR?

If you will look even closer youll find that most of the reviews are
just ramblings by whoever feels like writing about something, and its
strictly thier opinion,(now boys dont get upset, "opinions are
like...well you know what they are like) and rarely based on solid
evidence ( which does not include MFG'rs specs, they rarely indicate
actual operations and are usually 'lab condions' YEAH! " Its very nice
to know what everyone thinks about all the gear,(who do YOU trust?) but
you still have to filter that through a lot of personal opinion and
likes and dislikes. Most of us who buy sell and trade a little, know
that the BEST RADIO is the one you just got!! And the worst radio , is
the one that broke on you, even though it has to happen on new and used
gear alike. If it breaks a lot, thats when it should be "shot at and
hit!" Another thing , and not my favorite for sure, about
Ehum.....they call a guy who buys and sells and trades as part of his
version of the hobby, a dealer and leave you poor suckers to deal with
a one timer who doesnt know a 9 from porcupine, and has no real reason
to treat you right. Bottom line as I see it is...."Its my website and
I set the rules" , thats ok but it doesnt necessarily make a great
website in my opinion. I give radios to starting foreign hams, help
blind and handicapped in this county A LOT, and mostly get grief from
EHAM and some others. WAHHHHHH!!!! So my editorial is through for the
day...EHAM is a GREAT SITE, but no ones perfect, or even close!! 73

Hams seek to learn the law and to use what they have learned and been tested on. "freebanders" ignore the law and choose to look the other way when they blindly stumble across a law that they are in violation of.

Freebanders have a strong need to be noticed - trolling the Ham newsgroups and generating lots of noise provides the same thrill that drives them to exhibit similar behavior on the Ham bands. They know that they are lawbreakers - that is what makes it fun!

These guys have a pathological need to rebel against the establishment - and they need to tell the world about it! "Look at me!", they are yelling - and they need us to listen. If they wanted to be Hams, they would be. They have the technical ability to operate (and even modify) radio equipment, and the inclination to learn how - just like us. For them, however, it's much more fun to annoy others than to join a community. And, just like radio, the Internet provides a place to hide while committing these 'brave' acts of defiance and individualism - have you ever heard one of these guys articulating their views at your local club, or a Hamfest? That would require a journey out of the comfort of the darkness that these folks need to empower them. As well, the possibility of being held accountable for the laws that they wilfully violate is too much for these brave souls to face - I suspect that there are few Nelson Mandelas in the Freebander ranks.

As Hams, the wisest thing that we can do is to not get suckered into flame wars and discussions with these folks - this simply encourages similar behaviour in future. Ignoring them on the newsgroups denies the gratification which they crave. Do the same on the radio - follow standard procedure for handling QRM. When we acknowledge the existence of someone creating QRM, we are creating QRM ourselves - and we encourage the offender to do it again, as the desited result was achieved. When we ignore those offending transmissions, we cause the offender to question whether his equipment is working - did his signal get out there? Did it interfere? Did it disrupt communications? DID ANYONE HEAR ME ?? Maybe - but doubt has been created, the conversation that was supposed to be interrupted continued as if the offender did not exist - and the fun was removed from the act. We can do that here on the newsgroups too by not responding to posts from these folks. Like the tree that falls in the woods with no one around (and hence, makes no sound) - if we all ignore them, then they don't exist. They are there because we acknowledge them, plain and simple. All parasites die when denied a host.

Ignore the QRM, and continue to report all offences to the regulatory and law enforcement authorities. Log them, tape record them, triangulate / locate them, identify them - but do it quietly, and deny them the ear that they so desperately need.

We should be part of the solution, not the problem - that's what being a Ham is all about!

Pat

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3030880923

Made in 1955, by Gamble-Skogmo, Inc. apparently of Chicago (?). Included
in this kit are:

The stranded copper wire for the "flattop" -my guess is about 75 feet
(Instructions say Aluminum, but sure looks Copper to me).
A roll of insulated lead-in wire, probably about the same length.
A pair of porcelain strain insulators.
A pair of "screw eyes" for anchoring the ends.
A brass gizmo for connecting the lead-in to the flat-top.
A pair of porcelain "nail knob" stand-off insulators.
An under-the-window lead-in strip with fahnestock clips at each end.
A beautiful Knox porcelain lightning arrestor with mounting hardware.
A heavy-duty ground clamp for ground-rod or water-pipe.

Just in case it rains the day you get it, you can sit inside and read bits
of the packing material: Chicago Daily Tribune, Thursday, Aug. 18th, 1955.
The Indians lost 9 to 3. Indians? What about the Sox?

Ends Sunday, Jun-22-03 18:43:33 PDT (Monday 01:43:33Z)

Thanks for looking es vy 73,
Tom - "theponyengine"

This is a VS-1 synthesizer for a TS-940S Kenwood radio. It came out of my working radio which I sold to someone who did not want the synthesizer.

For Sale $58.00

Very easy to install. At the back of your manual is instructions on installing this unit. I do not have the 4 screws. They should already be on your radio.

Contact me at my e-mail gary92027@cox.net or

Call me: Gary 760-743-1866 KA6OCA

## 534. WTB: 4-wire tuning encoder for Icom 735

Hi all, Im trying to put an odd step on the UHF side.
I want to use 442.735 to receive and 448.650 for TX
and store this into memory.
Is this possible? I'm not sure how to change the step or
the repeater shift to accomplish this, other than the stock
settings which I can't change. Any clues???
Please e-mail me direct at: mrrusso@optonline.net

THANKS FOR YOUR HELP!!

## 554. fs: BS8 pan-adapter for Kenwood SM220

Newsgroup: rec.radio.amateur.swap
Date: 2003-06-25 18:22:30 UTC
From: Skipp has for sale A BS8 panadapter <nospamhere@yahoo.com>
Message-ID: <bdcp96$fk0$1@woodrow.ucdavis.edu>
Source record: 1878
Cross-posted to: rec.radio.amateur.homebrew,rec.radio.swap,rec.radio.amateur.swap

Hello there,

Thanks for taking a moment to read this post.

I have for sale, an original Kenwood BS8 Pan Adapter Module; works with the SM-220 scope unit.

Comes with the proper cable(s) and works really well, turns out the used unit I bought actually came with one inside... much to the surprise of the previous owner and myself. So I have an extra, of which I bought for almost $200
The Kenwood SM-220 Manual shows how to install the unit, I can also supply a photo copy if asked nicely...

I'm asking $135 or a reasonable offer/trade.

Thanks

# 555. FS or FT: Pro 2005 Scanner, Icom R75 Receiver

Newsgroup: rec.radio.amateur.swap
Date: 2003-06-26 00:21:32 UTC
From: John LeMay <jlemay@njmc.com>
Message-ID: <pan.2003.06.26.00.21.25.566079@njmc.com>
Source record: 1879

I'm looking to move this equipment to fund the purchase of a couple new 2M/440 mobile rigs.

Pro-2005 - I purchased this one new, physically it's in great shape. I'll include an extra rubber keypad (these need to be replaced every few years) and an original whip antenna (I have a few spare parts for these scanners around). Bright display, I just replaced that about 2 years ago. Scans at 13/26 cps (instead of the original 8/16) since I swapped the original clock oscillator with a 10 MHz crystal when I bought the scanner - or shortly thereafter.

Icom R75 - Just over a year old now, includes the DSP option. I probably have no more than 20 hours on this rig. Used it side by side with my Kenwood R-5000. The R75 does a great job. Covers up to 60 MHz as well so you get some VHF-Lo and the 6M bands.

Please let me know if you have a dual band mobile rig (not an HT) for trade, or make a cash offer.

Thanks!

Source record: 1880

TM-D700 & TH-D7A(G)

I have the listed rigs in excellent condition. The H/T comes with the PB-38 & PB-39 batteries. Both radios will be shipped in original boxes with original manuals. Looking to trade both for a Drake R8B in as new condition, or HF rig (i.e. FT-897, Icom 7060MKIIG, IC-746...no QRP please) general coverage transceiver. Also have an Alpha-Delta VRC active speaker (in as new condition)that I can throw into the trade if necessary.

Additionally, will sell both for $825 + shipping

Please e-mail off list if interested & thank you.

For Sale: Kenwood UT-50S 6M module for TM-741 or TM-742 mobile radio

Kenwood 6 meter module for a Kenwood TM-741 or TM-742 mobile radio.
This unit will turn your radio into a TRI-BAND transceiver.

This unit has been tested in a TM-742 radio. It transmitted fine,
but the receive sensitivity was low. A friend of mine who is
very knowledgeable on ham radio repair suspects that there are
diodes on the input section of the unit that may have gone bad.
I was going to have this unit repaired, but I got a good deal
on a different unit, so have decided to sell it. Fix it and save
a lot of money.

Module and original box only.

I can email pictures if desired.

$195.00 plus shipping.

Contact me by email at: tr93940NOSPAM@hotmail.com
(remove the NOSPAM from the email address)

1: Yaesu FT-50RD, with the FTT-12 digital keypad, 2 MAHA 9.6 Volt 1000mAh batteries (1 seems to be getting soft, other one just fine), FBA-15 battery case, CD-15 base charger, LCC10-S Swivel leather case (Motorola style), Pryme Speaker mic, manual. Radio is in excellent shape cosmetically, and operationally. Will take $160 shipped for it CONUS.

2: Yaesu VX-150. very lightly used. Has 10 minutes trasmit time on it at most. Used mostly to listen to the local police. Have a Pryme Speaker mic, plus leather case, original charger, manual. Perfect shape, still have the plastic tape on the display. $130 shipped CONUS.

If you want both, we'll work out a deal.

# 563. WTB: 23 cm Rig

Newsgroup: rec.radio.amateur.swap
Date: 2003-06-28 09:52:44 UTC
From: IanCT <IanCThurston@nospam.hotmail.com>
Message-ID: <MzdLa.90$La7.5@newssvr19.news.prodigy.com>
Source record: 1887

Looking for a 23 CM mobile rig. Doesn't have to be
monoband, can be dual 70cm/23cm if you have one.

I was looking particularly for a Kenwood TM-541
or even a TM-833s (I don't know if those were even
sold in the US, or even at all, I just came across the picture
at http://www.rigpix.com/kenwood/tm833s.htm)

or even a Yaesu FT-6200 would be nice.

Please let me know rig model, condition, must be
fully operational (100%), few scratches ok.
Prefer nice cosmetics. Don't we all? :) Doesn't
have to be perfect but will consider all. Pics would
be great if possible.

Thanks!

## 565. FA: Heathkit HX-20 Ends in hour and a half.

Newsgroup: rec.radio.amateur.swap
Date: 2003-06-28 13:20:41 UTC
From: Tom - N&#65533;JMY - AAR7FV <tfarl@mchsi.com>
Message-ID: <JCgLa.41043$R73.6696@sccrnsc04>
Source record: 1889

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3031788249

Ends Jun-28-03 07:54:08 PDT (1454.08 GMT)

This Heathkit HX-20 mobile SSB transmitter was apparently a restoration project that was never finished. It's got a decent repaint job, not mint, and the dial stringing is intact. No visible evidence of burned components underneath. All linkages appear to be intact. It's missing a knob, the feet, and some cabinet screws. Final tube tests strong.

Thanks for looking,
Tom
N&#65533;JMY - AAR7FV

## 566. FS Icom IC-228H 2 Meter Transceiver

Newsgroup: rec.radio.amateur.swap
Date: 2003-06-28 18:33:04 UTC
From: Charles Hugg <hug-a-bug1@cox.net>
Message-ID: <AblLa.528179$vU3.252251@news1.central.cox.net>
Source record: 1890

I have for sale an Icom IC-228H 2 meter Transceiver. This is the high power one. It comes with the original mic, power cord, mobile mount, and a copy of the manual. It has has the Tone Board installed. Front Panel is great. All dial lights work. The top and bottom cabinet has some scratches but no dents. Works great and I get very good audio reports. Price is $95. Thanks, Charlie Hugg, K5MBX

Source record: 1893

Hello and thanks for looking - I have a Kenwood DSP-100 Digital Signal Processing unit for sale. Was used with my TS-450S which I sold awhile ago, thus I can't verify its current operation and must be sold "as is". But it was working fine last time I used it. This unit can also be used for the TS-850S. From a caring and non-smoking environment. Comes with original manuals (sorry, I don't have the original box or original accessories).

Asking $650 or best offer, plus shipping.

Regards,

Craig

## 575. FS Drake RV-75 Digital VFO

Newsgroup: rec.radio.amateur.swap
Date: 2003-07-02 20:55:24 UTC
From: Charles Hugg <hug-a-bug1@cox.net>
Message-ID: <0FHMa.562188$vU3.80652@news1.central.cox.net>
Source record: 1899

I have for sale a very nice Drake RV-75 digital VFO. This one has been gone through by The Drake Man, John Kriner, in May of 2000. At that time it was completel aligned and checked out. It has been used little since then. It comes with the original manual and cables including the RIT cable. I also have all of the paper work on the work done by The Man. This VFO works and looks great. Price is $775. Thanks, Charlie Hugg, K5MBX

## 576. MF Receiver Wanted

Newsgroup: rec.radio.amateur.swap
Date: 2003-07-03 01:48:46 UTC
From: Phil Kane <Phil.Kane@nov.shmovz.ka.pop>
Message-ID: <cuvyxnansvbet.hhf5xmi.pminews@netnews.comcast.net>
Source record: 1900

I am looking for a solid-state receiver that will tune around 500 kHz CW and FSK (AFSK output). An old receiver that is "sour" on HF but is OK on MF will do just fine. 12V DC and digital tuning preferred.

Date: 2003-07-05 09:07:05 UTC
From: Colin Guillas <rdarvinder@hotmail.com>
Message-ID: <ZywNa.67264$x4o.9707@news04.bloor.is.net.cable.rogers.com>
Source record: 1706

I have a Kenwood TM-231A 2-meter band (144-148 MHz) transceiver.

50 watts output, scalable down to 10 and 5. Expanded receive frequency from 137-174. Has PL/CTCSS built in for repeater access. DTMF keypad.

This unit served me quite well, but I no longer have a need for it. Please make an offer. Buyer pays shipping, but item is available for pickup in Toronto, Canada.

## 598. FS Yaesu SP-5/DSP-59Y

Newsgroup: rec.radio.amateur.swap
Date: 2003-07-08 13:56:01 UTC
From: Charlie Hugg <hug-a-bug1@cox.net>
Message-ID: <R3AOa.525627$3n5.18697@news2.central.cox.net>
Source record: 1722

I have for sale a nice Yaesu SP-5 Speaker with the built in Timewave DSP-59Y digital noise reduction unit. Included is the notebook manual for the DSP-59Y, the original box for the SP-5, and the 12 volt Power Cube for the DSP. This unit looks and works great. There are two digits out on the DSP display. When you dial up 2400kHzs for example it show 24. Other than that it is perfect. Price is $350 shipped in lower 48. Thanks, Charlie Hugg, K5MBX

# 599. FS: ProComm/Lakeview Dipole Antenna System

Newsgroup: rec.radio.amateur.swap
Date: 2003-07-08 19:43:14 UTC
From: wa8mea@hotmail.com
Message-ID: <8a260fb2.0307081143.1619479@posting.google.com>
Source record: 1723

Hello:

I have FOR SALE: two BRAND NEW, NEVER OPENED ProComm 40 meter mobile antennas. (These are VERY similar to the Lakeview HamSticks.) Also...a BRAND NEW, NEVER USED Lakeview Dipole Mount. Together, these make a portable dipole antenna system. You can mount either vertical or horizontal. Needless to say, you can order more antennas from ProComm or Lakeview to get you on other bands. I'll even toss in some coax. I've been bitten by the 2 meter sideband bug, and am just not up to any HF operation right now. $39 takes it off my hands. I'll even pay for the shipping. 73 from Bill, WA8MEA

For sale a Heil Pro-Set Double headphones version with HC-4 DX element and Yaesu 8 pin adapter cable.

This Pro-Set works great except you have to have both the mic and headphones plugged in for the mic to work.

Apparently the ground wire for the mic in broken in the cable somewhere and the ground for the headphones works as

a substitue if plugged in. Price is $75 shipped in lower 48. Thanks, Charlie Hugg, K5MBX

re: Want EF Johnson Two-Way Radio Mic for spare(s)

Hello there,
-
I'm looking for at least one or more spare mics that work on the common EF Johnson two-way radios. We have a 483MHz band, Johnson Radio in service at a local Vol Fire Dept. I donated my last spare mic yesterday... let's just say they are a bit rough on them.
-
The older EF Johnson 8615 and similar type 800/900 trunking radio mics swap right in to this rig. It's uses the now standard modular plug/jack setup. Your old unused trunking radio seems to be a good source of mics for this vintage 483Mhz unit.

If you have a dead or spare radio around with a possible working mic, I'd love to try and beg/buy/swap you out of it. I'll pay a reasonable price for a mic and or trade you for some other mic I might have. I can also trade you for some other item or service I might have to offer.

Thank you for reading this post.
Please take the NOSPAMPLEASE out of my Email header and drop me a reply when you can.

cheers
skipp

skippNOSPAMPLEASE@pilot.ucdavis.edu

I have a HP 410B VTVM. No, it does not have the tube in the AC probe. I wish it did! It is in good condition.

Tubes light up and seems to work fine. Probes/wires are showing their age, plastic from ohms probe gone. I hate to leave it laying around. I don't use it. $20 plus shipping. USPS from 62521. I'll have to weigh it. It is not light!

Email me please. If I don't get a good offer I'm going to throw it away!

Dan, KB9JLO

Kenwood TV-502 2 Meter Transverter.

Very rare and collectible. Works with Kenwood TS-520 and TS-820 series of HF transceivers (please check your manual to be sure).

In good physical condition. Some minor scratches and marks. No dents or dings. From a non-smoking environment. Comes with like-new original manual and schematic.

Comes with very rare, hard to find, original, multi-pin connector cable.

Rare, vintage, collectible and very sharp looking Kenwood QR-666
Receiver.

Very nice ham radio and general coverage receiver. Covers 10, 15, 20,
40, and 80 meter ham bands. On 6 bands, covers 11, 13, 16, 19, 25, 31,
41, 49, 60, 75 Meters short wave. Solid state. Works on both A.C. and
D.C. power. Even has a battery compartment and whip antenna for
portable use. Really nice audio.

# 631. FA: KENWOOD R-2000 GENERAL COVERAGE RECEIVER

This phenomenal receiver is jam-packed with features ï¿½ too many to list them all. Covers 150 kHz to 30 MHz and all modes: SSB, CW, AM and FM. Digital 50 Hz step VFOs with excellent stability. Famous for its excellent receiver sensitivity and warm audio quality. Multiple tuning speeds. Frequency lock switch. Multiple memories store Frequency, band and mode data. Lithium battery backup. Memory scan and programmable band scan. Dual 24 hour clocks with timers (e.g. one for local, one for GMT). Three BUILT-IN IF filters. Narrow and wide. Squelch, AGC, RF attenuator and noise blanker. Handy record output on front panel. Remote terminal connector on back. Multiple antenna inputs. Foldout foot stand.

Included is the original 80 page, multi-lingual manual and power cord. Will also include original color sales brochure.

# 632. FA: KENWOOD TS-60S 6 METER TRANSCEIVER

Rare Kenwood TS-60S 6 Meter Amateur Transceiver.

This phenomenal transceiver is jam-packed with features ï¿½ too many to list them all. Covers the 50-54 MHz, 6 meter band in SSB,/AM,/CW (double conversion), FM (triple conversion) and digital modes. Can receive 40-60 MHz. Direct digital synthesizer with fuzzy logic control. 100 memory channels. IF shift. Noise blanker. Dual VFOs. Output is nominal 90 watts. Extremely sensitive receiver (e.g. 0.16 uV or less on SSB). Very compact ï¿½ excellent for mobile use. Get mobile on the hot 6M band now or use it as a base station.

In excellent, like-new condition. Very few scratches if any. Very few operating hours ï¿½ mostly in storage. Never used mobile. From a non-smoking environment. You will not likely find a nicer one than this.

Included is the Kenwood mobile microphone, mobile bracket with unopened screw set, manual (sorry, can't find original but will include a photocopy and a PDF softcopy manual for you to have on-line and print out) and, unused warranty card, and original box.

# 633. FA: KENWOOD DG-5 DIGITAL DISPLAY / COUNTER

Kenwood DG-5 Digital Display and Frequency Counter.

Designed to work with the Kenwood TS-520 series of radios (check your radio manual to be sure). Can also be used as a frequency counter for any radio.

In good physical condition. Was working well when last used before stored. Some scratches, small marks and normal wear. From a non-smoking environment. Comes with photocopy of manual, cables, and schematic.

# 634. FA: MFJ 945-E MOBILE 300 WATT ANTENNA TUNER (MUST SEE!)

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3035677170&category=4671&rd=1

MFJ 945-E Mobile Antenna Tuner.

Covers 1.8 to 60 MHz and will match virtually any transmitter to almost any mobile whip, dipole, inverted-vee, vertical, beam, random wire or other antenna. Has 300-watt and 30-watt settings. Has a cross-needle meter so that forward power, reflected power, and SWR can all be read simultaneously ï¿½ very handy feature. Meter lamp can be powered by 12 volts DC.

I found this mobile antenna tuner worked exceptionally well with my mobile HF transceiver, although no doubt it will do famously with just about any rig. Very small yet very functional. Excellent for backpacking, camping, boating, RVing, flying or any other mobile environment when space and weight counts, but when performance is still important. Can also be used in the shack.

In excellent, like-new physical shape. No noted scratches, dings or dents. Very clean. Comes from a non-smoking environment. Comes with like-new original manual and schematic, and original box.

# 635. FA: WORLD TIME & "TOUCH" CLOCK FOR HAM RADIO (RARE! MUST SEE!)

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3035678013&category=4671&rd=1

Very Rare Thermor World Time & Touch Alarm Clock

This is a perfect clock for amateur radio (ham radio)! Has more features than the Kenwood or Yaesu clocks. Perfect for contesting and dx-ing. Great conversation piece for your shack. Made in Japan. Seems to keep very good time.

Very large LCD time area, PLUS a touch pad covering 27 world time zones and over 30 notable, major world cities to quickly help you find the time zone you want. Displays the Day, Date, Time and Zone. Also has an alarm feature to wake you up in the wee hours of contests!

Just program in your local time and the year, decide on 12 or 24 hour time display and then you can instantly find out what time it is in whatever time zone you want. Has quick adjustment button for daylight savings. Very easy and intuitive to use.

In very good physical shape. Several small scratches on black body. LCD appears to be perfect. Everything works. Batteries will be removed for shipping. Comes from a non-smoking environment.

# 636. FA: KENWOOD TS-520SE (SPECIAL EDITION) HF RADIO

Newsgroup: rec.radio.amateur.swap
Date: 2003-07-18 10:46:35 UTC

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3035673043&category=40067&rd=1

Kenwood TS-520SE (Special Edition) HF Radio.

Covers 160-10 (No WARC bands) and WWV. 200 watts PEP SSB. 160 watts DC for CW. Runs on 120v/220v. Solid state electronics except for driver and finals. Famous for its receiver sensitivity and warm audio quality. Was working perfectly when too high SWR caused the finals to pop. Receiver still works but does seem to have a slight warble. I put in a new set of 6146W finals but have not repaired the radio yet. So please bid accordingly. I will throw in a service manual so you can get it back up to 100% real quick.

In very nice physical shape, with only very minor scratching. Marked with security identification in inconspicuous areas. From a non-smoking environment. Very clean. Nice radio overall. I always received excellent reports with this radio.

I will include the optional and very hard to find CW filter, a hand microphone and the original manual and schematics, and an original TS-520S service manual. Finals will be carefully and individually packed.

# 637. FA: KENWOOD VFO-520 REMOTE VFO

Newsgroup: rec.radio.amateur.swap
Date: 2003-07-18 10:48:32 UTC

Source record: 1662

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3035666085&category=40062&rd=1

Kenwood AT-200 Antenna Tuner.

Covers 6 amateur bands from 1.8 to 29.7 MHz, 200 watts. Switchable 20/200 watts measurement on in-line watt meter. 2 coaxial inputs, 1 long-wire input and 1 dummy load connector.

Although designed to match Kenwood TS-520 and TS-820 series of HF transceivers, should work with virtually any rig.

In good physical condition. Was working well when last used before stored. Clear and bright dial and lettering. Some scratches and one lighter area where sticker used to be. Marked with security identification in inconspicuous areas. From a non-smoking environment. Comes with original manual and schematic. Also comes with excellent condition original box.

## 639. WTB 60-70' HEAVY DUTY self-supporting (fixed, not crank-up) tower

Source record: 1677

I have for sale a nice Drake TR7 Transceiver and PS7 Power Supply. The TR-7 is a late one, SN 9283. It is loaded with all filters including the wide and narrow SSB filters, the CW filter and the hard to find AM filter. It has the non sticky cabinet which is very clean. This transceiver has been completely gone through in March of 2002 by John Kriner, The Man Electronics. He installed the latest mods including the Static Discharge mod and the mod that enables transmit on all bands including the WARC and 60 meter frequencies. He installed new bluing for the meter and PTO and other parts necessary to bring the rig up to 100%. He also performed a complete alignment. Documentation of this work in included. The PS7 works great. It has a small light installed on the front panel that glows red when the PS is on. Fans are installed on both the radio and the ps. This transceiver is equivalent to a TR7A except for the noise blanker. Original Manuals are included. Price is $675. Thanks, Charlie Hugg, K5MBX

I have for sale a nice Drake TR7 Transceiver and PS7 Power Supply. The TR-7 is a late one, SN 9283. It is loaded with all filters including the wide and narrow SSB filters, the CW filter and the hard to find AM filter. It has the non sticky cabinet which is very clean. This transceiver has been completely gone through in March of 2002 by John Kriner, The Man Electronics. He installed the latest mods including the Static Discharge mod and the mod that enables transmit on all bands including the WARC and 60 meter frequencies. He installed new bluing for the meter and PTO and other parts necessary to bring the rig up to 100%. He also performed a complete alignment. Documentation of this work in included. The PS7 works great. It has a small light installed on the front panel that glows red when the PS is on. Fans are installed on both the radio and the ps. This is a really nice, clean
transceiver. It is equivalent to a TR7A except for no noise blanker. Original Manuals
are included. Price $595. Thanks, Charlie Hugg, K5MBX

# 662. WTB 2KVA /3KVA isolation transformer -Dallas TX

Newsgroup: rec.radio.amateur.swap
Date: 2003-07-29 22:56:55 UTC
From: opcom <nounwantedmail_eccm@swbell.net>
Message-ID: <3F271744.539201D5@swbell.net>
Source record: 1686
Cross-posted to: rec.radio.amateur.boatanchors,alt.ham-radio.marketplace,rec.audio.tubes,rec.ham-radio.swap,rec.radio.amateur.swap,rec.radio.swap

I am looking for a 120V to 120V isolation transformer, or a dual voltage unit, does not matter as long as it will handle at least 2KVA and as much as 3.5KVA and do 120 in 120 out, 60 Hz.

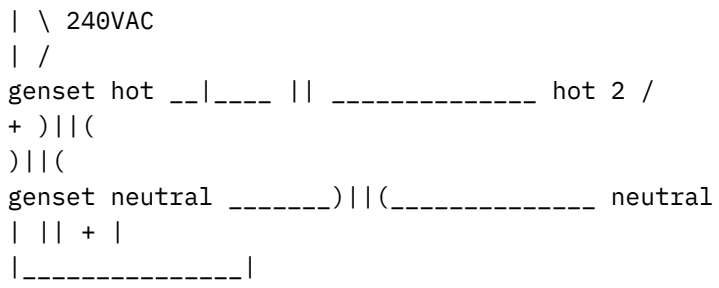
Proposed use is to connect to a 120VAC gasoline driven generator set, and thereby obtain 240VAC by 'stacking' the isolated 120VAC under the generator's 120VAC.

I have also been told that a 120 to 240 VAC center tapped transformer would do the job.

If you think you have something suitable to sell reasonably, and are within perhaps 100 miles of Dallas Texas, please let me know. hi-resolution images are welcome.

"best viewed with 'courier new' font"

hookup for 120V-120V isolation transformer



I have posted to several groups, and can't always check all of them, so please reply to me.

-- Be sure to take away the "nounwantedemail" part of the email address, to reply to me please.

Hi,

Does anybody have a spare Japan Radio Company NVA-92 speaker that
they would like to sell. I recently acquired a NRD-92 receiver but it
didn't come with the speaker.

BTW: Any info or experiences with this radio would be appreciated
also.

Best regards,
Mike

Wouldn't it be a lot easier just to modify the regulator so the field coil
of the generator is twice as high, rather than dicking around with stepping
up the stuff coming off the armature? Be a lot easier just to start out with
the higher voltage to begin with.

I ran a 1011-C for years on 10 meters with absolutely no drifting problems. It was the CB'ers that had the drifting problem because they wanted to power up the radio and talk 1.5 minutes later without letting the radio thermally stabilize.

The secret to the 1011-C(D) was that one had to keep the radio powered up constantly. Mine stayed on for 2 years straight.

In reality, the actual drift from cold start to full warmup was not bad.

There were a number of us adding special reverse temp caps which kept the
drift within 1khz, not too bad.

It is/was an Amateur Radio with CB band receive capacity.

KLM 70 WATT 2 METER LINEAR AMPLIFIER
This is a KLM 2 meter linear amplifier in great condition . It takes
10 watts in (5-15 input) gives you approximately 70 watts out!

I tested this amp last night and it was working perfectly. I used it
for several years on an occassional basis but I now have a 55 watt rig
in the shack and am getting a 100 watt satellite rig so I can't use it
any longer.

Here is your chance to get a nice amplifier for your mobile or base
station. 8 amps 12V DC 6.5ï¿½ X 10ï¿½ X 2ï¿½ simple "IN/OUT" operation.

Wt. 5 Pounds from 97035 Zip Code

Will accept MO or Paypal. Would reluctantly accept personal check with
10 day delay on shipping.

Paypal preferred.

## 694. Newbie in need of first set!

Newsgroup: rec.radio.amateur.swap
Date: 2003-08-11 09:06:40 UTC
From: En.TAKETHISOUT.ginuitastic@Gee-Enginuity.com
Message-ID: <2f986907.0308110106.5583ad77@posting.google.com>
Source record: 1568
Cross-posted to: rec.ham-radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.swap,rec.radio.amateur

I'm taking my Technician-class exam soon, and am going to be needing a radio.
I have very little money available to invest in this, so I was wondering if somebody had one they didn't need and could sell for cheap.
A simple 2-meter transceiver will work fine for me; I've heard it's a popular band. However, a multiband one would be nice...
I've only got about $50 max to spend here, maybe a tiny bit more. I'd be willing to build or scrounge up some pieces, e.g. speaker box, microphone, antenna, cables, etc. so if it's missing a few accessories, that's OK.
Can someone help me out?

Thanks!

I have a mint BC780XLT with external speaker, software and cable for sale. Must sell ASAP. I have all original packaging and hardware. Photos upon request. Shipping will be with USPS priority mail.

## 698. For Swap >> Bencher BY-1 for Straight key

Newsgroup: rec.radio.amateur.swap
Date: 2003-08-12 13:51:03 UTC
From: John Schneider <thecop@optonline.net>
Message-ID: <bh6_a.48135$_R5.16055920@news4.srv.hcvlny.cv.net>
Source record: 1572

I have a Bencher BY-1 in excellent condition (the "Bencher" sticker looks a little worn) that I recently swapped for and I don't use. I am trying to get back into CW and I think I would be better off jumping back in with a straight key.... SO

The BY-1 is not wired, although I have the adjustment wrench and phono plug for it. I do not have the original box nor any written material.

If you have a Good straight key in Good condition that you would like to trade, please contact me off list.

Thank you.

I have a SignaLink SL-1 for sale that has only been used to decode, never transmit. It is in excellent condition and comes with an un-terminated connector (RJ45 on one end, open on the other), jumper wires, the original manual and original box.

Asking $30.00, you ship.

Please contact me off list if interested.

Come on over to the Gainesville Texas hamfest this saturday! Flea market opens for early set-up at 5am saturday morning and general public is in at 7am!
All you radio operators in north Texas and Southern Oklahoma load up all your unused radio gear! There will be indoor tables for $10.00 and outdoor tailgating will be a mere $6.00
The location is the Gainesville civiv center which it located right off of I-35 at the California Street exit on the west side of I-35 directly behind the Taco Bell.
Talk in is on 147.340 or 442.775.
Let's make this a great event! COME ON DOWN!

## 726. 40 Foot Irrigation Tubing - FREE

Newsgroup: rec.radio.amateur.swap
Date: 2003-08-22 19:21:31 UTC
From: kelly@dvol.com
Message-ID: <d22b54c3.0308221121.4e79306f@posting.google.com>
Source record: 1600

I have two unused forty foot lengths of aluminum irrigation tubing I need to unload. One is 4" in diameter and the other is 3" in diameter. Wall thickneses are around 0.060". A number of years ago I built several fullsize 40M yagis for fellow club members and I used this tubing for the booms, etc. I've been storing these "leftover" tubes ever since but now I have to either find a home for them or scrap them. I'll give them away gratis to anyone who will pick them up. The 4" tube would make a nice light-duty easy-up guyed tower for instance. The location is Clifton Heights PA in the southeastern suburbs of Philadelphia. E-mail to w3rv <kelly@dvol.com>

My first radio as a kid in the mid-1960s was one my father bought for me -- a Lafayette Explor-Air kit radio. He built it, and I used it well. It was a three-tube regenerative unit for AM and three SW bands. It was Lafayette model KT-135, and it looked like this: http://hometown.aol.com/kc0imn/explorair.jpg

Osterman prices it $25-35 (Shortwave Receivers Past & Present, p. 255). There's another pic there as well for those who have the book.

I would very much like to acquire one unit, working if possible (although I would be happy to acquire one even if not), to present to my father at an anniversary event in December 2003. I will pay $100 plus shipping to anyone who has one they're willing to unload.

Thanks very much!

I figured you left a number out.... just didn't really know what the number was. Your figure, $265, is the same price Gigaparts is selling them ..... you may pay some shipping, but you get a warranty.

Hi all I am after some parts for the Icom M-800 HF Marine Radio

I need a remote controller unit with all the leads and I need another set of connector leads and a mic Oh and the proper DC Leads :0)

does any one out there have any of these parts or any contacts for these parts ????

I have two Radio bodies and one controller but no connector leads or mics ..

The controller part number is EX-803 Remote Controller
DC Power cable for Controller 12v-1 amp OPC-089A
Interface Cable for Controller OPC-172A

Main Unit Power Cable 12v-30 amps OPC-077

Also is there a mod available to get general coverage TX ???

Please feel free to reply to my email.

maleaton@bigpond.net.au

My Kindest Regards to the Group.

I have FS a very nice Yaesu FRG-7000 Communications Receiver. This receiver sold for around $600 when new and was the upgrade to the FRG7. It has a digital frequency readout and a digital 24 Hour clock. It works and looks great. It is very stable and receives SSB exceptional well. Price is $275. Thanks, Charlie Hugg, K5MBX

I am staring as I type, at the Heath GR-54 my late brother and I built together while in high school in the 60's. We passed it back and forth for nearly 40 years, and I'm glad it was in my possession when he passed away in '94.

jak

## 760. FS: Collins 51J-2 Receiver

Newsgroup: rec.radio.amateur.swap
Date: 2003-08-29 03:02:40 UTC
From: Michael <michaelt@flash.net>
Message-ID: <knz3b.2338$xR4.1633@newssvr31.news.prodigy.com>
Source record: 1534
Cross-posted to: alt.ham-radio.marketplace,rec.ham-radio.swap,rec.radio.amateur.boatanchors,rec.radio.amateur.equipment,rec.radio.amateur.swap

I have for sale a very nice condition 51J-2 receiver. The front panel is cosmetically about a 9 of 10 and not a repaint. The receiver has the correct band change knob and meter but no top cover. The receiver has the Lankford product detector mod and performs GREAT. Pictures available to interested buyer. $450 plus shipping from 76001.

# 761. Re: WTB: National NC-183 - dead or alive

Source record: 1535

> The Ham Station in Evensville, Indiana has the NC-183-D for sale in
> their used section. $100 or best offer.

I would be leery of that one. They have a National NC98 further down in the listings with its matching speaker for $250 (and that is WAY too much). The point is that the 183D might be a basket case they are trying to get rid of and will accept a below maket price for it. If the 183d was working properly or was restorable, they would be asking over $200 for it without the speaker. Matter of fact, the more I look at their 18d3D, the more it looks like a parts set.
Just an opinion.....
rgds,
Mark S.

## 762. FS: ICOM IC-R7100 Scanner Wideband Radio

Newsgroup: rec.radio.amateur.swap
Date: 2003-08-29 21:00:49 UTC
From: bgalebuddy@lycos.com

Cross-posted to: rec.radio.scanner,rec.radio.shortwave,rec.radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.swap

This ICOM IC-7100 scanner is in mint condition, perfect working order, no cosmetic blemishes. It has many powerful features and can be controlled very effectively through a PC with the addition of the CT-17 Serial Interface, which I also have listed for sale. The unit comes with power cord and original manual.

Ebay auction 3044088672, see http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3044088672.

## 763. FS: ICOM SP-20 External Speaker with 4 Filters

Newsgroup: rec.radio.amateur.swap
Date: 2003-08-29 21:06:52 UTC
From: bgalebuddy@lycos.com
Message-ID: <b8cd99e.0308291306.53adc36f@posting.google.com>
Source record: 1537
Cross-posted to: rec.radio.scanner,rec.radio.shortwave,rec.radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.swap

This ICOM SP-20 speaker is in mint condition, perfect working order, with virtually no scratches or cosmetic blemishes.

The ICOM SP-20 is designed for use with a wide variety of communication equipment. It is equipped with four separate audio network filters for maximum control of the audio characteristics of received signals. It also features two audio input jacks (3.5 mm mini jack). Input A or B may be selected from a switch on the front of the speaker. There is also a Speaker On/Off switch and a 1/4 inch headphone jack on the front panel.

Ebay auction 3043932162, see http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3043932162.

## 764. FS: ICOM CT-17 CI-V Serial Interface - Level Converter

Newsgroup: rec.radio.amateur.swap
Date: 2003-08-29 21:13:13 UTC
From: bgalebuddy@lycos.com
Message-ID: <b8cd99e.0308291313.1c01e85b@posting.google.com>
Source record: 1538
Cross-posted to: rec.radio.scanner,rec.radio.shortwave,rec.radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.swap

One CT-17 connected to a standard RS-232c PC connection port can simultaneously control four different receivers/transceivers from a single PC.

This CT-17 is in mint condition. I have included in the sale the power supply and a serial interface cable. Both of these items did not come in the original package from ICOM, for some unknown reason.

Ebay auction 3043954021, see http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3043954021.

Sell it on eBay and get $250.00 to $280.00 for it but don't take anything
less then $250.00 if you have the programing cable and software for it.

August 2003

Dear Amateur Radio Club Members,

As summer fades and we anticipate a return to the rigors of fall, you will be reinvigorating Amateur Radio club operations in your communities. But before you club launches its activities, I hope you can take a moment at your next meeting and consider a disturbing and critical topic - Broadband over Power Lines (BPL).

BPL is a devastating threat to the Amateur Radio spectrum - especially the HF bands. There has been a lot of publicity on this issue - articles on the ARRL website (www.arrl.org/bpl <http://www.arrl.org/bpl>) and other ham radio sites. Your ARRL is at the forefront of the campaign to defeat BPL and will continue to work tirelessly to protect your Amateur Radio bands. And you can help.

This summer individual hams - and clubs - have responded generously to fund ARRL's efforts to fight BPL, and have filed comments to the FCC. But we still need to raise an additional $55,000 to fund the field measurements and document filings necessary to defeat this threat. We're all in this effort together, so I hope your club will jump on the bandwagon and support the campaign financially. We've received club contributions ranging from $50 to $2000. If your organization has already made a donation, thank you.

And if your club is considering a contribution, I hope you'll do so right away. With a contribution of $100, $250, $500 or more, your club can join the roster of clubs that are joining the effort. Your commitment will make a tremendous difference. And we'll put a list of contributing clubs on the ARRL website this fall as our way of saying thank you.

If you need more information on BPL for your club, go to the ARRL website (www.arrl.org/BPL <http://www.arrl.org/BPL>) for the full story, including copies of the two FCC filings and a video that graphically demonstrates the interference radio amateurs would experience from BPL. The video can be downloaded and played at your next club meeting, and there's a PowerPoint presentation you can use. Just follow the link above to an "Understanding the NOI" page and a resource page where you'll find the presentation.

ARRL President Jim Haynie calls BPL the biggest threat to Amateur Radio in decades - and hams have lent their voices to the cause. If BPL becomes a reality, many Amateur Radio activities, like Field Day, will be meaningless. Your club's support with a generous financial contribution now will help fund this effort.

Thank you for considering this request. Contributions can be made on-line at www.arrl.org <http://www.arrl.org>, or by mail to BPL Special Spectrum Defense Campaign, ARRL, 225 Main Street, Newington CT 06111.

73,
Mary M. Hobart, K1MMH
Chief Development Officer

## 778. FS>> Complete FT-847 Package

Source record: 1613
Cross-posted to: rec.radio.swap,rec.ham-radio.swap,rec.radio.amateur.swap

It's been my experience that used transceivers which are still in production maintain a high percentage of their selling price, and then only begin to fall after the model is discontinued. If you want a current model, and the G707A is a nice radio, pay the few extra dollars and get a new one,in the box, with a warranty. You sound like the type of guy who wants to buy a top quality rig at bottom dollar, and I can't fault you for it, but buying a low priced current model usually invites problems from someone who mistreated it or powered it once from 240 volts.

## 791. Mobile HF antennas

Newsgroup: rec.radio.amateur.swap
Date: 2003-09-08 18:28:59 UTC
From: Jerry <joxendi@bellsouth.net>
Message-ID: <oT37b.248$_u1.140@bignews6.bellsouth.net>
Source record: 1615

I have not posted about mobile antennas lately, but I just
wanted those in the market for a good-looking, good- performing mobile
antenna to visit my site at www.qsl.net/k4kwh . Based on the famous
screwdriver
antenna, it is a solid value for the money, cheaper on the old wallet and
handles much higher power than many of
those in the market today. Its parts are of high-quality, rugged materials
to take the harsh enviroment dealt out in
mobile service. Also type in "Carolina Cyclone" on Google for descriptions
and eham review. I have these
antennas represented from coast to coast and Alaska!

BTW, if your coil cover has cracked, split, or crumbled
despite efforts to patch it, I offer replacement covers that
will LAST for years to come! They are made of 1/8" wall
Lexan and will last for many years without cracking, dis-
coloring, or splitting!

And for those of you who run any version of Icom 706,
746 or 756 I also include the little tune module for your Cyclone I or II
for FREE! These simple, effective litttle
units plug into the back of your set, "fool" the rig into thinking there's a
tuner attached, and emit a tone and carrier for about 15 secs. This lets
the driver/operator
resonate his screwdriver (hopefully Carolina Cyclone, LOL!) easily, quickly
and safely without having to spend
time looking down his driving. Separately, they are $15.00 or 2 for $25.00
shipped within conus.

I am not a big name builder; I build the Carolina Cyclone
as both a hobby and as a small supplement to my pension. I LOVE fooling with
antennas, and it gives me something to do in my shop. You can look anywhere
on
the 'net and find no bad marks about me; my call and
reputation is too important to risk! I build good products,
build them economically (Gosh, how can a screwdriver
cost $500????????), and stand behind what I do. If I say
I will do something, I will do it! Period. If you break one of my antennas,
I will fix it or replace it without no questions (come on, now, don't expect
to bang your antenna under the garage door header and have me fix it
for free-just be reasonable!)

Won't you go mobile with the Carolina Cyclone today??

73
Jerry

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=2191021059&category=7275

I got these from my friend, the old organ tuner. I've had nothing but good experience with the tubes I have received from him in the past. He bought these new about 35 years ago, as best as he can recall. He used to use a lot of 2A3's back then. There's not that much demand for them anymore in this Iowa town of 900.

These are "garden variety" RCA 2A3's, i.e. not "black plate" or "single plate" or anything exotic like that.

Of course any RCA 2A3 is kind of exotic anymore.

All three tubes have been tested on a mutual transconductance tester to make sure everything is as it should be with N.O.S. units. Everything is. If by any chance a problem arises with these tubes, please contact me within 3 days of receipt and return them (with filaments intact). I will issue a full refund plus 2 X shipping upon verification of tube identity.

Thanks for looking,
Tom - "theponyengine"

## 809. FS: Collins 51J-2 Receiver

Newsgroup: rec.radio.amateur.swap
Date: 2003-09-14 20:28:53 UTC
From: Michael <michaelt@flash.net>
Message-ID: <9c49b.6755$QY2.405@newssvr16.news.prodigy.com>
Source record: 1633
Cross-posted to: alt.ham-radio.marketplace,rec.ham-radio.swap,rec.radio.amateur.boatanchors,rec.radio.amateur.equipment,rec.radio.amateur.swap

I have for sale a very nice condition 51J-2 receiver.
The front panel is cosmetically about a 9 of 10 and not a repaint.
The receiver has the correct band change knob and meter but no top cover.
The receiver has the Lankford product detector mod and performs GREAT.
Pictures available to interested buyer. $400 shipped to Continental USA.

4382 virii currently quarantined in Postini for my benefit... 20 have
sneaked through and been gutshot by Snortin' Futilities Antivirus...
have already deleted 1500 virii friday and saturday and gave up to see
what the count rises to. so we're around 5600 for the weakend.

and there were folks at my home ISP who had 4800 by noon saturday.

clearly these script kiddies are not very clever... they could have
directed all this excitement to, say, whitehouse.gov or verisign.com,
and done something useful. or to microsoft.com, where by rights they
really belong :(

I am looking for the web site that lists the prices of ham radio gear.
The site lists the low, average and high prices of gear. The guy who runs it
gets the prices from several web sites over a 6 month period.
Does someone have the URL to that site?
Please either respond here or e-mail me.

Thank you,
Kirk Mohror

# 834. FS: 2-meter 25 watt mobile MAKE OFFER

Newsgroup: rec.radio.amateur.swap
Date: 2003-09-23 13:34:56 UTC
From: En.TAKETHISOUT.ginuitastic@Gee-Enginuity.com
Message-ID: <2f986907.0309230534.12135abe@posting.google.com>
Source record: 1358
Cross-posted to: rec.radio.amateur.swap,rec.radio.amateur.equipment,alt.ham-radio.marketplace,alt.ham-radio.vhf-uhf

I have a 25-watt 2-meter mobile FM transceiver, with digital VFO tuning, backlit LCD, 12 memory spots + settable "call channel", 5-segment LED s-meter/output meter. It supports standard 6khz offsets, plus you can combine memory channels to do odd splits like for the ISS up/downlinks. It comes with the power cord and microphone handset. The handset has a DTMF tone pad and I've added an external microphone/PTT jack for use with a headset or packet gear. I have documented all of the features and controls because the manual is hard to find these days; I'll include doc's with the radio.
Model number is KDK FM-2033.

Feel free to make any offer. I won't be insulted by low offers; I just might not take them.

ygs6gk(NOSPAM)@Gee-Enginuity.com
(remove the obvious)

Thanks.

## 835. FS: SCREWDRIVER Mobile ant-New

Newsgroup: rec.radio.amateur.swap
Date: 2003-09-23 20:11:36 UTC
From: AL GOSS <renal@frontiernet.net>
Message-ID: <YN1cb.86$hV3.22@news02.roc.ny>
Source record: 1359

Was purchased from "original" screwdriver designer Mr. Mobile: Don Johnson,
W6AAQ. Never used, comes with balun.
Sorry I misplaced the original packet of info---large and full of /mobile
hints and kinks by Don.
Is an easy install to 3/8-24 thread, use of common sense.
Will ship from WNY via USPS at $115. New cost this ant $150 + 15 shipping.
Only needs a PVC coil cover to protect from moisture and dust, I'll toss in
a toggle switch. Can't use it on my auto.
Yes--there 'may' be some better and probably some lesser quality out there.

# 836. Re: FT-2500 Stolen January, 2003

Serial Number 8L551464 with MH-36C mike. Taken from van broken into by smashing glass in sliding door. Antennas left behind; maybe frightened off by traffic. Entry to friend's yard gained by lifting gate off hinges on post. Unfortunately both pivot hinges pointed upward. If one up/one down, might not have happened.

I'm sorry if I have offended anybody with my for-auction post, but at a glance I can see at least six other "FA:" posts on this NG and nobody has complained about any of them. Could somebody please explain what I have done to warrant complaints from three different people?
As for "selling extra stuff", if the buyer is concerned about this, I will list the item as a "buy-it-now" sale so that it will be covered by eBay.
I am concerned about how people view me both on eBay and the newsgroups, so if you have an issue, please tell me what I am doing wrong so I can correct it.

Greg -- the answer to your question can be found at the rec.radio guidelines
at URL:
http://faqs.jmas.co.jp/FAQs/radio/personal-intro

Sez: The rec.radio.amateur .equipment group is NOT the place for buying or
selling
equipment, that's what rec.radio.swap is for.

Guidelines say -- rec.radio.amateur .equipment is for Amateur Radio Hardware
and software discussions.

Many folks post their FS FA WTB WTD items on all the newsgroups which
really is poor practice.
The rec.radio groups are broken down into several categories so one doesn't
have to see the same posts in all the NG's.
Just a way to TRY and keep order out of chaos.

However, it doesn't work well as folks do what they darn well please.
Since the groups are unmoderated -- little can be done about those who spam
all rec.radio NG's
The "at least six other FA posts" you cited are not following the
guidelines either. Doesn't make it "right"

Most everyone I know reads all of the rec.radio NG's -- so why spam em all
and be out of context on most of them ???

I am not playing NG cop -- just answering your question.
Continue with spamming all NG's if you want,
but be prepared for some heat from the regular readers
who will tell you to post within the guidelines.

I'm not offended, but since you asked..... I get really tired of
seeing Ebay ads here. I know where Ebay is, and if I wanted to
buy anything from Ebay, which I don't, I'd go look there.

But seems like if anybody got offended by your Ebay ad, then
they'd get offended about 13 times a day reading this newsgroup.

Spurious Noise/VHFRadioBuff:
Thank you for your replies. I'm sorry for adding to the garbage pile here; I previously had not read the posting guidelines for the rec.radio groups, and seeing all the for-sale and for-auction ads, thought it was a generally accepted practice to post them on the "equipment" group. Spurious Noise, thank you for the link to the guidelines article; hopefully I'll make wiser posting choices from now on.

Thanks!

"To me", they can post a FA, FS, WTB, what every if it pertains to the
group in which it's posted.

They are at least as on topic as about 50% of the discussions,
probably more.

The groups have grown and changed as has the internet and Amateur
Radio.

Although the "market place is, or rather, *should* be the best, If
I'm reading the antennas group and some one has an antenna for sale,
or is looking for one, it seems a suitable forum to me. Besides they
are probably more likely to find some one interested than the people
going to the "market place". Although I keep that group and
occasionally visit, I am far more likely to see something of interest
is it's placed on the groups I read.

I say this never having posted a FS, or FA on any of the newsgroups as
far as I can remember.

Sorry 'bout that. I had to re-list the item because I offered additional
items for sale (power cords) in the item description, which ticked eBay off.

Thank God Ebay was informed and you were stopped by the netcops.
Never know what kind of long lasting damage you could have done by
offering power cords. Some scumbags have nothing better to do with
their lives!

I gotta tell ya that through my many years of Ebaying, the only times
I've been ripped off were when I bought amateur radio equipment.
Maybe some of those self appointed netpigs need to do something about
them instead of a guy trying to make a few bucks legitimately.

FOR SALE

Atlas 210X with microphone.
Excellent solid state HF transceiver covers 80 through 10m SSB and CW.
One of the best receivers you can get. It has a minor modification
for driving a transverter by adding a BNC connector on the back
from the driver stage.
To restore to normal operation, simply reconnect wiring
inside. Easily restored to original condition. Comes with the manual.

Will sell for $125.00 plus shipping

To be fair, the reactionary flavor of the 'netcops' is due to the @$$holes
who would flood the groups with constant 'For Sale' items, only to be
adverts to go to EBay to go look at their auction. Guys would flood
multiple groups, then give 'countdowns' to the auction expiration.

People were fed up and took a hard line attitude. And personally, I
agree with it.

You want netcops to police EBay? Do it yourself. You'll have your
work cut out for you!

Mike

## 872. For Sale

Newsgroup: rec.radio.amateur.swap
Date: 2003-10-02 12:01:42 UTC
From: John Schneider <thecop@optonline.net>
Message-ID: <GsUeb.2461$E95.793615@news4.srv.hcvlny.cv.net>
Source record: 1396

I have a PK232MBX for sale. This unit has been sitting in storage for a couple of years. I am the original owner and I have added the DSP daughterboard. I will ship with the original manual (in grey plastic binder), DSP addendum, cable to connect to PC and original box.

Note: There are some scratches on the top of the unit and it was working the last time it was powered up approx. 18 mos. ago.

Asking $100.00 or best offer.

Please email off list if interested, and thank you for your time.

John, KB2COP
thecop@optonline.net

# 873. FS/FT: Kenwood TMV7 dual band mobile

Newsgroup: rec.radio.amateur.swap
Date: 2003-10-02 16:52:19 UTC
From: Jeff Camp <jcamp2@cox.net>
Message-ID: <7JYeb.2977$4T.1744@news1.central.cox.net>
Source record: 1397
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap

I have for sale or trade a Kenwood TMV7 dual bander with 9' remote mounting kit and original packing, manuals, etc. I purchased this unit new from AES several years ago and had it in my car for about 2 years. It probably has a grand total of less than 50 hours of time on it.

You can get more info on the radio from the Kenwood web site, but basically it's a true dual bander (receives 2 bands at once), has a ton of memories, easy menu system, blue LCD face, and 5/15/50 watts out on VHF, 5/15/35 watts out on UHF, built-in duplexor, and tons of other features. This radio is unmodified. Asking $295 plus shipping or swap for something interesting of equal value (Drake R4C, old Swan gear).

You can contact me at jcamp2@cox.net.

Thanks and 73,
Jeff
N0WJP

I think you'll find a few free 200uF, 400V caps if you part out some old
monitors or AT-power supplies.

FOR SALE: Johnson Ranger Transmitter

75 watts CW and 65 watts phone on 80 through 10 meter bands.
Full metering of all functions, and built-in VFO.

Comes with the manual and an original sales information sheet.
Fairly good condition. Front panel looks excellent.
I would repaint the case, but it is not dented or beaten up.

Needs new AC power cord and the three long cabinet screws.
May require some additional repairs, but appears to be complete
and in pretty good shape.
Picture available

Available for $325.00 plus shipping

(Remove the NOSPAM to e-mail me!)

Source record: 1409

I have for sale a new Yaesu FT-8100R Transceiver. I got it from the original owner, an elderly fellow who purchased it awhile ago and never applied power to it. He told me that it was just too small. The Yaesu FT-8100R is a dual band (VHF/UHF) mobile radio. Radio is in 100% New Condition (10 out of 10). I used it for about one hour to check it out. The 8100R does cross band repeat. It runs 50 watts on VHF and 35 watts on UHF. The recieve freq. for the 8100R is 110-550 MHz & 750-1300 MHz. (cellular blocked). This radio is capable of recieving v/v u/u or v/u. Included is the mobile mounting bracket, original manual, circuit diagram, original sales receipt,and MH-36B hand microphone w/DTMF keypad,power cable,accessories packet, etc. Price is $295 shipped in Lower 48, Thanks, Charlie Hugg, K5MBX

You are right, you are insane.

There is hardley any existant demand for 'museum quality' Xmitter equipment. I've tried to rid two of our stations of some quality RCA Xmitters when we replaced them with Nautels.

We attempted to sell them to collecters, no go. No one wanted them for anything other than back-up. One went for $500. the other for $575.

If you can get $2,900.00 then you found yourself a sucker.

Still cleaning out my storage and found another treasure. It is the Hallicrafters SX-117 Receiver. This radio looks great, shinny knobs, beautiful face plate and cabinet but it doesn't work. I took it on a trade a number of years ago but never got to this project. The tubes light and all the dial lights work. I remember that when I first got it I was able to hear very weak signals on some bands and even its own crystal calibrator. It still comes on but I didn't put headphones or an antenna on it today. I just need to find a good home for it. I will take the best offer over $50 plus shipping from zip 28139.

# 897. WTT: Kenwood TS-940SAT w/SM-220 for FT-847

Newsgroup: rec.radio.amateur.swap
Date: 2003-10-11 16:41:46 UTC
From: Jeff Camp <jcamp2@cox.net>
Message-ID: <epWhb.9095$_f.530@news1.central.cox.net>
Source record: 1421
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap

I have a Kenwood TS-940 ST in good condition that I would like to swap for a radio capable of working satellites on 2m/430. The 940 is used regiularly and is excellent operating condition. It has a few scratches and scrapes here and there, but none on the front panel. Also included is a Kenwood SM-220 station scope. It does not have the BS-8 panadaptor option. I'll also throw in a Kenwood MC-60 amplified desk microphone. It has the original manual, which has been laminated and re-bound. The SM-220 manual is a copy.

I'm interested in a Yaesu FT-847, but would consider an Icom 275H/475H pair, a Kenwood TS-790 w/1.2 GHz, or an FT-736 w/1.2 GHz.

You can reach me by email at jcamp2@cox.net.

Thanks and 73,
Jeff

Source record: 1423

FOR SALE: Johnson Ranger Transmitter

75 watts CW and 65 watts phone on 160 through 10 meter bands.
Full metering of all functions, and built-in VFO.

Comes with the manual and an original sales literature.
Good condition. Front panel looks excellent.
I would repaint the case, but it is not dented or beaten up.

Has a new AC power cord. Needs the three long cabinet screws.
May require some additional repairs, but appears to be complete
and in pretty good shape.

Picture available at:
http://home.cfl.rr.com/happysurfer/radios.htm

Available for $325.00 plus shipping

(Remove the 'NOSPAM' to e-mail me about this)

I recently swapped my old radio for an MT2000. I thought I had the RSS software for it, but don't. If anyone could help me with the software, I'd appreciate it.

I have the RIB and cables .. just need the actual software for it.

Thanks in advance!!

## 908. Kenwood two-way "LMR" Dealer in Northern California

I have for sale an extremely mint Yaesu VR-5000 wide band receiver. The
following options have been installed:
FVS-1A - Voice Synthesizer
DSP-1 - DSP Unit
DV-4 - Digital Voice Recorder

I am the original non smoking owner and have all of the boxes and paperwork
that came with the radio and the accessories. This receiver has seen very
little use and has been covered.
I am asking $575.00 plus shipping from 48026.

> I have the RIB and cables .. just need the actual software for it.

Motorola will be happy to sell you the appropriate software if you
will execute their license agreement and pay up. I recall it runs about
$270. This will work a lot better than risking the wrath of mother 'M's
lawyers (yes, they can and will go after individuals or large
corporations alike -- it makes not the slightest difference to them if
they think their sacred-cow RSS is at stake).

If you just need a programming job, I can also help. Assuming
you're planning to program all 160 channels, it'll probably run you
between $40-$50, ground shipping included.

MAKE MONEY FAST WITH ONLY $6.00. THIS REALLY WORKS! Make from $20,000 to $50,000 in as little as 4 - 6 weeks with only an initial investment of $6, by using a simple secure internet account called Paypal that takes only a few minutes to join and get started. Sign up for a FREE paypal account by clicking on the link below. https://www.paypal.com/mrb/pal=H6MNNZW27Y8D4 I�ve actually taken the 10 minutes it requires to join this wacky bunch of optimists and I�m hoping that there are others out there that will spare the change to try this. READ ON. I found this on a bulletin board and decided to try it. "A little while back, I was browsing through news groups and came across an article similar to this that said you could make thousands of dollars within weeks with only an initial investment of $6.00! So I thought, "Yeah right, this must be a scam", but like most of us, I was curious, so I kept reading. Anyway, it said that you send only $1.00 to each of the 6 email addresses stated in this article. You then place your name and address at the bottom of the list at the #6th position and email it to your friends as well as post this message (with your email address in the list) to at least 200 newsgroups. (There are thousands) No catch, that was it. So after thinking it over, and talking to a few people first, I thought about trying it. I figured "what have I got to lose except $6.00, right?" So I invested the measly $6.00. Well GUESS WHAT!! Within days, I started getting money coming into my Pay Pal account! I was shocked! I figured it would end soon, but the money just kept coming in. In my first week, I made about $25.00 which means that 25 people joined the group after they saw my posted messages. By the end of the second week I had made a total of over $1000.00! In the third week I had over $10,000.00 and it�s still growing. This is now my fourth week and I have made a total of just over $42,000.00 and it�s still coming in rapidly. It�s certainly worth $6.00, and the few minutes it took to join Paypal. I have spent

Easiest Way To Make Money! Turn $6 into $6000!

MAKE MONEY FAST WITH ONLY $6.00. THIS REALLY WORKS! email addresses stated in this article. You then place your name and address at the bottom of the list at the #6th position and email it to your friends as well as post this message (with your email address in the list) to at least 200 newsgroups. (There are thousands) No catch, that was it. So after thinking it over, and talking to a few people first, I thought about trying it. I figured "what have I got to lose except $6.00, right?" So I invested the measly $6.00. Well GUESS WHAT!! Within days, I started getting money coming into my Pay Pal account! I was shocked! I figured it would end soon, but the money just kept coming in. In my first week, I made about $25.00 which means that 25 people joined the group after they saw my posted messages. By the end of the second week I had made a total of over $1000.00! In the third week I had over $10,000.00 and it's still growing. This is now my fourth week and I have made a total of just over $42,000.00 and it's still coming in rapidly. It's certainly worth $6.00, and the few minutes it took to join Paypal. I have spent more than that on the lottery! Let me tell you how this works and most importantly, why it works. Also, make sure you print a copy of this article NOW, so you can get the information off of it, as you need it. I promise you that if you follow the directions EXACTLY, that you will start making more money than you thought possible by doing something so easy! Suggestion: Read this entire message carefully! (Print it out or download it.) Follow the simple directions and watch the money come in! It's that easy. It's legal. And, your investment is only $6.00.
IMPORTANT: This is not a rip-off; it is not indecent; it is not illegal; and it is virtually no risk- it really works! If all of the following instructions are adhered to, you will receive extraordinary dividends.
AGAIN, PLEASE NOTE: Follow these directions EXACTLY, and $20,000 or more can be yours in 4 to 6 weeks. This program remains successful because of the honesty and integrity of the participants. Please continue its success by carefully adhering to the instructions. In this business your product is not solid and tangible, it's a service. You are in the business of developing Mailing Lists. Many large corporations are happy to pay big bucks for quality lists. However, the money made from the mailing lists is secondary to the income which is made from people like you and me asking to be included in that list. Here are the 4 easy steps to success:

STEP 1: Take a few minutes to join Paypal. https://www.paypal.com/mrb/pal=H6MNNZW27Y8D4 The Internet's most trusted Internet banking system for your future income. When creating your Paypal account make sure you use the same Email address as your user name in the list below so people can send money to your account.

STEP 2 Once you have a Paypal account running, use Paypal to post $1 to EACH of the 6 Email Addresses below because you pay people with an email address in Paypal. To do this you may need to use a credit card, which is very easy, and secure so nobody but Paypal may see it. If you don't have a credit card show this great lucrative offer to someone that has one and get them to help you pay the $6. What you are doing is creating a service. This is absolutely legal! You are requesting a legitimate service and you are paying for it!
Like most of us I was a little skeptical and a little worried about the legal aspects of it all. But I looked around and did some homework and found

it was perfectly legal. Here are the 6 individual Email addresses that you have to send $1 to through Paypal for this to work properly and for you to receive money. (If you don't send the money and decide to post the message with your name in it anyway, Paypal will instantly pick this up and terminate your account. If you did this you could get into serious trouble because it is fraud. So follow the instructions and post the $6 and you will make lots of money with no hassles.)

1 ) jordanron4@aol.com
2.) melindabarrera@tiagris.com
3.) caper1974@lycos.com
4.) michaelance22@Yahoo.com
5.) jamartl@aol.com
6 ) tonymel_13@shaw.ca

STEP 3 Now take the #1 Email Address off the list that you see above, move the other Email Addresses up (6 becomes 5, 5 becomes 4, etc.) and add Your Email Address as number 6 on the list.

STEP 4 Change anything you need to, but try to keep this article as close to the original as possible. Now, post your amended article to at least 200 newsgroups (there are thousands of groups). And email your message to as many people you can. But remember, the more you post and email the more money you make! This is perfectly legal! If you have any doubts, refer to Title 18 Sec. 1302 & 1241 of the Postal lottery laws. Keep a copy of these steps for yourself and, whenever you need money, you can use it again and again. PLEASE REMEMBER that this program remains successful because of the honesty and integrity of the participants and by their carefully adhering to the directions. You are simply paying into a money making chain of participants and if the chain is broken you are screwing someone else out of their fair share. So, as each person who joins the family and the directions are followed, six members will be reimbursed for their participation as a List Developer with one dollar each. You then insert your Email Address into the list and it will move up geometrically so that when your name reaches the #1 position you will have potentially received thousands of dollars in your account!!! What an opportunity for only $6.00 ($1.00 for each of the first six people listed above). To begin, please send you're joining fee now and then add your own Email Address to the list and you re in business! HOW TO POST TO NEWS GROUPS Use Netscape or Internet explorer and try searching for various newsgroups (on-line forums, message boards, chat sites, discussions.) Log on any search engine like yahoo.com, google.com, altavista.com, excite.com, etc., then search with the subject "millionaire message board" or "money making message board" or "employment message board"or "money making discussions" or "money making forum" or "business message board" etc.You will find thousands & thousands of message boards. Click on them one by one and you will find the option post a new message. Post this article as a new message by highlighting the text of this letter and selecting copy then paste from the edit menu. Fill in the Subject, this will be the header that everyone sees as they scroll through the list of postings in a particular group, click the post message button.

You're done with your first one! Only takes about 60 seconds to complete postings on message boards after you catch on. REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200! That is it! You will begin receiving money in your account from around the world within days! JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT. Now the WHY part out of 200 postings Say I receive only 5 replies (a very low example). So then I made $5.00 with my name at #6 on the letter. Now, each of the 5 persons who just sent me $1.00 make the MINIMUM 200 postings, each with my name at # 5 and only 5 persons respond to each of the original 5, this is an additional $25.00 for me. Now those 24 each make 200 minimum posts with my name at #4 and only 5 replies each. This brings in an additional $125.00. Now those 125 persons turn around and post the MINIMUM 200 with my name at #3 and receive 5 replies each, I will make an additional $625.00. Ok, now here is the fun part, each of those 625 people post a MINIMUM 200 letters with my name at #2 and they receive 5 replies each. That just made me $3,125.00!!! Those 3125 persons will all deliver this message to 200 newsgroups with my name at #1 and if still 5 persons per 200 react, I will receive an additional $15,625.00!! With an investment of only $6.00!! AMAZING! When your name is no longer on the list, you just take the latest posting in the newsgroups, and send out another $6.00 to Email Addresses using Paypal on the list, putting your name at number 6 again. And start posting again. The thing to remember is that thousands of people all over the world are joining the Internet and reading these articles everyday. JUST LIKE YOU ARE NOW!! So, can you afford $6.00 to see if it really works?? I think so! People have said, "what if the plan is played out and no one sends you the money? So what! What are the chances of that happening when there are tons of new honest users and new honest people who are joining the internet and newsgroups everyday and are willing to give it a try? : Anyway, it is only $6.00 for a chance at thousands. Estimates are at 20,000 to 50,000 new users, every day, with thousands of those joining the actual Internet. Remember, play FAIRLY and HONESTLY and this will really work. There's no use trying to cheat for only $6.00 *** Please use only opt in resources for this material, it will work for you and it works much faster without soliciting or spamming and higher responses***

I have for sale an extremely mint Yaesu VR-5000 wide band receiver. The
following options have been installed:
FVS-1A - Voice Synthesizer
DSP-1 - DSP Unit
DV-4 - Digital Voice Recorder

I am the original non smoking owner and have all of the boxes and paperwork
that came with the radio and the accessories. This receiver has seen very
little use. I am asking $550.00 plus shipping from 48026.

## 916. Rohn 45

Newsgroup: rec.radio.amateur.swap

From: CJ Hinkle <fargonaz@netscape.net>
Message-ID: <ls66pvsnii9gj19pqcpk60u4lq0bp4bf00@4ax.com>
Source record: 1442

I have a Tick II and failed to find any data sheet for it. I had previously hooked it up to an old portable phone battery 3.6v and wondered if it could be connected to a 5v src.

Also any links to Embedded Research, schematics or operating instuctions would be helpful.

Thanks N7UJU

Hello there,

I'm looking for used CSI Brand LTR (trunking) controllers you may want to sell or trade away. The specific models are the 4200 and 4900 units.

If you have a TP-163 tone panel, I'd also be interested in talking with you to sell or trade.

Email me off the www.radiowrench.com web page and I'll get right back with you. You can also take the NOSPAMPLEASE out of my Email header below to contact me.

thanks
skipp

skippNOSPAMPLEASE@pilotNOSPAMPLEASE.ucdavis.edu

http://www.radiowrench.com has an Email icon that works well.

Message-ID: <8yTmb.30552$iq3.19112@okepread01>
Source record: 1464
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap

I have for sale a Kenwood TS-940S/AT in good condition. It has been used daily for quite some time. There are a few scratches along the top front, but none on the face. Everything works very well -- full output on all bands and the receiver is exceptionally good. The original manual is included. The previous owner laminated the manual and rebound it. Also included is a Kenwood MC-60 amplified microphone and a Kenwood SM-220 band scope (does not have the BS-8 panadaptor option). A rough copy of the SM-220 manual is included. Asking $825 plus shipping from 68132 or will consider a reasonable offer.

If you would like to hear this radio on the air, email me and we can arrange for a demo in the General section of any band except 160. Please contact me at jcamp2@cox.net.

Thanks and 73,
Jeff

I have a flawless FT-1000MP Mark V Field for sale. I am the original non smoking owner. This radio has been used very little. It is a 10 out of a 10 electronically and cosmetically. I have the box and paperwork plus all of the standard included accessories. I also made a copy of the owners manual and put it in a hard binder so I wouldnt ruin the original. I will also include the technical overview manual to the FT-1000MP MK V Field. I am asking $1,500 plus actual shipping charges from 48026. I can be reached at n8ihs@comcast.net

I have for sale a SBE Sidebander II, Model 121CB/T, 23 Channel Transceiver that has been converted to the 10 Meter Ham Band. It covers 28.510 to 28.800. It has a Clarifier that provides for coverage in between channels. This rig runs 12 Watts PEP. It works on LSB and USB and AM. It comes with the original SBE hand Mic, the Mobile Mounting Bracket, the Power Cord. It has an effective Noise Blanker. The transceiver looks and works great. Price is $35 and I will split shipping costs. Thanks, Charlie Hugg, K5MBX

I am interested in expanding my freeband hobby but do not wish to take t
he General class hammie test until the code is dropped. My question is d
oes anyone know when the code will be dropped and how long woould I need
to wait until the written General test is simplified such as the Tech t
est is now?

Plase email me a WAV of morse code so I can hear what it sounded like wh
en the old hammies used it.

The future of the code is still in limbo, and could be resolved in several months, or years. As far as the written, it is about as easy now, as it ever has been.

Organized, long term freebanders are very aware where they
operate and take great measure to ensure against talking on an amateur f
requency or one that isn't heavily used on the freeband.
If the non-U.S. stations can operate ssb there, why shouldn't I,
especially if I want to have a nice DX contact with one of them?

Many of us LIKE the law as it is, it keeps "yes men" off the freqs. Same
analogy as the gun issue...when guns are outlawed only
outlaws will have guns...no, yoo won't find many freebanders lobbying fo
r change to open the freqs because the law as it reads, doesn't bug us.

No rationalization is even needed except to reply to folks
that repeatedly ask over and over, "Why?" It is these folks
that feel they need a reason why we do what we do, not us.

I've been a so-called "freebander" since the late sixties but rarely for DX. The primary reason I talked outside of allotted frequencies was for privacy or to contact a specific distant station I wouldn't normally hear on the allotted band. We used to run Ch. 16 -5khz down and 15A a RC Channel running slightly above stock power on 3-4 element directional and easily talk 75-100 miles. I spoke all over the world with better than 1000 confirmed QSL contacts from a slightly peaked Golden Eagle Mark III/IV running through a 4 beam element at 60 feet from Central NJ.

I will probably be dropped soon, but the FCC has to go through standard
procedures with all the pending petitions. The international requirement
was dropped on July 5th, so by next July it should probably be gone in the
US.

actually a good point. if i were to use the freq's the u.s. gov said i can
then what is the problem with slipping +/- 5kc's between 'channels'? is
that freebanding?
better yet, who the hell is the u.s. gov to tell me what is legal or
not? if i were to float out to bermuda and xmit would i be freebanding
there? do our friends to the north and south really care what the fcc
says what americans can/cannot do? not likely....

> that freebanding?

The frequencies that the US govt. says you can are those specific
frequencies that constitute the 40 standard CB channels. The distance away
from the center of any channel is tightly regulated, and you can't be more
than 0.005% away from that center (~1.3 KHz), which is actually pretty broad
when compared to say, broadcast AM, which is only allowed a 20 Hz leeway).

> better yet, who the hell is the u.s. gov to tell me what is legal or
> not?

If you are a US citizen, they are granted that right by the constitution,
and by treaty.

if i were to float out to bermuda and xmit would i be freebanding
> there?

You would then be under the jurisdiction of whatever radio authority covers
Bermuda. Aren't they a British colony? The UK Radio Authority is much more
harsh than the FCC.

do our friends to the north and south really care what the fcc
> says what americans can/cannot do? not likely....

Actually, yes. The treaties for use of various frequencies are there to
protect all the various countries that are signatories to them. The
Canadians are pretty hard on pirates (though they also have some rules in
place to give greater latitude on some bands than we do). I don't know what
communications law is like in Mexico, but I imagine that they deal with
people operating out of band/off channel too.

There are international treaties also that regulate such things. So just
floating out to Bermuda doesn't help.
```

treaties not withstanding have you heard 10 & 11 meters recently? the
developing world is looking for the cheapest way to communicate with
their expatriates (sp?) in the u.s. one way to do it is using a setup
that after an initial outlay for equipment is basically free. their
problem is propagation not the gov.

just make it worse for every body next thing you know
they'll require a digatal id on all transmitters or they'll be
terrorist and arrested without due process.

I have a flawless FT-1000MP Mark V Field for sale. I am the original non smoking owner. This radio has been used very little. It is a 10 out of a 10 electronically and cosmetically. I have the box and paperwork plus all of the standard included accessories. I also made a copy of the owners manual and put it in a hard binder so I wouldnt ruin the original. I will also include the technical overview manual to the FT-1000MP MK V Field. I am asking $1,500 plus actual shipping charges from 48026. I can be reached at n8ihs@comcast.net
73s

I have for sale an as new AOR AR8200 MarkIII B hand held receiver. This is the latest offering from AOR in the 8200 series. This is a wide band receiver that covers 500 KHz to 3GHz cell blocked. It has 1000 memory chanels and is all mode including super narrow FM plus wide and narrow AM in addition to USB, LSB, CW and standard AM and FM modes. This radio has a total of 30 minutes of monitoring on it and then packed in the box. I have the box and all manuals and standard included accessories that came with the unit. I will also include the optional soft case with this radio. It is a 10 out of a 10 electronically and cosmetically. I am asking $475.00 shipped CONUS.
NO TRADES PLEASE
I can be contacted at n8ihs@comcast.net

read the section you mentioned at the cornell website. it pertains to
the u.s. and its environs but no mention of people outside territorial
limits.
the world is a bigger place then what the u.s. dictates....

This is so, but you asked specifically what right the US government had to set regulations, it was stated that if you were a US citizen, it was granted by the Constitution, and by treaty.

Further, the ITU does have worldwide jurisdiction, and they are the ones who write the treaties, and every country is a signatory.

It's a difficult question. Do we applaud him for wanting to go legal? Or
do we slam him for ever having operated illegally? I have known former
pirate radio ooperators whose behaviour on the ham bands after they got a
licence was exemplary.

If they have already been punished in some way by the courts, then the
answer to your query is (or should be) yes. If they have not been punished
in some way by the courts, then, de facto, they have not been found guilty
of any crime, and are to be presumed innocent.

From: minkaz@epix.net
Message-ID: <5b234ef7.0311041930.27b2de51@posting.google.com>
Source record: 1319

aor ar1000xlt wide range monitor
some of the specs include:
continuous coverage from 500khz to 1300mhz
10 banks of 100 channels - 1000 channels total
included with sale:
rubber duck antenna
guide to the ar1000xlt
wall wart
case
belt clip
original box

This unit is in very good condition and operates as it should.
I'd guess it was made in the early 90's.
It does not appear to have been used much.
$175
pics are available via email to minkaz@epix.net

TRADE?
Would like to sell or trade the following items for something useful
and of comparable value (?!?):

Hallicrafters TO keyer
Systron Donner frequency meter (accuracy to 0.1 Hz!)
HP Office Jet FAX/scanner/printer (B&W + color)
Two boatanchor cabinets (one Bud, one unknown)
Motorola 10A/13.6VDC power supply
OK Industries solder rework station

I can send pictures and other info. What have you?

Email me direct (remove the NOSPAM).

Thanks and 73

I have for sale an as new AOR AR8200 Mark III B hand held receiver. This is the latest offering from AOR in the 8200 series. This is a wide band receiver that covers 500 KHz to 3GHz cell blocked. It has 1000 memory chanels and is all mode including super narrow FM plus wide and narrow AM in addition to USB, LSB, CW and standard AM and FM modes. This radio has a total of 30 minutes of monitoring on it and then packed in the box. I have the box and all manuals and standard included accessories that came with the unit. I will also include the optional soft case with this radio. It is a 10 out of a 10 electronically and cosmetically. I am asking $475.00 shipped CONUS.
NO TRADES PLEASE
I can be contacted at n8ihs@comcast.net

There is a major difference between Federal laws and the Constitution. The references that you cite are NOT sections of the Constitution. Please retake your civics and political science classes.

Brenda Ann wrote in message ...
>
>The UK Radio Authority is much more
>harsh than the FCC.

Sorry, but I have to disagree.

Even at the height of CB, when 100s of thousands of people were running illegal CB in one way or another, the yearly "bust" figures were just into double digits - it has remained in the 20s and 30s.

Most illegal CBers get ignored, some get a "Please don't do that" verbal warning, some may get a written warning,.
So, what do the very few big busts get... £1000s in fines? Prison?
No... a couple of hundred pound fine if any - and the illegal equipment snatched.

If the RA were "harsh", they would consider illegal CBers as "Pirates"... and give them the very large Pirate fine. Those using Amateur illegally would be hunted down like dogs and given the punisment available under UK law - prison.

When nearly everyone was using illegal antennas, they changed the antenna rules to make those antennas legal.
When CBers were illegally using the American frequencies, they legalised the band for CB use.
When they wanted American CBs out of the hands of CBers, they made it legal for Amateurs to convert the sets to 10 Metre - so they would buy them from CBers, make them legal, and save the RA the bother of chasing people.

If they were harsh, they would have put "No DX" and "no talking to foreigners" rules in place. They would ban the import and sales of the illegal CBs marked as "Amateur". They would ban the ownership or use of Amplifiers that work on CB.
America does all those - The UK does none of them.
I would say that our CB service has very few rules, and enforcement only as a last resort.

A few years back, a group of people set themselves up as self-appointed CB police. They went around looking for CB antennas and CBers - sending a list to the RA, for them to catch the licence dodgers.
You would think that the "bust" figure would have shot through the roof - but the RA couln't be arsed to do the chasing.
They now plan to remove the licence next year - so reducing the amount of illegal CBers even further.

Regards,

Peter.

Hello all, I have a icom 756 i preformed the MARS mod but it did not work. anyone else have this problem?
Also i installed the 223 ssb filter. turned it on in the menu. it does show up on the main filter menu.But you can not select it, is this normal? Did a CPU reset. Even tried the Gen coverage button still will not transmit MARS.
Everything else works as it should.
Any help would be greatly appreciated.

I have for sale an as new AOR AR8200 Mark III B hand held receiver. This is the latest offering from AOR in the 8200 series. This is a wide band receiver that covers 500 KHz to 3GHz cell blocked. It has 1000 memory chanels and is all mode including super narrow FM plus wide and narrow AM in addition to USB, LSB, CW and standard AM and FM modes. This radio has a total of 30 minutes of monitoring on it and then packed in the box. I have the box and all manuals and standard included accessories that came with the unit. I will also include the optional soft case with this radio. It is a 10 out of a 10 electronically and cosmetically. I am asking $475.00 shipped CONUS.
NO TRADES PLEASE
I can be contacted at n8ihs@comcast.net

Montgomery Wards Model: Airline 62-2500

BEAUTIFUL Montgomery Ward Airline 62-2500 floor model. AM and 6 to 18 MC shortwave. Works wonderfully after a good warm-up of an hour. Seems I saw a label somewhere on the unit dated 1948. Tubes all check out good. Replaced cracked AC cord. Rest is all original equipment. $95 takes it. I would prefer pick-up, but will ship IF you are willing to pay for a professional packing/mailing company to do the work. (Probably run you around $60.) PLEASE CALL ME on this one to work out details. It is a honey. (1.517.563.2613) 73 from Bill - WA8MEA --- NEAT STUFF! Visit: http://qth.com/dwm

Hi,

I am selling the following as a package (will not seperate-sorry):

Yaesu FT-847 (HF, 6M, 2M, 70CM)
Yaesu FC-20 Tuner (HF-6M)
Heil GM-5 Goldline Microphone
Heil PL-2 Balanced Microphone Boom
Heil SM-1 Shock mount for boom mics
Heil FS-2 Foot switch
Heil AD-1 Cable (Mic to Radio)

I have original boxes. Equipment is in prestine condition, purchased new in
May 2003.
I have stock mic for radio which obviously I will include.

Retail price for package is $3000 + taxes

I'm asking $2500 CDN.

Only selling because my wife returned to school, and therefor is not working
full time.

If you are interested, please call 905-789-9405

Greetings:

I've got 5 YO-YO-VEE prototypes I'd like to sell at discount. I wouldn't feel right selling them as new, because we did take them out in the field and test them. So even though they look new, technically they are used.

Some of you might be asking; "What the Sam Hill is a YO-YO-VEE?" If you're familiar with the Yo-Yo-Tenna Deluxe being featured in Worldradio magazine, or on banner ads at QTH.com and Eham.com, we've taken THAT antenna and placed a Budwig center insulator in the middle to make Inverted Vee operation a lot easier. (Easy mental picture to make since we don't yet have a "real" photo available. B&W AND color photos of the "Deluxe" also available at our website.)

Our retail on this will be $39.95 plus $7.95 shipping when available after the holidays. I'm selling these VERY SLIGHTLY "used" prototypes for $29.95 each plus HALF the shipping: $3.97

You're more than welcome to call me or even use our secure online form at our website. BE SURE to mention YO-YO-VEE prototype for the product description.

Again, I've only got five of these. We had six, but gave one away at our local club meeting for a door prize. So first e-mails get them!

Tektronix is trying to manipulate the oscilloscope market. Today I learned from my local dealership that they are required by contract to destroy every scope which is traded in for a new Tektronix scope, regardless of age or condition. So if you decide to trade in that old scope for a Tektronix, know ahead of time that it is NOT going to end up in the hands of a ham, or of some kid learning and experimenting in electronics on a tight budget like I was thir... er, twenty years ago. No, Tektronix needs to raise their profits by destroying every used scope they can get their greedy little hands on, regardless of who feels the pinch!

Interesting, last I heard (and that was only a few weeks ago) the Tek
Country Store was still in business, selling their used trade-ins, among
other things. Could your dealer be blowing smoke up your behind?

The scope I'm using now was purchased as a used demo unit, at a significant
discount.

Frank - this is how big business works. They're not in business to do
favors for you, they're in business to make money. Period.

Teletype Corp. used to do the same thing with used Teletype machines.
Motorola used to do the same with traded-in 2-way radios (I had a friend
who drove the truck to the crusher.)

That's the way it works, Frank....

<snip>

Do you have hard evidence of this, such as an official statement
from someone at Tektronix in authority to make such statements?

I think your local dealership is pulling your leg. I visited the
Tektronix company surplus store less than four months ago, and found a
generous assortment of older 7000 and 11000 series mainframes and plug-
ins, many of which were in perfectly usable condition.

Don't even get me started on the seemingly vast quantity of Tek
scopes and other such goodies that seem to be in constant availability
on the surplus side of things (hamfests, stores like Kaiser Technologies
in the Bay Area, etc.)

If this really is true, its a shame. I've been using and repairing old
Tek scopes for about 30 years (!), and love to see kids, hobbyist,
and hams get their hands on them.

Realistically, 'scopes Tek gets in
on trade will be a very small percentage of the number out there, so
it should have little effect.

Steve

Yes, this is how business works, but that doesn't mean it works well, as many companies rely on their longstanding reputations as 'good guys'. The info I received came from the GM of Radar, Inc. in Spokane. Whether the policy was initiated by Radar or by Tektronix, or applies to any other brand, he didn't say. What he -did- say was that he has had to send several dozen scopes the the incinerator since this policy began not long ago -- and some nice ones, too.

Either way, it still sucks.

Has to have been Radar's policy (and a stupid one it is, too). I
don't see Tek doing it because Where do you think they get so much of
their inventory for the company surplus store?

A lot of the items at the Country Store are prototypes, special modified
units used as test fixtures, etc. that wouldn't have much appeal to
end-user customers as much as to experimenters.

If the policy exists, it is stupid. A used Tek scope may present some
compitition to a new Tek scope, but it presents much more compitition to
the new scopes of the lower price manufacturers.

You have to be a corporate "bean counter" on a rant to come up with
schemes like this. You're right, Frank, a $500 used model isn't hardly
competition to their latest-greatest $20,000 model. Mr. Bean-Counter
would like to think they could eliminate such competition but odds are
Mr. Bean-Counter wouldn't know a o'scope if it bit him in the arse.
If Tek is really doing this nowadays the only purpose it serves is to
make them appear as knuckleheads.

One rather large electronic mfr that I used to deal with had an "outlet
store" where they sold the trade-ins, factory refurbs, etc. Basically a
scratch-and-dent outlet. Prices were only maybe 25% less than the good
stuff...the biggest advantage was not having to step thru the corporate
ordering nightmare spending days, if not weeks, playing phone tag with
some "account representative" who was the only person authorized to take
your order.

The outlet store made too much sense so they closed it.

Tektronix is a good and reputable company. Don't care what anyone might think, I know better. My uncle (Warren K. Dallas) helped establish the groundwork for a reputation since 1947, that prevails within Tektronix to this day. Any doubts, read the book "Winning with People: The first 40 years of Tektronix. I rest my case. 73 de Fred.

I am not a regular user of eBay, so needless to say, I was quite surprised when my HR2600 was banned. I emailed eBay and they basically said the HR2600 has been deemed by the FCC to be an illegal radio since it's used frequently for out-of-band pirate operation. Since I am a licensed ham, bought the radio legally from another ham, and have always operated it legally, I can't see how they can ban these radios (other than the fact that they can because it's their auction site and I know this trumps fairness).

So my question, is what is the best alternative auction site for those 10 meter ham refugees who have been banished from eBay? I've heard Yahoo's site is pretty good, are there others I should consider? I'm not a dealer, just an ordinary ham wanting to get a fair price for my prized HR2600.

Thanks in advance for your advice and suggestions.

If you "want a fair price", post it For Sale in any of these groups.
The fact that you want to auction it suggests that you want more than
a fair price.

QTH.com is good.
Thats Ebay for ya, can't sell legal items but there are literally hundreds of low drive 10m amps listed there, and they are ALL illegal. Relist it but don't use HR2600 in the title, just put 10m transceiver. Ebay reminds me of the Bush/Cheney/Ashcroft cartel. They do anything they want, legal or not, and they don't care what anyone thinks of their actions. Bunch of arrogant bastards.
Once I saw an item manufactured in 1999, "autographed" by a person who has been dead since 1990. It was being sold as authentic with a COA. I notified ebay of this obvious scam. They told me to mind my own business.

That is a stupid thing to say. On ebay you could have hundreds
of people looking at your item. Here you are limited to a
couple of dozen at best. You should use your cranium some time.

I know about the HR2600 ban and it does not make sense to
include it with the Lincoln and the HR2510. Those radios
are easily modified but the 2600 requires major surgery
in order for it to operate out of band. Common sense doesn't
seem to be all that common.

I did not see your auction so I don't know if this applies.
I put up a very nice HR2600 on ebay this year. It had the
Chipswitch so it was capable of 10 thru 12 meter operation.
I mentioned in my auction that it would operate on 11 meters
and ebay pulled it. I listed it again and only mentioned 10
and 12 meter operation and they left it alone. You could also
list it without mentioning the model of the radio. Bidders
could email you about specifics.

I had quite the opposite result when I called them on an encoder failure on
my TDS-420a

They were very helpful, and the replacement encoder was surprisingly
inexpensive.
They took a few minutes to verify that we were ordering the right part,
because of an ambiguity in the part number, but it was resolved quickly.
The whole thing was less than $50 and I even got spare encoders at that
price, in case of a future failure.

> Tektronix is trying to manipulate the oscilloscope market.

Perhaps. However I know in some industries, the same thing is done to prevent something like this happening:

Original owner of functioning, well cared for unit sells it at a flea market etc.
New owner modifies/breaks unit, then sells it to 3rd owner
3rd owner is dissatisfied and blames manufacturer, perhaps with little effect, perhaps with significant damage to manufacturers reputation.

I know from first hand experience that this was the case with 2 well known 2 way radio companies. If you were caught sneaking a trade-in out of the path of the crusher, you got canned.

Yep, you guessed it. Same deal with mine. The wording I used was
operates "10 *through* 12 meters." I emailed them and proposed that
if I change the wording to "10 *and* 12 meters would it be ok. The
answer was that the wording didn't matter.

Below is the exchange I had this morning with eBay. It seems eBay is
guilty of merely blind obedience to the FCC and that the problem lies
with the FCC's determination that all HR2600's are "problematic" and
are of a "prohibited nature." When I bought the radio years ago from
its original owner (also a licensed ham) I liked that the radio had a
Chipswitch so I could operate it on 12 meters where I have operated it
extensively. An added side benefit is that I can monitor CB during
long roadtrips (I don't own a regular CB but can see their usefulness
out on the highway). I have never transmitted out of band nor have I
ever wished to. I guess my biggest problem with all of this is that I
feel like I've been falsely accused and assumed to be a criminal. I
must say I was somewhat offended by the whole episode. Here's the
exchenge with eBay:

Hello Darren,

Thank you for taking the time to write eBay with your concerns. I'm
happy to help you further.

We absolutely understand that you did not intentionally violate our
policies. However, the Uniden HR2600 model is simply not permitted on
eBay. Regardless of how the item is described, it just isn't allowed.
I
apologize for the inconvenience.

Your item was ended because it was identified by the FCC as
potentially
problematic. At eBay, we are not experts on transceivers and the
specifications of each model and how it may be modified. Therefore, we
rely on the FCC for guidance. eBay was contacted by representatives
from
the FCC and asked to remove certain models of radios that, while
legal,
may be problematic. Therefore, you may contact the FCC if you have any
further questions about the prohibited nature of your particular
model.

For further information concerning why your model was ended, contact
Ray
LaForge at the FCC Laboratory, 7435 Oakland Mills Road, Columbia, MD

Message: Re: Item #: 3058207918

Dear Sir or Ma'am,

I believe you may have misunderstood the nature of my item that was
removed today. The radio is a fully FCC type accepted and approved HF
tranceiver. It is designed and advertised by the manufacturer (Uniden)
as a 10 meter HF tranceiver with 12 meter capability after minor
modification. As a consequence of the modification it is, admitedly,
capable of operating between the 12 meter and 10 meter amateur bands.
However, it is NOT a so-called "export," "CB," or other non-type
accepted radio. It's fully FCC approved. Many, many, hams have
modified
the Uniden HR2600 in this particular fashion to enable them to operate
legally on 12 meters as well as 10, and is not at all inconsistent
with
perfectly legal operation on these bands.

There are also many other FCC type accepted HF radios capable of operation outside the amateur bands that are listed on eBay right now, so I'm not sure why my radio is different. In reviewing my item's listing, perhaps if I had said "operates on 10 and 12 meters" rather than "10 'through' 12 meters" or included a disclaimer that the operator
of the radio must hold an FCC genral class or higher ham license, would
my listing be ok?

Also, I would like to point out that I am a law-abiding ham radio operator who holds a General class amateur radio license, call sign W5DKE, and that I legally operate this radio on both 10 and 12 meter amateur bands. If a purchaser "might" operate the radio outside the legal amateur bands, that should not preclude my being allowed to sell the item. Otherwise you would have to end the majority of transceiver auctions I see in the Ham Radio Tranceiver section of your website.

Lastly, you can see from my selling history that I am not a regular user
of eBay. Please understand that I in no way intended to circumvent or disregard your site's policies and if I have, please accept my apology.

Respectfully,

Darren Ream

Fellow Ham's,

I recently repaired a FT101E for a caregiver to present to a retired Catholic priest of the Maryknoll order in Los Altos hills, CA. While the caregiver got the radio for free and I repaired it for the cost of parts he lacks a microphone to go with it.

If you have a suitable microphone you could donate it would go a long way to get this going. The caregiver / Ham who is providing the radio is Dan Saunders / KI6FA.

Please reply to me via email if you believe you could donate a suitable mic. and I will pass the info on to Dan (he currently lacks access to USENET). When replying please remove nospam from my email address.

Thanks for taking the time to read this appeal!

This is definitely not right.
Hell, by that grounds, a pencil is "problematic" because it might be used to plot a terrorist attack..

I'd forward the exchange back to riley and the arrl.

the mic for a FT101 is the same mic as the Cobra/Uniden 4 pin CB's use....
any truck stop should have one at a good price that will work... 10-12
dollars

I bought an Icom 706 MKIIG and when the wife found out she, well,
insisted I sell the HR2600.

Since the HR2600 is only 10 through 12 meters, tell her you won't get very
much for it and it isn't worth selling.

Dee D. Flint, N8UZE

From the current Hamprice document:
HR2600 10M ALL MODE 153, 142, 135, 103

More info on Hamprice at:
http://www.geocities.com/jacpbc@sbcglobal.net/

Those things don't like to be around radio towers. 2 meters is useless
when the tower is a half mile away.

Talking to Ebay is like talking to M$. They really don't care as long as they make $. The are very "reactive" to issues, not "proactive". I see nothing wrong with the 2600 but lets talk about the 200 watt "Ham Amps" for $1xx.00 that cover 12 and 10 meters? They are still around. Also the "Amateur amps, 250 watts for $2xx.00 that only cover 24 to 30 mhz. Funny, they still get listed?

What do I know and its for sure Ebay does not care at all.

Just my 3 cents, John W5CGU

"A couple of dozen at best"? How do you figure that? Do you have any clue? If that's true, why did you ask your question here?

BTW, I merely made an observation. But you proved it for me: The "fair price" you could get here wouldn't be enough.

It's pirates, freebanders and keyclowns who are responsible for the
"ban" in the first place, yet they are the ones who bitch the loudest
about the "unfair" eBay and FCC.

Me too, but it was after many years of not being able to get them - read
the stories by Wayne Green and Byron Kretzman about the machines that
used to go to the landfill. Same with Motorola - a few hams spoiled it
for everyone by reselling 2-way radio gear back into commercial service
after they had "promised" (and signed waivers) that the equipment would
be used only for ham radio use and not resold into commercial service.

Sometimes it's just cheaper in the long run to dispose of gear than try
to support it and lose a potential new equipment sale.....

By the way, thanks everyone for their responses. I think I'll go
ahead and post it on eham and qrz and skip this whole auction thing
altogether. When I post it for sale, I'll post a link here so
everyone can look it up.

Thanks again.

As of last year, Motorola still did send their trade-ins to the crusher.
They did the same thing with engineering units. I can't tell you how many
XTS-3000s went to the crusher.

Your analysis might be true, IF there was any continuity to typical management. Businesses that have been "doing the right thing" for 50 years can suddenly do bizarre things, often from bringing in a "breath of fresh air" in the form of a manager hired from competition, or, even worse, from some totally unrelated industry. Or the management level fills up with lawyers and bean counters. Got synergy?

Other things, like management loosing their collective nerve or direction, can also produce this effect. Remember Coke? For 90 plus years, brand leader with an unchanging formula. Then the data comes in from some market focus group, and we suddenly get New Coke!

BTW, this "news" about destroying obsolete products is very old news. Seems like more than 10 years ago, HP was doing this on 141-series analyzer mainframes. Come to think of it, HP ain't the old HP anymore, huh?

Ebay is a wonderful thing most of the time.
Yes, you get the most cash from whatever you sell (most of the time).
Ebay is watched all over the world and if someone really wants to
spend more than you might think is a fair price, well, it's up to
them. It's called free enterprise. I look at some of the high
prices and shake my head, but If an item is wanted bad enough,
make it so. Who is to say what an item is worth to somebody looking
for it.
ALSO, these newsgroups are nice to find stuff too, BUT, You have no
recourse if something goes wrong. Like what happens if you pay for
something and you never get it? Or if is not working as described?
Or it's beat up and not mint like the posting says? You're screwed.
True, most hams are honest but there are some chumps also.
At least on Ebay there are actions that can be done. Also, using
paypal to pay for something is great. Yes it cost a very small amount
but if you don't get your item and the seller does not have any proof
that he sent it Paypal can and does get your money back from the
sellers account.

BTW, Ebay is so large that they usually do not go out of their way to look for items to ban. What usually happens is some dirtbags out there look for these radios and amps and e-mail ebay. Then "poof" your auction is ended. Even though there is nothing illegal with the item. Ebay is making way to much money to let a legal radio (or whatever) that someone "might" modify" to be sold on their system. They seem to be afraid of repercussions down the road.
---
With all ebays money how come they are afraid to have a telephone??

Wrong again, Doug: It's whining trolls like you who are responsible
for the "ban".

And if you continue to jam 2 meter repeaters in and around Toledo,
you'll get repeaters banned, too.

Pinhead? I guess you are.

Prove me wrong: Post it For Sale here. You'll get a "fair price".

But you didn't answer the question: How can you claim that you'll only
get "a couple of dozen at best"? A "couple of dozen" would only be the
flamers and trolls!

In this current time, NOTHING is as it used to be.. As the man pointed out with management, ideas, formulas and so on, it seems all of what "used to be" common sense has gone out the window. Nothing should come as a surprise in this day and age.
But, speaking of trashing items, I too know of a few companies that trash their items with no regard to future use, and so on.
This world is run by a whole different set of rules now and even they aren't set in stone. It is a shame to see such equipment still with some life to it demolished, but such is life. G.W.

IIRC HP broke into several different companies - the one that makes
computers absorbed Compaq (or was it the other way around) and the
one that makes printer stuff is the "new HP".

The one that made (from the start) and still makes some of the best
test equipment now has a new name.

It shudd'a been the other way around.

I have an FT-897 both filters 2 batteries and charger. There is some cosmetic scuffs and the RIT knob has been repaired.
MARS/CAP with frequency stabilizer.

I am the original owner.

I would swap for late model Icom 706MKIIG or FT-100D

I really would prefer a mobile rig and have not interest in QRP w/ batteries.

contact me directly at WE1MD@arrl.net

I'm selling my trusty Scout:

<http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3057949710>

Ten-Tec Scout with 40 & 20 meter modules, Bencher Iambic Paddle included.
Unit has noise blanker/Jones filter built in and user manual/schematic is
included. Radio has "Amp" jack for power but PowerPole adapter is included
for emergency service interoperability. No microphone was ever used on this
rig.

Source record: 1216
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,rec.radio.cb,rec.ham-radio.swap

The Hamprice info is really neat. I saved the document for future reference. I figure then that my radio is priced just about right considering it comes with a pretty much new $50 aftermarket amplified mike, and the Chipswitch enhanced microprocessor which is about $100 installed. Throw in a 2510 service manual and two mounting brackets, and I figure all these extras have to be worth at least $75 over the Hamprice price (which is presumably for just the basic radio).

It's been years since I've sold any equipment, so one variable I don't know about is what the overall market conditions are like right now, but since Hamprice says all their #'s are since March 2003, it's obviously not too bad.

And yes, I've heard the 706 tends to get clobbered by intermod on 2 meters, but since I use it for a base radio and I live in an extremely quiet location, that's not a concern for me. In fact the main intended use for my new 706 is to monitor 2 meter SSB for band openings.

This is getting really crazy! After my bad experience with eBay, I posted a query in this newsgroup asking where I could sell my perfectly legal HR2600. One fellow ham helpfully suggested eham.net and qrz.com as viable alternatives. Well, I submitted my ad to qrz.com and it kept mysteriously disappearing so I kept reposting thinking I was doing something wrong (I rarely post anything for sale so I'm no expert, I was thinking). Well after the third time my posting mysteriously disappeared I got the following rather curt email from the moderator of qrz:

"I have deleted your posting for the illegally modified ten meter radio. We
do not allow postings for this type of equipment. Please read the posting
rules at the top of the forum page you are posting in before you post.
73

Bob
W8KT, Moderator, QRZ"

In fairness, I should post what my ad actually read:

"I just bought a 706 and wife says the 2600 must go. 2nd fastidious ham owner since new. Professionally installed Chipswitch giving this radio coverage of both the 10 & 12 meter bands. RD-104E hand mike recently bought new to replace stock mike that went bad (stock mike included if purchaser wants to fix later on). Includes original owner's manual, all documentation for the D-104 and Chipswitch, power cord, two mounting brackets, and all four original thumbscrews. I'm also throwing in a mint HR2510 service manual. Radio is in excellent condition and used mobile only a few times. Totally stock except for Chipswitch. I'm not a dealer...this radio's been in my shack for the last 5 years. $225 obo plus $15 shipping. Email me, Darren, W5DKE, at dream@alumni.utexas.net if interested or have questions. Thanks for looking at my ad!"

I had carefully read the rules before I posted and reread them again to make sure I had it right. This is what qrz.com's "rule" states:

"Amateur Radio equipment and related items only. For Sale ads only - no opinions, discussions. No illegal equipment, i.e. 10m Amps, 11m Amps, hacked CB's."

OK, now call me crazy, but I am some kind of idiot to have not realized my HR2600 was prohibited by qrz.com's "rule?" Bob, W8KT,

seems to have implied that the only way for me to have not realized this was that I must not have even bothered to read the "rules" before I posted.

I used to be pretty militant about cracking down on "freebanders," "pirates," etc and had no sympathy for "whiners." [None of my HF radios have been "opened up" except for this HR2600 because that was a necessary side effect of expanding it to cover 12 meters.] But this is crazy. The anti-freebander crusaders have clearly gotten so militant and self-righteous they brand everone who possess a modified 10 meter tranceiver as scum of the earth. I'm being treated like a criminal for trying to sell a perfectly legal HF tranceiver to another ham. I am PRESUMED GUILTY just because I merely posess an HR2600. So what am I supposed to do with this radio? Since I've been banned everywhere (but not eham.net, thank you eham.net, and I even said 12 *through* 10 meters on that site) now I figure I have three options: 1) sell it at the truckstop, 2) donate it to the Boy Scouts (but then they'd be criminals), or 3) get rid of this equipment in the nearest dumpster before I get arrested especially now that the whole world knows I possess "illegal" equipment.

I've never had as bad of an experience as this in all my hamming days. This has really left a bad taste in my mouth especially when I realized it wasn't just the non-hams at eBay that were treating me this way (which I got over and it wasn't that big of a deal since I knew they were ignortant about ham radio), but now fellow hams are treating me like a criminal!

Someone please educate me and tell me what I'm missing here.

Darren

Welcome to the world of N8WWM & WA3MOJ. They
have been trolling Rec.Radio.CB for a couple of years
now, with nothing to add other than harassment, foul language,
sick sexual pictures, accusations, signing you up for Spam,
sending you virus's and all around trolling.
Sorry about your problems with QRZ, have you tried to
e-mail Bob direct, see if maybe things can be cleared up?

QRZ and the "RF Keystone Kops" who fed them
the BS thereon are obviously paranoid.

The HR-2600 IS NOT..repeat...IS NOT capable
of being "modified" for out of band operation as was
it's immediate product predecessor radio the HR-2510.

I think the "kilocycle cops" who got your ad
cut off from QRZ don't know their freakin
ass from a hole in the ground. I and suprised
QRZ even fell for their line of BS.

Put it on E-Bay instead, and in so doing
tell QRZ.com to go pound sand.

Hi Landshark,

I did try to email him twice for a clarification, but have gotten zero response. All I got was the initial email telling me to "read the rules before I post then I would know not to post illegal equipment" (I paraphrase, see above for exact quote). It's not that big of a deal anymore...it's only a $200 radio at issue here after all...but I have gotten an education at how some hams just can't help being self-righteous asses. You know guys, there is a war on, and our country is going bankrupt, etc.. So you would think they'd find a bigger issue to get their panties in a wad over if they really want to go on a crusade. No wonder young people are not coming into the hobby. One slip up, and they get jumped. It's almost like these old cratchety hams would rather see the hobby die completely than morph into something they don't approve of. They can go down with their ship if they want to, but this sort of attitude is what is killing the hobby, in my opinion.

By the way, in an attempt to be done with this nonsense, I've dropped the price of the radio to $195 or best offer. Again, see www.eham.net (my new favorite site!) for further info and pictures.

Thanks

Darren

# 1101. FOR SALE: Wards Airline 62-2500

Newsgroup: rec.radio.amateur.swap

Montgomery Wards Model: Airline 62-2500

FOR SALE: BEAUTIFUL Montgomery Ward Airline 62-2500 floor model. AM and 6 to 18 MC shortwave. Works wonderfully after a good warm-up of an hour.
Seems I saw a label somewhere on the unit dated 1948. Tubes all check out good. Replaced cracked AC cord. Rest is all original equipment. $95 takes it. I would prefer pick-up or meeting. (I live in Southern Michigan.) Will ship IF you are willing to pay for a professional packing/mailing company to do the work. (Probably run you around $60.) PLEASE CALL ME on this one to work out
details. It is a honey. (1.517.563.2613) 73 from Bill - WA8MEA ---
NEAT STUFF! Visit: http://qth.com/dwm

P.S. - I can send photo for serious inquiries.

> (Note: a service manual for a HR2510 isn't much good with a HR2600.
> Maybe he should auction that separately?)

Agreed. I noticed that it's really not worth that much. Whatever
it's worth, I figured the "market would decide" if I auctioned it. On
eBay I had it for sale with no reserve. It's not that I'm keenly
aware if it's value and wanted to get more than it's worth, just that
I don't really have the foggiest what the radio's worth so I was going
to auction it to make sure I at least go "about" what it was worth.
Right now it's up on www.eham.net for $195 or best offer. Hamprice
says it's worth about $150, so I figure with the Chipswitch and the
D-104 hand mike, I've got it priced roughly right.
The 2510 service manual is just a freebie. I'm not even concerned
about getting any money for it, I just would hate to throw it away.

# 1104. KG4LEG new jammer in tampa bay on 146.640 N9EE wide area repeater

Newsgroup: rec.radio.amateur.swap
Date: 2003-11-15 19:56:44 UTC
From: hamradioman2000@yahoo.com
Message-ID: <e95066a4.0311151156.7b6e0e89@posting.google.com>
Source record: 1228
Cross-posted to: rec.radio.swap,rec.radio.amateur.misc,rec.radio.amateur.swap,rec.radio.amateur.boatanchors

the ron wright N9EE 146.640 repeater in tampa bay florida is home to a new jammer, he proudly says his call KG4LEG AKA coy roy on CB

www.QRZ.com reports him to be
Roy A Lepelletier
1703 Cypress Avenue
Belleair FL 33756
USA

roy will pick fights with other amateurs.
roy will key up and cary on an imaginary "full duplex" conversation with suposid CB'ers on channel 35.
he claims he has lots of friends on cb that are listening to him on 146.640 while they are talking back to him on CB ch 35. (that is total BS) hes just doing it to agitate the normal folk on 640. several people heard him keying up on CB 35 while claiming to talk full duplex on ham, wich would not be effective to talk to cbers anyway.
(basically roy is lieing about his intentions.)
he also will ramble on and on to himself that there are people making death threats against him. he also claims a guy named dickie or dicky hendricson or hendrickson is a child molester, and goes into deatail over the air what this dicky had suposidly done to childeren (fairly graphic and not apropriate)
in other times he will say this hendricson is his friend. one amateur don KG4COQ tried to nicely get roy to change to another repeater and wanted to talk to roy about the guys that roy is talking about on that other repeater. roy turns it all around and says roy doesnot need any help with these people that are after him, but if anyone wanted to help, they could send roy cash. (roy said that several times)
when don continued nicely to try to get roy to change repeaters, roy twisted around this words and accused the don of wanting to meet up with him to start a fight, but don didnot say anything like that, then roy accused don of wanting to meet up with roy for some homosexual encounter, wich again don NEVER said anything about. roy has also commented about having been in the marines out in california, something about a "jar head" flight wing kind of position, but didnot go into detail about why hes out. he claims hes retired and wants to stay that way. roy also was throwing out the "im gonna sue you" to alot of people also. he was saying people were saying bad things when they wernt. new people would get on the repeater, and he would initiate a conversation with them, but immideatly jump into a platform about how hes on cb and running 200 watts, just like everyone else does on CB. he says things over and over. if everyone leaves him alone, he would usually key up every minite or 2 making a stupid CB

comment or CB slang.

this guy is a head case, hes off his medication and someone needs to get him to the mental hospital :)

well the control operator is ron N9EE, he did shut the repeater off several times, but whenever it came back up coy roy was there.

on nov the 13, coy roy was back, and ron tried to make peace with roy, tried to pursuade him to fit in, and all has been forgotten and that he is welcome on the repeater anytime, and ron was handleing the situation quite well. roy did stop the agitation for several hours after the conversation.
a day later ron tried to talk to coy roy again, and coy roy didnot know who ron was, even tho ron had talked with him for 30 minutes the day before, much longer than anyone else talked to coy roy, this guy has some problems!

on 11/14/2003 KG4LEG roy said he was a tool and die maker in the marines, not a "jar head" in the marines flight wing like he said the day before.

coy roy also talks about another CB'er MENTAL MIKEY
other phrases he loves to use are "fag boy" "punk boy"

alot of this post is for archiving purposes in the newsgroups, so if people down the road have a problem with him, they can search the newsgroups and history will come up. the newsgroups are an invaluable tool of past history.
an archive system spanning several decades, and still growing every hour.

>scope they can get their greedy little hands on, regardless of who feels the
>pinch!
>
>ironicbecause the current digital phosphor /scopes are inferior in many
major respects to the previous analog versions.

Translate the dynamic range ie noise to max signal for a fair analog
scope and represent it in bits ; translates to 24bits or so with 100+MHz
bw cant do that with digital only 12 bits or so!!

Ive re recently had access to all types and demonstrated that to see a
.1mV 200MHz parasitic oscillation on a 10V 10MHz sin wave cant be done
on a modern scope (have to use analog spectrum analyser) but easy on a
good analog scope .
Cheap Analog still available from Japan we are being forced in that
direction bt Tech and Agilent/HP

Clean up time. Although all items are in excellent shape and working order, selling as-is. Willing to sell all items together for $600 CDN obo.

Email offers/inquiries to: radio-operator@telus.net

-Yaesu HF Radio FT-747GX SSB/CW/AM/FM 100W
(Includes Manual and Technical Suppliment)
-MFJ 986 3KW Differential T Tuner
-Vectronics 1.5KW Low Pass Filter
-Astatic D1104 Desk Microphone
-Micronta 12V 4Amp Power Supply
-Micronta 21-524 PWR/SWR Meter
-Micronta 21-522 PWR/MOD/SWR Meter
-Pro T PT SWR-4D PWR/SWR Meter
-Palomar 2KW PW-2000 SWR/PWR Meter
-Palomar 225 100w 10m amplifier
-DJ Electronics "J8" HF Preamplifier
-Genexxa 10 Band Equalizer
-Various cables, parts and hand microphones
-Coax:
20ft Belden 9913F7 with Amphenol PL-259's
20ft & 30ft Carol Cable 1180 (8/U)
25ft Regular RG 8/U

Oh Lordy, here we go again. It might not be an "antique" in the UK
where they have the "100 year old rule" but
American Heritage Dictionary sez:
anï¿½tique
(click to hear the word) (n-tk)
adj.

1. Belonging to, made in, or typical of an earlier period. See
Synonyms at old.
2. Of or belonging to ancient times, especially of, from, or
characteristic of ancient Greece or Rome.
3. Of or dealing in antiques.
4. Old-fashioned: wore a suit of rather antique appearance.

n.

1. An object having special value because of its age, especially a
domestic item or piece of furniture or handicraft esteemed for its
artistry, beauty, or period of origin.
2. The style or manner of ancient times, especially that of ancient
Greek or Roman art: an admirer of the antique.

Actually, it's not a Ham thing, it's more of a troll thing.
The individuals I mentioned before are nothing more
than trolls, a ham license has nothing to do with that.

> You know guys, there is a war on, and our

Yup, sad thing. It's those people that make you not want
to take the time, study, pass an exam if people like that
are on the airwaves. Believe me, if they talk like this
on the newsgroup, they can't be any better on the air.

It has nothing to do with crochety old hams and everything to do with the fact that the guy converted his 10 meter ham rig to CB and can't understand the FCC regs.

Don't blame eBay and the FCC for the fact you can't sell this radio legally.

Blame the CB bootleggers, pirates and freebanders like Landshark, Moparholic, etc. who operate illegally. They are the ones who forced the FCC to ban these rigs.

The 100 year rule applies to the US. If you were to sell as an item as an antique knowing it was only 75 years old, the buyer would have grounds for a lawsuit. They would win. The definition in the dictionary simply reflects common usage, not law. It just shows how ignorant people are.

Darren,
your is probably not the only case. However, the HR2600 does have a nasty habit of opening into 11 meters when one does the chipswitch to open 12 meters. This is not neccessarily true in all cases (depending on the version of the chipswitch used).

you might want to take the radio in, have it examined by a tech with a G.R.T.O lic. from the FCC (commercial grade lic.). and then have him sign an affidavit attesting to the specifications the radio is currently capable of. submit a copy of that along with your posting back to qrz.com and see what goes. Thats all I can suggest.

oh really? I know of 4 shops here in the southwest that used to do routine
mods on the HR-2600 line of radios without a problem. What are you basing
your info on?

> Put it on E-Bay instead, and in so doing tell QRZ.com to go pound sand.
good point. list it as "HAM GEAR". make no mention whatsoever about CB in
the ad.

Can you provide a *LEGAL*CITATION* to back up your claim that -anything-
claimed to be an 'antique' must be 100 years old?

Or are you, in actuality, as ignorant of _actual_legal_facts_ as you
claim others are?

"Put up, or *SHUT*UP*" applies.

So why does the State of Illinois sell restricted use antique license
plates for vehicles over 25 years old? Shouldn't they know "the law"?

I did a pretty extensive search, and I can find no law, statute, or covenant that states that there is a particular time period involved in a particular item being "antique", only a concensus that seems to have changed by virtue of common usage (ever hear of common law? It came about by virtue of a concensus.) One dictionary still states the 100 year figure, however, most do not. Lacking an actual statute, common usage, and not an old dictionary definition, would be what is considered in a civil suit.

Aside from that, if you were to hold to that 100 year figure, there will be very few antiques, all in the hands of the very rich, left within the next 50 years, as there is nothing that has been made in the last 40 years that will still be around then, and the supply of parts for that which was built before then will have long since been depleted..

I think it depends upon the item (which makes things even MORE complicated).

In most states, a 20-year-old car qualifies for an "Antique" license plate,
and I don't think these states are worried about being sued for fraud.

It seems reasonable that radios would have a similarly short time period
before becoming "antique." Now, exactly what that period would be is
unclear.

Whenever I see something for sale with the word "antique" on it, I view it
as just another adjective, like the word "deluxe" or "new and improved" --
in other words -- as "hype" used by the seller to make the item seem more
precious.

One of Illinois' governors established his reputation as a Federal
prosecutor who got convictions against several high powered state and
local politicians. He is also a well known antique collector.

Strangely, he hasn't sent hoardes of "antique" dealers to the slammer.
I guess he lost his touch.

About 25 years ago, they redefined the laws on antique and classic cars.
Cars have their own designation.

It is quite true that there are relativly few antiques.. Look under customs
law. That's were it's defined. For people who know the definition, look at
the antique association (don't knowtheir actual name).

OK, and antique firearms have their own legal definiation, too.

But assuming a 75 year old non-imported item was sold as an "antique" at
a fair market price, how could a person win a judgement in court? And
how would the US Customs service get involved?

The only exception, according to the Customs Service is cars. If anything
is misrepresented when sold, the seller is liable. Customs would have
nothing to do with that other than their law being precedent.

U.S. Customs? Yeah so what? That is used simply for the purposes of levying an import duty (or not).

Whether something is considered to be an antique or not is simply a matter of convention or custom. Cars may have one designation, radios may have another, as does furniture. An old computer may be considered an 'antique'.

But it all depends with whom or what commodity one is dealing with. Different groups, by convention or custom, have decided what they consider to be 'antique'. It just happens that US Customs has settled on the 100 year mark, as have others, but they are not necessarily the final arbiter on what gets the designation of 'antique'.

In other words CW, you are wrong, wrong, wrong. Give it up...

Well, if the issue is misrepresention of an item as an antique, then I expect the buyer would have to show that the misrepresentation created a false expectation of an item's market value. In that case, the marketplace defination of an antique would be relevant.

I don't see how the US Customs defination would apply, unless there was some Federal beef about import taxes.

Well, I've got to hand it to you, CW -- you stick to it like a pit bull on a pot roast. ;^)

However, unless somebody logs on from US Customs, I don't think anybody else on this forum is going to support your position -- the chief reason being that (as you acknowledge) insiting on a 100-year vintage is absurd when dealing with radios.

Yet, if any of us saw a big 1940's-vintage tube powered "family radio," we would call it an antique. It has just become an acceptable catch-all name for old stuff, much like the word "Coke" substitutes for "soft drink" down south where I live.

FS: CABINET
I have a grey wrinkle cabinet (Bud?), measures 21.5"wX15"DX14"H,
and has louvres on sides and back. Back also is open, bottom 19.5"x3".
Cabinet has flip-open top, and is drilled/threaded for 19" rack mount
equipment. Front trim of red-lined chrome, top lid has round chrome
hardware handle. Cabinet is in pretty decent shape, some stains,
grunge, and about 1 sq. in. of chipped paint but will clean up OK.
Purists will want to repaint. $60 plus shipping. Can send photos. Tnx
& 73

I'm right. That's all that matters. If no one else is willing to pull their head out, that is their problem. The law is a legal definition of antique. Has nothing to do with customs other than it was defined at the urging of them. Until they had a legal definition, there was no way to classify "an old thing". They didn't care if it called antique anything more than 20 minutes old, they just needed a definition. There time frame was set by antique dealers associations. The law says nothing about customs. It is a definition, period.

-- the chief reason being

That's true. That is why no radio should be called antique. None are old enough.
>
> Yet, if any of us saw a big 1940's-vintage tube powered "family radio," we
> would call it an antique.

I wouldn't. I know better. I would simply call it old.

It has just become an acceptable catch-all name

FWIW, I find it interesting that the Harmonized Code for US Customs uses
the the exact wording of "Antiques of an age exceeding one hundred
years" as the title of section 9706.00.00.
This is a duty-free import classification. Antiques of less than 100
years obviously exist and (they say) are dutiable @ 6.6% upon import.
If the antique label didn't apply at all then the radio item would be
classified and dutiable as some category of electronics.

Has little or nothing to do in determining if a 101-year old item is
legally defined as an antique and a 99-year old one is not in the
outside world. Their own explanation of their ruling specifically says
"In order to qualify as an antique for Customs purposes, the article
must be over 100 years of age...."

I hope this clears up any correlation (or lack thereof) between US
Customs and the definition of antique.

I guess then every other ham that has opened the transmit on their tranceiver to get additional ham bands, MARS/CAP, etc., has "converted their...rig to CB" if in the course of the modification it does theoretically allow transmission on the CB band. following that logic, there's a lot of $5000 Icom, Yaesu, and Kenwood HF rigs out there that have been converted to CB's. I respectfully disagree that by adding 12 meters to this radio it shows I "don't understand the FCC regs." I would submit that it is YOU who doesn't understand the FCC regs. Well, I see that trying to get any sense through to the "radio police" is a hopeless cause. No matter, I've sold the damn thing. Now, on to opening up my new 706 for 5 MHZ......

> With all ebays money how come they are afraid to have a telephone??
> ----------------

Funny thing is that I've spotted quite a few HR2600's on eBay both
before and since I tried posting my radio. And no, I didn't email
eBay about them nor am I going to post the links to the items (if the
radio police want to, they can just search eBay to find them). One
that has been up for several days even proudly advertises its
Chipswitch mod that covers CB. Ummm, can you say "selective
enforcement?"

It seems to me that folks have lost sight of the fact that HAMs are the
*only* ones that can legaly design, build/modify, and operate radios.
modifications/conversions don't mean squat as long as the equipment is
operated in accordance with 47CFR95 and 47CFR97.

CW...are you working for the government or a really good citizen?? I'll bet
that the word antique has got no definite meaning...from where I come
from...a 286PC is an antique...and they were produced in the late 1980s...so
I guess the guys only wanted to define a year thingy to charge taxes or
something...doesn't mean anything less than 100 years is not antique....

I just did a search on the entirety of "Title 19, USC" which is _all_ US
Customs laws. The word 'antique' is not mentioned *anywhere*.

This is readily verified by anyone -- <http://www.cornell.edu/uscode/19/>

19 USC 1489 "related to entry of antique furniture at certain ports",
but that section was _repealed_ in 1962.

You made the claim, now _can_ you back it up, or not?

I repeat:
Can you provide a *LEGAL*CITATION* to back up your claim that -anything-
claimed to be an 'antique' must be 100 years old?

Or are you, in actuality, as ignorant of _actual_legal_facts_ as you
claim others are?

"Put up, or *SHUT*UP*" applies.

So you claim. Now provide a cite to the the actual statute.

I've searched TITLE 19 UNITED STATES CODE (the laws regarding Customs and
the Customs service), and there is -no- mention of the word 'antique'
*ANYWHERE* in those statutes.

"Put up or *SHUT*UP*" applies

Can *YOU* provide any -proof- to back _your_ assertation that an 'antique'
must be 100+ years old?

There is *NOTHING* in the statutes (Title 19 UNITED STATES CODE) regarding
"Customs" to support such a contention. As *anybody* can verify by
using the search function at <http://www.law.cornell.edu/uscode/19/>

"Put up or *SHUT*UP*" applies.

The word "antique' is *NOT* mentioned _anywhere_ in the statutes that
cover Customs. Those laws are codified as TITLE 19 UNITED STATES CODE,
are available on-line at <http://www.law.cornell.edu/uscode/19/> and
can be *searched*. The word "antique" does not appear in the currently
existant statutes *anywhere*.

I repeat:
Please provide a *legal*citation* supporting your claim.

"Put up or *SHUT*UP*" applies.

This thread seems to have run it's course, but I'll toss in my two cents worth -

Here is an explanation from the Antiques Roadshow.

<http://www.pbs.org/wgbh/pages/roadshow/speak/antique.html>

Simply put, dealers and serious collectors tend to hold to the 100 year rule.

Others don't.

"...the word "antique" generally refers to an older object valued because of its aesthetic or historical significance. "

CW <clinton.magers@comcast.net> wrote:
>
>
>Your inability is not my problem. Do the letters FO mean anything to you?

It's *your* "inability" that is under discussion.

*YOU* claimed, in article <lRDtb.163913$275.506596@attbi_s53>:
"The 100 year rule applies to the US. If you were to sell as an item
as an antique knowing it was only 75 years old, the buyer would have
grounds for a lawsuit. They would win. ... It just shows how ignorant
people are."

You said, subsequently, "Look under U.S. Customs Laws."

Guess what? I _did_ go look.

It is a PROVEN, *VERIFIABLE* FACT that CUSTOMS LAWS in the U.S. (i.e.
"Title 19 United States Code") DO _NOT_ CONTAIN ANY REFERENCE to
the word 'antique', let alone a "definiton" thereof.
(verifiable at <http://www.law.cornell.edu/uscode/19/>

Title 19 of the Code of Federal regulations covers 'antiques' in
section 10.53. The language used is "Antiques of the age prescribed i
by subheading 9706.00.00, HTSUS..." The Harmonized Tariff Schedule of
the United States (HTSUS), subheading 9706.00.00 says "antiques of an
age exceeding 100 years".
<verifiable at <http://cfr.law.cornell.edu/cfr/19/>, and
<http://dataweb.usitc.gov/SCRIPTS/tariff/0310c97.pdf>

The term 'antique' is *NOT* defined _anywhere_ -- in any of 19 USC, 19 CFR,
or the HTSUS.

*ALL* the references in 19 CFR and HTSUS, have to do with the import-duty
exempt status of *some* antiques -- i.e. those antiques which are over 100
years old.

If an 'antique' was *legally*defined* as an object that was 100+ years
old, there would be _NO_NEED_ for the repeated, and continuing, appearance
of the qualifier "of an age exceeding 100 years" in the CFR and/or the HTSUS.

Thus, the fact that that qualifier _does_ so appear is *proof* that "antique"
is a valid, *legal* description of artifacts _other_ than those "of an age
exceeding 100 years".

Your continuing claim to the contrary demonstrates that *YOU* are one
of those "people" you referred to, when you said:
"It just shows how ignorant people are."

In fairness, that's not an accurate statement.

"Ignorance" is curable, by education.

You _refuse_ to be educated.

That makes the appropriate description "stupid". Stupidity is permanent.

You are *stupid*.

Since you appear to be incapable of being educated,
you are hereby notified that _every_ post you make,
containing your *proven*false*to*fact* allegations
will be followed up with the above _fact-based_
disproof of your allegation.

You have a choice:
1) STFU
2) have your *stupidity* exposed, _every_ time you
open you yap.

The choice is yours. Choose wisely.

CW: The only thing you are right about is that your head is so far up your
rectum that you think the sun went down. The only reason customs mentions
100 years old is to make a cut off point for collecting duty. They in no way
define an antique as being over 100 years old. Look uo the defininition of
antique in any of the online dictionaries and I think you will fall into one
of the synanoms of antique.

If no one else is willing to pull their
> head out, that is their problem. The law is a legal definition of
antique.

If this jack-ass troll CW would have made even a 30-second web search, he would have done a dictionary.com search for the definition of antique.

http://dictionary.reference.com/search?q=antique&r=67

He then would have found this definition:

"An object having special value because of its age, especially a domestic item or piece of furniture or handicraft esteemed for its artistry, beauty, or period of origin."

Funny thing is, there is no 100 years, or any other quantity listed in any of the definitions. If he is relying on one US Customs definition, that he can't even verify, then he is purely trolling for his own enjoyment.

Another funny thing. Trolling is nothing new for him. It must be his favorite hobby.

We all know he is wrong. He knows it, too. He is just doing this to provoke people. He keeps coming back because we have been feeding his sick desire for attention. Let's all just try to ignore him, okay?

I'm done with this whole affair now that I've sold the HR2600 radio in
question. A very educational and actually quite interesting
discussion this has been. In closing I'd just like to say that there
are still very many hams out there who have lent me a helping hand
with many constructive comments. I've received quite a few emails
from hams genuinely trying to help me with my questions. Thank You.
There have also been a few (I don't know if they are hams or not since
the dissenters usually won't post their callsigns) who have voiced
their opinions as well. Thank You for those opinions also. It's
helped me understand what all the fuss is about and the roots of the
militant anti-freebanders. AND is a celebration of free speech. I
say let it roll everybody and let's try to learn as much as we can
from one another. But remember the old saying "divide and conquor."
There's not that many people coming into any form of radio hobby
anymore, and all the in-fighting will help no one in the end, when we
wake up and all our radio spectrum has been taken from all of us.

Let's pick our battles carefully. To the freebanders, I say get your ham license, to the hams I say open your hearts and minds to everyone who shows an interest in radio and being a good operator, including more than a few freebanders who fall in this category. And together we might just get the 11 meter band back. At the very least we'll protect the spectrum we've got.

So what? Radio Shack cleared out the DX-398 several months ago for $99.97
and as of this moment the fair market value of this radio is $150.

If you want to be a price cop, get a job at QVC.

Gee, why so angry Paul ? Just another casualty of modern living I suppose.

I was actually interested in buying it and I wanted to make sure I didn't
have the model numbers mixed up since the original poster had two different
radios listed.

In the meantime good luck and keep your spirits up Paul.

Chill out Paul, all the guy asked was if it was the HTX-10. Easily confused with the HTX-100. That's all he asked, but you accused him of being price police with absolutely no provocation. Get up off yourself! Who made you the newsgroup Nazi? Sheesh.

I'm passing this info along because I thought it was important for the group (and before someone damages the radio they worked so hard for). The below email was a response from an ICOM tech after an amateur op inquired about the performance of the 746 and 746 Pro on 60 meters. Take the info for what its worth.

73 de Paul

Good Morning....

Thanks for your e-mail.

The 746 final PA band pass filters were never designed to support operation outside of the amateur radio bands. They will "stretch" to accept normal operation in the MARS and CAP frequencies just above and just below the amateur radio spectrum, but they will not support operation down in the 5 MHz area. They will heat up and you will damage the radio. About the only two radios will have reasonable operation on the 5 MHz area are the 706MkIIG and the 718.

Best Regards;

Mike Hilton

# 1185. FS or FT Ameritron AL-811H Amp

Newsgroup: rec.radio.amateur.swap
Date: 2003-11-22 16:31:44 UTC
From: jmcr@nospamnauticom.net
Message-ID: <3FBF8F70.170BFB4E@nospamnauticom.net>
Source record: 1109

I will sell or trade my amp for a decent short-wave receiver.

The Ameritron AL-811H operates on ALL ham bands 160 thru 10 meters. It is in excellent operating and cosmetic condition and less than one years old and has less than 1 hour operating time on it. Selling or trading because I am moving where I can't use the amp on a wire antenna and run QRP.

I would like $500 for the amp, hand carried to the buyer with 75 miles of my home. I paid $750. This amp will run 800 watts on the four tubes. I picked this amp up at Universal Radio, it was not shipped thus no shipper man handled it.

OR I will trade this amp for a quality short-wave receiver or BC-785 with optional digital board.

Remove nospam to email me IF you would like to deal.

Jim

# 1186. FS: Hallicrafters SX-101A

Source record: 1110

I just bought an SX-117 and must make room by selling an SX-101A that is recapped and realigned and working well. Some of the knobs need some work. The main tuning knob is not original, and currently the receive/standby switch is serving the on/off function. It has the added RF stage.

$150.00

I live in west suburban Chicago and will drive up to an hour to meet someone for delivery. At this time, shipping is not an option.

Over Thanksgiving I will be traveling to Beardstown, Illinois, and then north through the Quad Cities and Dubuque, Iowa, to Dodgeville, Wisconsin. I'd be happy to deliver along that route.

Please email with questions or offers.

Thanks,

Dave K9SW

Hi all, if you're looking for a good place to sell amateur radio equipment, like the forsaleswap@mailman.qth.net groups and the like I have one it's on yahoogroups called amateur radio swap to subscribe send a blank message to amateurradioswap-subscribe@yahoogroups.com I do keep a close eye on new members, yahoo accounts and others that are known for spam are moderated for a little while, but really only until I see a legit message from that account. Anyway if you'd like to join come on board I just cleaned a bunch of bouncing email addresses off and would like to see that number of members go back up. thanks and 73

PS do not announce auctions on that list we took a vote when I started it in 99 and almost all don't want auctions advertised on there, that's what these newsgroups are for lol.

YET! I think the prudent thing to do is make sure you are running relatively low power when operating on 60M. You are supposed to be running maximum of 50W ERP. I'd think 10 or 20 watts out of the transmitter would prevent over-heating of the band pass filter components.

# 1193. Knob source for RS-6

Newsgroup: rec.radio.amateur.swap
Date: 2003-11-26 12:37:17 UTC
From: Netnews Marty <marty@aa4rm.ba-watchHarvestersbegonE.org>
Message-ID: <QKmdnZzHYJzgA1miRVn-vw@giganews.com>
Source record: 1117
Cross-posted to: rec.antiques.radio+phono,rec.radio.amateur.boatanchors,rec.radio.amateur.swap

The RS-6 is a goofy 'survival radio' in 4 parts which all interconnect.
All parts same size & appear as ugly, longish black sardine cans.

I need the 2 knob sets. One knob fits the RT-6 transmitter, the other
the RP-6 power supply.

Both knobs very shallow black plastic with bar-grip & .25" shaft socket
which, too, has a little bar. Can easily put up digital fotos if anyone
asks.

Of course affordable (~$7/ea) repros would be GREAT

Thanks!

Marty

---tiny history---

Only documentable use was part of a survival kit in B47s since no way
cud get to E. Europe & back - they'd have to ditch.

But 1000s made after the 1st 50 or so the AF needed & most, probably, went
to Army special forces, etc. I say that since many came out thru
Army MARS in or near Ft. Bragg ~1959-61. Many call them spy radios
since there's mild similarity to RS-1 (earlier) and GRC-109 (later and
really special forces)

My unpopular theory was they were p/o a political pay-back (boondogle)
to Emerson Radio of Waltham MA. Emerson that later became GTE.

Details here'd be more valuable to me than the 2 damn knob sets!!!

AND LOOK TO

http://militaryradio.com/spyradio/

For Peter McCollum's amazing compilation!

Looking for an inexpensive 6 meter multmode rig. Brand not important. Older riger (TS 600 , IC 551 etc welcome) Prefer VE land for shipping purposes, but will consider US based rigs if the price is right.

Remove the NOSPAM to reply by email

Regards,
Gordon VE9GC

# 1197. FS/FT: Kenwood TS-940, SM-220, MC-60A, TM-V7 2m/440 mobile

I have for sale or swap a Kenwood TS-940S/AT 160-10 meter HF transceiver in very good shape. Included is a laminated manual, a Kenwood SM-220 scope, and an MC-60A amplified desk mic. Asking $800 plus shipping or would consider interesting trades for HF or satellite gear.

I also have a Kenwood TM-V7 dual band mobile radio with 3 meter separation kit. It is in excellent condition and comes with all original packaging and manuals. I am the original owner and a non-smoker. Asking $295 plus shipping.

Please reply via email to jcamp2@cox.net

Thanks and 73,
Jeff

I have for sale an as new AOR AR8200 MarkIII B hand held receiver. This is the latest offering from AOR in the 8200 series. This is a wide band receiver that covers 500 KHz to 3GHz cell blocked. It has 1000 memory chanels and is all mode including super narrow FM plus wide and narrow AM in addition to USB, LSB, CW and standard AM and FM modes. This radio has a total of 30 minutes of monitoring on it and then packed in the box. I have the box and all manuals and standard included accessories that came with the unit. I will also include the optional soft case with this radio. It is a 10 out of a 10 electronically and cosmetically. I am asking $475.00 shipped CONUS.
NO TRADES PLEASE

I have a nice Icom 761 with the rackmount handels. Have both service manual and operating manual. Also Org double box from icom. Also Heil HMI mic with cord and stand. Has had MARS mod done. And a few other items done during a recent checkup which are documented in the paper work. I would like 815.00 shipped Conus to your door. Radio is very HEAVY... Can provide a pic. Might entertain trading for an HF amplifier. Thanks for looking.

I need some of this stuff for antenna assembly. Anyone know where to get it?

For those who don't know what it is, it's a paste you get in a little can or tube that you smear on mating metals to avoid having them stick together after exposure to the elements. It's also used for soldering irons to make replacing tips easier.

I think it's molybdenum disulfide.

Any electrical parts place sells it. It is commonly known as Penetrox
or inhibitor paste. It is primarily used for aluminum wire contact with
terminal strips.

Two electronics stores and Home Depot didn't have it.

I finally found some at my auto parts store. I was told that Ham Radio Outlet had it for $8 but I only paid $3 for a decent sized tube of the stuff.

Thanks for your help, guys.

Bob

You can go to your local electrical supply house and ask for NO-LOX. It's used for making up alumunum connections in your electrical house panel. It's basically "never sieze" with conductive properties. Hope this helps.

The stuff I use is from Lawson...its simular to CopperCoat, but its 80% copper and works great. it takes very little...*maybe* a tablespoon full to do a 4 element tribander, but after 4 or 5 years in a really bad salt environment(Treasure Island in San Francisco bay), everything that had been put together with this stuff came right apart when the screws were taken out...anything that didn't get the antiseize was junk.
The stuff is expensive but worth every penny.

Automotive anti-seize is not the same as electrical.
Different purpose.
The automotive is to keep steel bolts from binding in aluminum, magnesium,
etc.
The electrical is to keep the coated materials from oxidizing while at the
same time ensuring good electrical contact.

Here is a link to the Lawson stuff

http://webapp1.lawsonproducts.com/website/showItem?itemNum=59933

I have been using the same can for 20 years...a little bit goes a very long way....It works great for all kinds of other stuff too...lug nuts, exhaust manifold bolts, aluminium wire in breaker boxes etc.....

Hi Bob ... I applied Permatex anti-seize to the bolts on my tower and the boom-mast-rotor hardware. The whole works came apart smoothly after being up for 20 plus years. The material I used between the Al junctions on the TH-6 was supplied by Hy-Gain in a little metal pill box. Likewise the stuff worked great. SS hardware used on the antenna.

May be for a different purpose but have used it on antennas for along time and have never had any problems with it. Seems to conduct just fine and will certainly let things come apart easy. Last use was on a TH6DXX, no ill side effects, still up and working without any problems. Antenna analyzer shows all is well.

==========
In the UK a very good stuff for outer metal protection is Finigan Waxoyl,
available from many autoparts - and hardware shops.
Living in a windswept area near seawater ,hence with a lot of salt spray ,I
use it on all bolts and nuts and galvanised metal clamps etc.
Of course it is NOT suitable to make galvanic contact between (dissimilar)
metal parts.

Yes, I have used the NeverSeez conductive grease, sold for automotive
repairs, on things like car battery terminals, to resist corrosion and
enhance conductivity. It does fine there.

As long as conductivity is good, and there is no capacitance created,
it should be fine.

There are two varieties. One is a mix of graphite and moly in a syrupy solvent. One is a mix of copper dust and moly in a pasty solvent. Either one works well and we notice not a whit of difference in the conduction properties. In the aircraft industry, we use them rather interchangeably to coat the threads (lightly) on spark plugs so they won't pull out the helicoils in the heads when we go to change them annually, on manifold and muffler bolts so we don't have to drill them out when it comes time to work on them, and on any other thread that is likely to become corroded into place.

If necessary, you can go to an aviation supply house (Chief Aircraft, Grants Pass OR; Aircraft Spruce, Fullerton) and buy as much as you need by mail order. In a really well-stocked automotive supply house you can buy it by the dribble bottle, pint, or quart.

This is definitely a "me too."

Waxoyl is excellent stuff - a blend of wax and oil (surprise) plus
corrosion inhibitors that really work. I recently pulled out a rotating
pipe mast that had been sitting in a ground socket full of Waxoyl. 10
years of condensation had turned it into more like an oil/wax/water
emulsion, but the bare steel came out looking like new.

In more normal use on nuts and bolts, the oil dries out and the wax
coating hardens, so it also acts as a pretty good thread-lock.

Don't know if Waxoyl is available outside of Britain... but if it isn't,
it should be!

I have a Excellent condition 101EX 10-160 meters. Still has the plastic film on the faceplate of the radio. Looks Extra nice. Works good, just like it should. I would call this a 9+ out of a 10. Only one small mark on cabinet i could see. Excellent condition.
Have power cord and Manual for it. Has optional fan unit installed. Would like 325.00 shipped on this Extra Nice Looking Yaesu. Open to trades.

I have for sale a new Comet dual band mobile system which consists of the following:
Comet C767 Dual band mobile antenna
Comet EM-B80 trunk lip mount
Comet CK3M5C coax assembly
This entire system is brand new and has never been out of its packaging. I was going to install it on my car and decided I wanted to go with an HF mobile rig and a screw driver antenna. I am asking $80.00 shipped CONUS.

# 1227. FS: MP-1 HF SUPER ANTENNA W/ ACCESSORIES

Newsgroup: rec.radio.amateur.swap
Date: 2003-12-03 16:50:56 UTC
From: Dean <n8ihs@comcast.net>
Message-ID: <0ZudnekcpPc4iVOiRVn-vw@comcast.com>
Source record: 1001
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap

I have for sale an as new MP-1 Super Antenna system which covers 40-6meters
at 150 watts maximum. The antenna come with the following:
Mount with clamp
Counterpoise wires
Base rod
Coil slider
Telescopic whip
I am also including the following Super Antenna accessories:
Tripod for the MP-1
80 meter coil
Mobile kit which includes a 4 foot stainless whip and a 2 foot base rod.
This antenna was used in the house as a portable antenna for a Yaesu FT-897
when I did not want to go to the shack in the basement. All items are as
new. I have all of the paperwork. You can see this entire system on the
Super Antenna web site by going to
www.superantennas.com
I am the original owner and can truly say that this antenna has only been
used no more than 3 hours. Flat matches can be acheived with this antenna
without any problems via the sliding antenna coil.
I am asking $145.00 shipped CONUS

# 1230. Gon-Set old/new FM converters

Newsgroup: rec.radio.amateur.swap
Date: 2003-12-05 15:31:28 UTC
From: Netnews Marty <marty@aa4rm.ba-watchHarvestersbegonE.org>
Message-ID: <uomdnQItQN9NOU2iRVn-sA@giganews.com>
Source record: 1004
Cross-posted to: rec.antiques.radio+phono,rec.radio.amateur.boatanchors,rec.radio.amateur.swap,rec.audio.tubes

Found on pg. 138 of 11-46 Radio News. Converted 88-108 into 8 mhz segments consistant w. original 42-50 band. Converters called Type A, B, & C.

Gon-set was then a line made by Waterproof Electric in Burbank, CA.

Looks like Faust Gonset of later "Gonset Communicator" fame got started there

Newsie stuff said, I'd like to have one of those converters.

If anyone'd like to see a picture, I can scan.

Beware it's unglamourous. Looks like a big IF can.

Thanks!

Marty

Hi gang

I was cleaning out my spare radio box and found 2 Motorola 16 ch HT1000's R
model 403 to 470 handhelds that I forgot about, for sale or trade
I programmed them up on the local ham repeaters and a couple commercial
repeaters and they work great, they both show signs of normal use, but not
beat up
Radio's and antennas only

I also have a brand new in the box battery eliminator/test box for a XTS
3000 handheld

Things I'd be interested in trading for
Low band (42 to 50) hand held, pc or self programmable
handheld that will do 6 meter.
210 ch vhf king handheld (front panel programmable)
or other radio gear? see what else you have that I may be interested in or
make a cash offer

thanks
Steve

I have for sale a new Comet dual band mobile system which consists of the following:
Comet C767 Dual band mobile antenna 2m/70cm
Comet EM-B80 trunk lip mount
Comet CK3M5C coax assembly
This entire system is brand new and has never been out of its packaging. I was going to install it on my car and decided I wanted to go with an HF mobile rig and a screw driver antenna. I am asking $80.00 shipped CONUS.

# 1247. FS: NEVER USED ICOM IC-2720H DUAL BAND MOBILE

I have a brand new, never opened Icom IC-2720H dual band mobile radio for sale. I bought this with good intentions of installing it but have decided to go to a HF mobile rig instead. This radio is as it came from the factory.
I am asking $300.00 shipped CONUS.
NO TRADES PLEASE.

I have for sale an as new AOR AR8200 MarkIII B hand held receiver. This is the latest offering from AOR in the 8200 series. This is a wide band receiver that covers 500 KHz to 3GHz cell blocked. It has 1000 memory chanels and is all mode including super narrow FM plus wide and narrow AM in addition to USB, LSB, CW and standard AM and FM modes. This radio has a total of 30 minutes of monitoring on it and then packed in the box. I have the box and all manuals and standard included accessories that came with the unit. I will also include the optional soft case with this radio. It is a 10 out of a 10 electronically and cosmetically. I am asking $450.00 shipped CONUS.
NO TRADES PLEASE

# 1249. FS: YAESU FC-20 AAT (Relist)

# 1252. Icom Mic question? HM56 replacement

Newsgroup: rec.radio.amateur.swap
Date: 2003-12-09 14:41:09 UTC
From: Rod <cabletek73@comcast.net>
Message-ID: <hPSdnTd2KJucQkiiRVn-tw@comcast.com>
Source record: 1026

Hey gang,

Have a very worn out HM56 mic for my "still working fine" 3220 dual bander. Im looking for a DTMF mic (new) for my radio and cant seem to find one. The 56 is a discontinued item and Icoms response was the 36 (current model). I was wondering if I could take a dtmf electret "modular" plug mic and simply change the plug to the 8 pin? The 36 is a nice mic but doesnt have DTMF. Mics Im looking at are the HM77,100,118.

Thanking the group in advance and wishing you all a good holiday!

73's
Rod Barton

***** Roller Coil ******

La Pointe L-0201 406-1 (identical to a Johnson 229-201) 10 uH. used
good,
$30

New! GE Ceramic end plates, part no. 7463338, for a GE roller coil.
$10 pair

***** B&W Air Dux coils *****

These are NOS, 10" lengths, unless noted otherwise

#1208T 1.5" dia, 8TPI, #16 wire, slight tarnish $20
#1216T 1.5" dia, 16TPI, #20 wire, somewhat tarnished $20
#1006T 1.25" dia, 6TPI, #14 wire, somewhat tarnished $15

plus a NOS partial length

#1008T 1.25" dia, 8 TPI, #16 wire, 8" long -- $12

--- some other partial lengths

#2408T 3" dia, 8 TPI, #14 wire, 4" long shiny -- $15
#2410T 3" dia, 10 TPI, #14 wire, 2.5" slightly tarnished -- $10

#3030 2.5"" dia, 8 TPI, #14 wire, 4" tarnished -- $10
#3031 2.5"" dia, 10 TPI, #16 wire, 3" long somewhat tarnished -- $10
#3031 2.5"" dia, 10 TPI, #16 wire, 1.75" long somewhat tarnished --
$5

---a couple of Illumintronic Engineering parts

375 7367-P1 -- 1.5" dia.x 5.75" winding w/ indented turns, 14 TPI,
#17,
7" overall including plastic center support, un-used somewhat
tarnished $25

980-0121-000 -- 2.5" dia. x 7.5" winding w/ indented turns, 8 TPI,
#14,
9.5" overall including plastic center support, used somewhat tarnished
but, no
turns soldered $30

--- some other coils:

6.5 turns, 2" diameter 2" long silver plated .185" diameter copper
tubing
-- currently tarnished but, should clean up nice -- $15

6 turns, 2.5" diameter 2" long silver plated .25" diameter copper
tubing
-- lightly tarished. Ends are flatteded to one inch long tabs with a
hole for say a #10 screw. There is a crack in the tubing near one
termination which may be easily repaired with silver solder. -- $20

A large RF choke -- #22 enameled wire space wound 24 TPI for 2.75 on a
1"
diameter grooved fiberglass form 5" overall -- $5

Miller 62A024 series (.173-.272uH I think!?) coils, 1/4" diameter
wound
with a 5 turn coil. Blue (carbonyl SF 40-300 MHz) core. 4
terminals,
2 currently unused. NOS. 2/$1

Toroidal Tank coil -- The core is fiberglass & resin encased. It is
currently wound with 20 turns of #12 wire. There are notches in the
form for up to 40 turns. It is a bit over 4 inches in diameter and
about 1-3/4" thick. This was made by W6YUY. See his article in
August 1985 Ham Radio magazine "Design a Toroidal Tank Circuit for you
Vacuum Tube Amplifier". $50

********** Air Variable Capacitors ********

Cardwell XR-1000PS 1000pF About 4.5" x 4" x 3.5" overall including
plate
travel. .025 air gap. Used, Good condition. $20 ea.

Cardwell XR-1000HS (about 950pF max measured) These have slightly
contoured plates for improved tuning resolution at minimum C. .025
air
gap. About 4.5" x 4" x 3.5" overall including plate travel. Used,
Good
condition. $20 ea.

Cardwell 30-900pF (measured) (XR-900PS? -- 4 fewer plates than the
above
units) .025 air gap. About 4.5" x 4" x 3.5" overall including plate
travel and mounting ears. used, Good condition. $20

Hammarlund SM-50-X, 7.5-50pF, .064 air gap, Just under 2" x 2" x 2"
overall not including 1/4" shaft. Good condition. $10.

Johnson T9-5 miniature vertical PC mount trimmers 1.9-15.7 pF, Silver
Plated machined plates -- NOS 2/$1

Johnson 154-1, 12-244pF, .05" air gap, about 3" x 3" x 3" overall.
Rear shaft has been cut flush with bushing and the rear mounting tab
has
been shortened a mite. Otherwise, excellent condition, $25.

Johnson 154-34-3, 20-400pF, looks like .03" air gap, about 3" x 3" x
3"
overall not including 1/4" shaft which is about 2-1/2" long.

Excellent
condition, $25.

Johnson 500E20 (modern equivalent 154-3), 500pF/2KV, looks like .05"
air
gap, about 3" x 3" x 4.5" overall not including 1/4" shaft which is
about
1-1/2" long. Good condition except the rear mounting tab has been
removed and it looks like a couple of the plates arced at one time and
were subsequently filed down a mite. $25.

Similar to the part above but, NOT a Johnson, another 500pF/2KV, looks
like .05" air gap, about 3" x 3" x 4.5" overall not including 1/4"
shaft
which is about 1-1/2" long. Good condition except the front mounting
tab
has been removed. $25.

National Type DX 500pF variable capacitor, approx. 3" X 3" x 3"
overall
fairly good condition. Last one, $10

Remler "scissors" variables. Type 630 350pF $25
Type 631 500pF $25

4 Section capacitor 20-550 pF per section large receiving style
capacitor,
$25

**** Ceramic Doorknob & Disk caps ***

These are used Centralab or similar -- $5 ea or 5/$20

68pF 5KV 850 series

These are NOS disks by KD & Erie $3ea or 4/$10

1500pF 7.5KV
.01uF 4KV

NOS Silver Mica caps

2200 pF 500V CM06 $1 ea
5100 pF 500V CM07 (high current rating) $2 ea

*** Resistors ***

Four 37.5K 78W power resistors, used w/mounting clips -- $8

Two 200W (or so -- 10" long) 1.5K ohm 10 tap (every 150 ohms) power
resistors, used. $12 pair

Dale 1.5K, 225 Watt power resistors, used. 3 pieces -- $12all

Ohmite 2K, 225 Watt power resistors used w/mounting clips -- $5 ea (10
available)

Ohmite 3K, 225 Watt power resistors used w/mounting clips -- $5 ea (8
available)

*** Carborundum type SP resistors $10 each ***

30 watt parts (2.5" long) 1 ohm 65 ohms

100 watt parts (6" long) 1 ohm 30 ohms 240 ohms 270 ohms

125 watt parts (8" long) 35 ohms 200 ohms 220 ohms (I've about
10
of these) 250 ohms

The numbers have partially worn off some of these units so, some of
the
above numbers are measured values.

All of the above plus shipping, if necessary, naturally.

Cross-posted to: rec.radio.amateur.swap,rec.radio.swap

I have a brand new, never opened Icom IC-2720H dual band mobile radio for sale. I bought this with good intentions of installing it but have decided to go to a HF mobile rig instead. This radio is as it came from the factory.
I am asking $300.00 shipped CONUS.
NO TRADES PLEASE.

For Giveaway: Globe Chief 90A Novice CW Transmitter. A classic Novice CW transmitter form the late 50's. Was working the last time I fired it up. It would be a nice addition to a home museum. Free to some one in the Seattle Area.

# 1276. FS Heathkit HW-99 CW Transceiver

Newsgroup: rec.radio.amateur.swap
Date: 2003-12-19 17:54:38 UTC
From: Charlie Hugg <hug-a-bug1@cox.net>
Message-ID: <EXGEb.114548$cQ.83509@okepread05>
Source record: 1050

I have a very nice Heathkit HW-99 CW Transceiver for sale. It looks almost new. The front panel is perfect accept for a small mini toggle switch installed below the Band
Switch. You turn this switch in the up position to access the 10 meter Band. This appears to be the only modification and the construction of the kit is excellent. I checked it out on all 4 Bands, 80, 40, 15, and 10 Meters. It puts out well above 50 watts on each band. The CW tone is excellent and the receiver is very stable and sensitive. It has a built in 120 Volt Power Supply and speaker. It sounds better on an external speaker.
This is a great little CW rig. All you need is a key and an antenna to be on the air. The rig sold for $300 in mid 80's
and they only made it for a couple of years, so it is rather rare. The original manual in included. See
Product Review in March 1986 QST. Price is $225 shipped in lower 48..
Thanks, Charlie Hugg,
K5MBX

Please let me enlighten some of you "youngsters" and some rather lazy ones I might add on what us "oldtimers" consider ham radio really is. Amateur Radio is truly changing ..... right. It truly started with a Mission Statement to serve the public in case of emergency. It's become a super CB'er gab medium "legally" allowing more distance and power.
1) Back in the mid 50's we had to travel to an FCC office and pay a few bucks to take a supervised exam both written and International Morse code. Under those non VEC conditions I received 4 full college college credits for my General Class license that to this day appears on my transcript from Univ of the State of NY.
2) Back then ALL us hams read thoroughly the ARRL Amateur Radio Handbook, some of us built our first receiver (usually super-regenerative) others purchased our receiver but definitely we all built our first transmitter from "junk" parts or purchased a kit.
3) In keeping with the Amateur Radio Mission Statement us "old timer real ham" ultimate dream was and still is today to possibly someday save some lives of public that may be in distress by monitoring one of the international distress frequencies almost daily.
4) For those of you interested try some of these links for ideas to set up a schedule.
http://www.tpub.com/content/istts/14225/css/14225_25.htm
Because of propagation skip I monitor at home here in Phoenix:
* 500 kHz -- International CW/MCW distress and calling (Because I do copy CW 60+wpm)
* 2182 kHz-- International voice distress, safety, and calling (Thanks to Ham radio I speak 6 languages fluently and 9 more broken enough to pass an urgent message)
* 8364 kHz-- International CW/MCW lifeboat, life raft, and survival craft (CW proficiency plus past USN enlistment)
* 121.5 MHz-- International voice aeronautical emergency (am licensed private pilot - single engine/land)
* 3023.5 and 5680 kHz-- International SAR frequencies for the use of all mobile units at the scene of a search. Also for use of shore stations communicating with aircraft proceeding to or from the scene of the search. CW and voice. (I am involved in Search & Rescue being member of volunteer branch of local Sheriffs Department and a private pilot)
5) In case some of you "modern VEC hams" aren't aware a signaling device capable of CW can be made from something as simple as a "back wired" cheap transistor broadcast receiver capable of signaling a monitoring "old-timer antiquated" ham like me to summon help thus saving lives. I have to date logged nineteen (19) actual distress calls since 1954 including 9 merchant ships, 4 military aircraft, 2 commercial

pleasure cruisers, one 52 ft pleasure sailboat in S Pacific, and 3 lost private aircraft. Most have been "CW" and only two were AM voice. Lets hope that if you happen to be among survivors of a disaster there is a "real old time ham" available that can from the most simplest "junk" signal for help to another "real old time ham antiquated" just in case your $3000 SSB transceiver is damaged beyond toast and unusable. (hihi) It never ceases to amaze me that you die hards seem to think that the only thing not damaged in a distress situation will be your modern technology transceiver (of which I have three).
6) Lastly: Believe me I have spent my share of years "ragchewing" SSB, SSTV, ATV, AM, packet (both landbased and with space shuttle), but mainly daily my specialty is mucho, mucho CW. Man I do love it!!!

Summary: Well, if you have read this thread this far you must know that I know my xyl and I are excessive because we can signal with a flash lights, automobile horn, and even with semaphore, etc. Repeating Amateur Radio's Mission Statement deals first with the commitment to aid the public in case of emergency and secondly with self pleasure. I personally don't feel a person should be able to call themselves a "Amateur Radio Ham" if they can't from the simplest means be able communicate with others in an emergency situation to offer service to the public. A lot can be done with just 5wpm CW by signaling with horns, lights or a simple "dirty" (spurious) transmitter. We recently had a ham with a flash light AND a mirror that did not know simplest CW go as far as setting an entire forest on fire destroying property and homes to signal a helicopter for help. Dumb!!!!

No, my friend CW will never be "toast", thank god for the lives that have been saved in the past and will be in the far future centuries to come and forever. You and others like you definitely won't be a part of it though .....unless you change your attitude. Nothing will ever replace it because it is so basic and simple!! Unfortunately many hundreds or even thousands have been lost because of not knowing this simplest means of communications .... International Morse Code. Some old timer friends and I have been working on a transmitter technique using natural surrounding minerals using damp tree branches for an antenna and without using batteries, tubes, or transistors, that generate legible spurious noise heard by any sensitive receiver for signally ..... that is by CW, of course, sorry no USB/USB or AM!! (HIHI)

Incorrect analogy.

Here is an appropriate one; if I want to become a doctor in society
TODAY, as in, right now, the time that I live in, what's the point in
takeing classes, courses and earning degrees in alchemy and astrology
and waisting time learning about the black arts, potions, witch's spells
and/or voodoo? They're out of date.... there are new more effective
and applicable methods to get the job done.

Would you call a person with a PhD in brain surgery "lazy" if he
didn't want to learn how to brew bat wings in the blood of a newborn
pig under a full moon in order to get rid of headaches?

Thank you for playing, goodbye.

Clint

While I do tend to agree that cw is mostly an older form of
communications and agree with Roland (btw, well said Roland) I would
like to ask the "old timers" as to how many of you have recently,
within the last 3 years, have actually taken someone aside and offered
to try and teach them cw??? I have been slowly trying to learn cw but
have found that locally VERY few people actually willing to try and
teach cw to anyone. It seems odd to me that so many people are so
willing to complain that no one wishes to learn cw when in fact I
belive its the other side of the coin in that so many are unwilling to
teach it to younger people. Thanks for your time, 73, Billy

Perhaps a better question would be: "How many of you old timers have had people express an interest in ham radio and asked for help in learning CW".

Answer: Several for the first part, zero for the second part.

Hi Billy,

Thanks for answering with your very intelligent response. Although I am 60+wpm I was not naturally that speed at birth. Here is the very simple secret to learn CW and is taught to USN Radio operators with amazing 99.9% results. I was already a ham for 5 yrs with I joined the USN in 1959 but I saw guys & gals from tractors on farms to large urban cities learn CW with great ease and fun.

Yes, Billy, I have directly taught scores of boys/girls men/women CW with the following method:
1) CW is rythmn!!!!!! Like music with a metronome!!!! CW was taught in the USN with music playing in the background at a "medium" speed.
2) Every student Radioman had an old fashioned "straight key" connected to a code oscillator and then learned to SEND CW starting with the letter A, B, C, etc. They learned the structure of letters by sending them thus "automatically" learning to RECEIVE CW. Great, huh?
3) So, forget code tapes and code broadcasts until you learn the structure of the characters again by sending plain text (newspaper, magazines, etc) to yourself at the rythmn of music or just patting your foot!!!
4) If you want some help getting started I can do it by telephone to start you with the rythmn needed. Simply email me with your telephone number at address below.

Hi,
Wrong! Nothing goes out of date. We learn and build from old.
I am still using CW regularly.
I am on other modes as well but not as much interested as CW.
I see still people riding horse drawn buggy and climb mountains on foot.
I still see people writing letters instead of emails using fountain pen.
Still people paint pictures instead of snapping with digital camera.
I dont see anything wrong with that.
Let it be and let everyone do/enjoy whatever s/he likes.
Season's greetings, 73.
Tony, VE6CGX
P.S. How about guys who do not know how to drive manual?
Are they real drivers? They should give driver test
using stick shift.

Clearing out shack storage bins due to relocation.
I have a bunch of loose transformers from old printers and radios.
Please do not ask specifics.
Also have a bunch of loose ic sockets, some ic's, resistors, belts,
heatsinks of various sizes, assorted nuts/bolts/screws, motors out of
vcr's, tape players, stereos and a few stepper motors.

For info, best bet is to email direct along with posting in here.

Tony KC8EWU

I am also looking for a dual band ht antenna with sma connector and if
possible a manual or info on where a manual could be found for a GE
Searcher 2+2 radio.

Because when the FCC, in their infinite wisdom, decided not to require a sending test any longer. Everyone stopped bothering.

That is how I learned CW, back in 61. It worked for me. I now do 50 easy. And have done so for years.

Roland is right on target. And BTW Roland I have saved your comments. Glad to meet a real ham.

Dan/W4NTI

That's a wonderful argument -- and the FCC has set up radio services
for folks with your mindset: family service radio, citizen's band
radio -- or if you're willing to take a simple written test, the
technician license for amateur radio. If you're willing to work a
little harder, pass 5-words-a-minute code testing and more difficult
written exams, then you can get full amateur priviledges. What's there
to complain about?

power.

And we still are capable of performing emergency communications regardless
of your downplaying a hobby that you participate in like a self-hating ham.
Many of us train regularly with ARES/RACES groups and are ready when called.

Some universities might still do that. As far as the FCC issue, thank god
they did that..... less government intervention in my life is better. Only
a liberal democrat would wish it go back to the old scheme of testing.

> 2) Back then ALL us hams read thoroughly the ARRL Amateur Radio

Guess what.... some of us still do today! Generalizing the whole hobby by
experiences with a selected group does nothing for the growth of the hobby.

And you were living in a delusional world if you think you were/are that
self-important but training in message handling and communications is
important if that ever does happen. Personally speaking, I also monitor
quite a few frequencies as well.

Get with the times man, instead of dwelling on the past.

Exactly Clint. You have in fact SUPPORTED his point.

You should stay with the internet and FORGET amateur radio.

It's far too "dull and old fashioned" for a trendy "modern"
guy like you!

Stay off the air and we will ALL be happier, including you!

Can you guys talk to him some more HERE please, so
he will be too pre-occupied to get on the radio?

Thanks!

> happier, including you! (snip)

Lets see what the FCC has to say about that, Albert. In the Report & Order following the last round of restructuring, the FCC said;

"We are persuaded that because the
amateur service is fundamentally a
technical service, the emphasis on
Morse code proficiency as a licensing
requirement does not comport with
the basis and purpose of the service.
We note, moreover, that the design of
modern communications systems,
including personal communication
services, satellite, fiber optic, and high
definition television systems, are based
on digital communication technologies.
We also note that no communication
system has been designed in many years
that depends on hand-keyed telegraphy
or the ability to receive messages in
Morse code by ear. In contrast,
modern communication systems are
designed to be automated systems.
Given the changes that have occurred in
communications in the last fifty years,
we believe that reducing the emphasis on
telegraphy proficiency as a licensing
requirement will allow the amateur service
to, as it has in the past, attract technically
inclined persons, particularly the youth of
our country, and encourage them to learn
and to prepare themselves in the areas
where the United States needs expertise."

Clearly, Morse code proficiency as a licensing requirement is out of place in Amateur Radio today, Albert. As is your attempts to urge anyone who opposes code proficiency as a licensing requirement to "forget" about Amateur Radio. The radio world is moving forward. Either we move forward with it or we become irrelevant. If we choose the latter path, we will no longer be worthy of the massive frequencies and operating privileges we enjoy - no irrelevant radio service is.

Actually, I like the "code quick" program, myself. I am in no way affiliated with the company that markets it, but it's money well spent. I don't recommend the computer program, as much as the tapes, but the computer program does allow you to paste in ANY text, and have it sent in morse code, (your email, etc) thus giving you fresh stuff to copy all the time. The tape set works with you on a more personal level, and actually uses about 5 different methods, at once, to get the code stuck in your head. It ignores the dits and dahs, and teaches you the characters by the sound of the entire character, likening it to a phrase, which sounds just like the character, when sent.

Here is an interesting, and true story. I took a total of 9 cbers, who were all dead set against the code, but finally decided it wasn't going away any time soon. All of them wanting to get on HF, and with a little prodding by the origional fellow who agreed to let me teach him well enough to pass the test in less than two weeks, guaranteed. They showed up for one hour a night for nine days. The nine day mark just happened to be the first available code test, after commencing our little project. All of them, seeing how easy, and fun it was to learn code, decided to take a whack at it at that code test. All of the nine, except 1, passed with perfect copy, and didn't even have to take the multiple guess test. Of the 9, one was totally blind, and took the test with earphones and a "blind typewriter" (not knowing the correct term for this device). The one fellow who failed, had only been attending the group for about 4 days, but just had the balls to give it a go, anyway. He later passed on his own.

I taught them using the code quick method, lacking all the tapes, and materials. I just did it live, using the guys HF rigs built in keyer, set to no break in.

Just to let you know how easy it is to learn code, ONCE YOU DECIDE TO DO IT... I'de be willing to bet you that I could teach a monkey to copy, in his head, 3 characters, in a days time. The hardest code test to pass will be the 5wpm... why? Because first you must get over all the reasons why you

1)don't have time to

2)are never going to use it

3)shouldn't be required to

4)can't learn it

AND JUST DO IT!

Once you see how easy it is, when motivated, you'll probably start using it because learning a new skill is fun to do. when you use it, your speed will increase without even trying. I really feel sorry for you guys who will never do it. All I can say is, upon passing my 20wpm test, and walking out the door to meet my buddies, with that piece of paper in my hand, well.... I haven't felt that good, no... GREAT, since christmas morning, when I was 3 years old, and got my first bicycle. And yes... I did conform to the rules, and learned to ride with training wheels... I didn't think I should just be able to ride it, without working on it first. And by the way... I'm no brain surgeon, and I went from no-code to extra in 4 months time. Since then, serving on a VE team, I've seen several foriegn exchange students sit down, and go from ZIP, to extra, in a matter of hours... including the old 20 wpm code test.

Anyone want help in the WNY area, I'll help you too. It really is much easier to pass the code test, than to learn all the extra info to pass the expanded written exam. Just respond here, and we'll see what we can come up with.

> Morse code proficiency as a licensing
> requirement does not comport with

[snip]

> Clearly, Morse code proficiency as a licensing requirement is out of place
>in Amateur Radio today,

Iff you read afgain at the top I did not address that issue.

You had been going on about the technical frontiers and what is and is
not "with it" today - FOR YOU (unlike the many thousands of CW ops)

My remarks and your response are almost entirely unrelated.
You have difficulty understanding logic and plain English, aparently.

I merely suggested that if you don't like old fashioned things like HF
and CW that you stay on the internet where you will be happier.

It was about YOU not the FCC.

>Albert. As is your attempts to urge anyone who
>opposes code proficiency as a licensing requirement to "forget" about

>Amateur Radio.

Not anyone - YOU!

You obviously don't LIKE muych about amateur radio and are far more
comfortable grousing about it on Usenet. So fine! Have at it!

>The radio world is moving forward.

No shit!

>Either we move forward
>with it or we become irrelevant.

Again you are using totally faulty logic.
I am involved with digital communications using the latest
techniques.
And that is NOT via an old-fashioned cable or twisted pair
like Usenet has to rely on (grin!)

>If we choose the latter path, we will no
>longer be worthy of the massive frequencies and operating privileges we
>enjoy - no irrelevant radio service is.

Well you are entitled to your opinoin, no matter how confused you try
to get yourself! Enjoy the new frontier. I will enjoy BOTH the
traditional AND the new.

Attacking CW is absurd, and as was pointed out in another
thread, the nastiness always starts with the anti-CW mob.

I don't give that much of a rat's arse about whether the testing
gets stopped, because I don't think it will be the death nell of
amateur radio any more than hundreds of other change sthat have
aoccurred in the past 25 years by the FCC and by hams.

However, I DO think that what bodes ill for amateur radio is
the ATTITUDE and BEHAVIOR of aggressive, divisive people!

My comments were for you personally, and not about the
proposed changes for VEC testing etc.

Again, my suggestion for a guy who dislikes CW and HF is
this, Dwight:
You should probably stay with the internet and FORGET
amateur radio.

It's far too "dull and old fashioned" for a trendy "modern" guy
like you!

Good grief, Albert. You can't even figure out which person you're talking to. I didn't say any of those things and you didn't say any of those things to me. That was a discussion you were having with Clint, not me.

I, on the other hand, addressed your opinion that those more interested in modern electronics and radio than CW (what you called "trendy modern guys") should "stay with the internet and forget amateur radio." And I did so by pointing out what the FCC said about the need to reduce the emphasis on telegraphy proficiency as a licensing requirement to "attract technically inclined persons, particularly the youth of our country, and encourage them to learn and to prepare themselves in the areas where the United States needs expertise." Clearly, even according to the FCC, the United States does not need expertise in CW today.

> Again you are using totally faulty
> logic.

I guess it would appear faulty to a person who can't follow along well enough to figure out which person he or she is talking to.

> Well you are entitled to your opinoin,
> no (snip)

It's not just my opinion, Albert. It's also the FCC's opinion - you know, the federal agency that regulates Amateur Radio.

> Attacking CW is absurd, and as was
> pointed out in another thread, the
> nastiness always starts with the
> anti-CW mob.

I've said nothing nasty to you, Albert. The only nastiness, in the discussion between you and me, is coming from you..

> I don't give that much of a rat's arse about
> whether the testing gets stopped, (snip)

Since the use of CW itself is not threatened in any way, the only issue at hand is the telegraphy proficiency licensing requirement (the code test).

> However, I DO think that what bodes
> ill for amateur radio is the ATTITUDE
> and BEHAVIOR of aggressive, divisive
> people! (snip)

The only bad attitude, bad behavior, or divisive behavior, here is your own. You're telling people who don't like CW to forget Amateur Radio. You've used more foul language in one message than I've used in these newsgroups in perhaps the last ten years.

> Again, my suggestion for a guy who dislikes
> CW and HF is this, Dwight: You should
> probably stay with the internet and FORGET
> amateur radio.

And my suggestion for someone obsessed with CW enough to urge others with different views to stay away would be to get out of Amateur Radio - attitudes like that don't "comport with the basis and purpose" of this radio service.

the FCC is not tasked with deciding what we NEED. Rather they are
tasked with regulating what we DO with amateur radio.

Your statement is totally dishonest and is not worthy of discussion.

For the confused, grumbling babies like Dwight, who think that
CW is dead, here is great evidence to the contrary:

TEENAGERS WHO LOVE CW:
http://home.alltel.net/johnshan/cw_ss_teens.html

http://home.alltel.net/johnshan/links_ss_cwin.html

YMMV

Try CW - it might just lower your blood pressure about 90%
there Dwight, old boy!

LOL!

Ahhh, so if you are not a CW fanatic, then you don't like amateur radio. Such a negative attitude as yours has been part of the reason why amateur radio has been in decline. Here in VK, recent meetings between the government communications body (ACA) and amateurs has seen overwhelming numbers in favour fo the removal of CW for the access to the HF amateur frequencies. In the meeting that I attended, only one amateur was in favour of the retention of CW as a mandatory access requirement for HF. Of all of the amateurs at the meeting, only one person in favour of the retention! Surprisingly, even the unrestricted operators (equivalent to extra calls) were all (bar the one anti) in favour of removing CW as an uneccesary barrier to HF access. As a result come 01 Jan 04, CW is not required in VK for access to HF. We still support it as a historical part of amateur radio, and indeed hope that it doesn't die off as a mode that amateurs use. Funnily enough, now it is not required (well in about 4 days anyway), the concensus is that it will probably become a more popular mode of comms - but in the end, that is what it is - merely one of the many modes of comms that is available to amateur operators. Long may it prosper, but not as an uneccesary barrier to HF access.
The bitterness does not start with just the anti CW mob - it is both their fault and those of the anti change establishment. To say that the anti CW individuals should stay on the internet is at best shallow, and at worst stupid - sorry, but I say it as I see it. If it hurst, then there may well be an element of truth in it. Have a think about it. Never know your bad luck, you may well hear me on HF come 0100 (LIMA) on 01 Jan 2004 (that would be about 311300Z Dec 03 where the ruling in VK changes all over the country). Hope you welcome all of us newcomers to HF - many of us have been on HF for years on military and commercial HF freqs, so are not exactly newcomers to the band in general. Hope to speak with you then.

Matt

No, the FCC is tasked with deciding what the basis and purpose of the Amateur Radio Service is and what we need, from a regulatory perspective, to be able to meet that basis and purpose. The FCC clearly addressed that when they said "the emphasis on Morse code proficiency as a licensing requirement does not comport with the basis and purpose of the service."

> Your statement is totally dishonest and is not
> worthy of discussion.

I've simply quoted, and agreed with, what the FCC has said. If you think that is dishonest, perhaps you should take it up with them. However, I don't think it is dishonest for the FCC to say that "...no communication system has been designed in many years that depends on hand-keyed telegraphy..." And I don't think it is dishonest to say that alone is justification to eliminate Morse code proficiency as a licensing requirement.

Excuse me, but I have never once said, suggested, or even hinted, that "CW is dead." My comments throughout this entire discussion have solely addressed telegraphy proficiency as a licensing requirement.

> Try CW - it might just lower your blood
> pressure about 90% there Dwight, old boy!

And learning to read what a person has actually said, instead of blaming a person for things that person never said, may help lower yours.

Sadly, the near future is not so bright here in the USA. I suspect it may be five, ten, or perhaps more, years before telegraphy proficiency as a licensing requirement (code testing) disappears in this country. At this point, the FCC (our government regulatory agency) has decided to do nothing until a consensus on the issue is reached within the Amateur Radio community. Clearly, there is no consensus whatsoever at this time. If a consensus is reached, it will take another one to two years for any change to go through our regulatory process. However, since most Americans can be very pig-headed (stubborn), many doubt a consensus will ever be reached. Therefore, many are hoping the FCC will simply give up on the consensus idea, deciding the issue based on what is needed, from a regulatory perspective, to meet the goals and purpose of the radio service. Nothing so far suggests they intend to do that anytime soon.

Unfortunately, too many in this country cannot separate code use from the code test. They view the possible removal of the code test as an assault on

their CW identity or lifestyle. Another group views the code test as a filter to keep out undesirables ("those people" - a form of bigotry based on Morse code). Still another group views the code test as a solution to this nation's wider social problems (lowered education standards and so on). Whatever the case, almost all of these seem to forget that code testing is simply a licensing step into what is fundamentally a recreational activity (with meaningful undertones, but a recreation nonetheless).

Take care, Matt. Enjoy your new HF privileges. Perhaps all Amateur Radio operators here in the USA will one day be able to join you, and all those in other countries now without a code test, on those frequencies. If that happens, you can darn sure bet Americans will be among the last in the world to do so.

I'll try to sort it out, Rick. Albert is blaming me for what Clint said and I suspect "FT243" is blaming me for the subject line in this newsgroup thread. I don't think either one of them is actually reading what I've said, at least not without the anger carried over from what others have said. Does that make any sense? If not, don't worry - I'm getting confused trying to figure out what each one is actually talking about also.

Hi guys and dolls

I was cleaning out the radio room the other day,
I have 2 "R" model 403 to 470 Mhz HT 1000's that
are collecting dust, these are 2 ch that have been
converted to 16, I used these for ham and commercial use
both radios work well, they are used but not abused.
these are the radio and antenna, no battery or chargers

I also have a new in the box, Battery elimanator/test box for
the XTS3000 series handheld and a CSI model 9800D micropatch
repeater controller/telephone interconnect that are collecting dust

some things I would consider in a trade or partial trade
or make me an offer on all or 1

low band 42 to 54Mhz handheld, pc or keypad/self programmable
or tri band handheld
mfj 259B or 269
2 or 3 port repeater controller (for an upcomming project)
Bendix king vhf eph 210 ch or self programmable vhf with dtmf
dual band mobile
kenwood TK-480 800 Mhz
pentium class laptop

or what you may have that I may be interested in

Thanks for taking the time to read this
Steve

Nobody said Morse code wasn't useful - it's a fine recreational activity. However, when it comes to a licensing requirement, the sole issue is whether Morse code serves a regulatory purpose. As the FCC said, it doesn't today.

> The opinion of the FCC about cw is not
> relevant. (snip)

Really? Since they regulate this radio service (including the licensing requirements), I somehow suspect the FCC would strongly disagree.

It is not relevant because the FCC has stated many times that it will do
what the members of the ARS want on certain issues. This is one of them.

Cancer? boy you really show your ignorance. Without old timers you would
all be running AM with beep boxes and yelling ten four all over 20 meters.

We are the ones that keep trash like you out of the service. And will
continue to do so.

I have for sale a brand new Icom MB-85 mounting bracket. This bracket is an optional accessory for the Icom IC-2720 mobile dual band radio. This bracket attaches the radios control head to the main unit. This has never been used and is in its sealed box. I am asking $18.00 shipped CONUS.

BS, Wayne. In case you haven't noticed, Morse code hasn't been a requirement to get a Ham license (the Technician license) for many years. And, during that time period, there hasn't been, based on FCC enforcement reports, any significant increase in "CB-like" behavior on the frequencies used by those Technician license holders. In other words, the "CB" threat just isn't supported by the facts.

Keep it up, Dan. Attitudes like this will certainly increase the numbers of those opposed to your way of thinking. The rhetoric from you and Bruce only makes my goal of ending code testing that much easier.

Hey, I love traditions also (perhaps more so now that I'm getting older). But, I also realise tradition has to bow to the realities at some point. I simply cannot see code testing being a requirement for Ham radio for the next several hundred years. In other words, it has to end at some point. Since no communications system has been designed in many years that depends on code skills, perhaps now is that point.

> (snip) a couple of the guys in this

Noise and static, Harold. Clearly, some have decided that if code testing dies, Amateur radio should die with it. Some have even said so. In that vein of thinking, they have taken a very destructive approach to the whole issue. However, Ham radio is obviously not going down that easily and we all have to go on together regardless of the outcome of this debate. Therefore, I think it is wise to keep the debate civil.

> You have, at least, kept a nominally

Since the ITU has now ended the international requirement for Morse code on HF, I think it is inevitable that code testing will eventually end. The question now is when and how that will happen. At this point, we can only guess.

Tho' I tend to agree that the minimal 5 wpm code requirement should be
kept(What can I say, I'm tradition bound), a couple of the guys in this
thread on that same side of the argument are sounding more like the '50s CB
"Channelmasters" than the kind of Hams I tend to respect. You have, at
least, kept a nominally polite attitude in your responses. It will be
interesting to see what those with the final say on licensing will finally
decide, won't it?

I have new old stock NE-51 neon shorts bulbs from 1964 available.

these are the shorts bulbs used on TV-2 series military tube testers and are also the pilot lamp on the TV-2

they are also the shorts bulb on Hickok 539C and 533A as well as some Hickok 539B's and some Hickok 533's and the equivalent Western Electric and RD Instruments testers.

the NOS NE-51's are 2 for $6 - free shipping

also have a few NOS NE-45 from 1966 for $11 each for TV-7, TV-3, and TV-10 and many Hickok models.

I also stock #81, #47, #49, #12, #44, #51 #46 etc. new old stock

write me at cacheoverflow@yahoo.com

cheers!

cowboy bill
